<b>Total</b>	<b>100</b>	

**ADDITIONAL MATERIALS**

A calculator.

**INSTRUCTIONS TO CANDIDATES**

Use black ink or black ball-point pen. Do not use gel pen or correction fluid.

You may use a pencil for graphs and diagrams only.

Write your name, centre number and candidate number in the spaces at the top of this page.

Answer **all** questions.

Write your answers in the spaces provided in this booklet. If you run out of space, use the additional page(s) at the back of the booklet, taking care to number the question(s) correctly.

**INFORMATION FOR CANDIDATES**

The number of marks is given in brackets at the end of each question or part-question.

The total number of marks available is 100.

Assessment will take into account the quality of written communication used in your answers.

JUN242500U10101

Answer **all** questions.

1. Draw a truth table for the following Boolean expression:

[6]

$$X = P \oplus Q + R.(P + \overline{Q})$$

[5]

[3]

3. Clearly showing each step, simplify the following Boolean expression:

[8]

Examiner  
only

$$A.(B + C) + \overline{C}.(A + C) + B.(B + \overline{A})$$

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

4. (a) Describe the term 'word length' in relation to a CPU.

[1]

.....

.....

.....

.....

- (b) Convert the denary number  $27_{10}$  and the hexadecimal number  $7E_{16}$  into two 8-bit binary numbers. Add the two numbers together using binary addition, leaving your answer in binary.

You must show all of your workings.

[4]

.....

.....

.....

.....

.....

.....

.....

.....

.....

- (c) Using the binary number  $101.0101_2$ , demonstrate truncation to one binary place, and calculate the effect upon accuracy in terms of relative error.

[3]

.....

.....

.....

.....

.....

.....

.....

.....

.....

6. Describe the difference between fixed and variable length records. Give an example of data that could be contained in each. [6]

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

7. Explain the difference between sequential and indexed sequential file access.

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

8. Describe computer-based processes that protect the security of data.

[4]

.....

.....

.....

.....

.....

.....

.....

.....

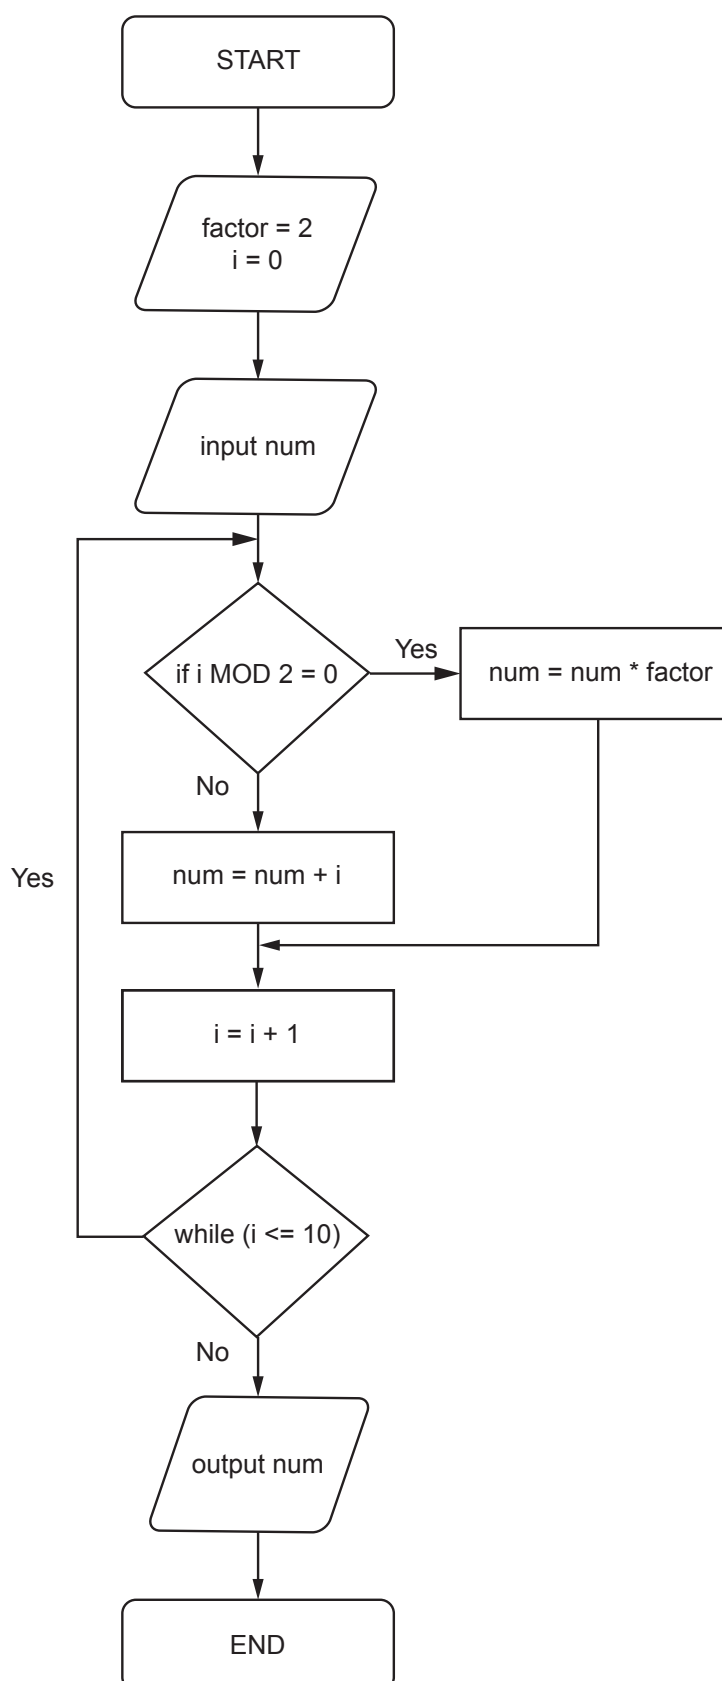

.....

.....

.....

9. Consider the constructs in the following algorithm.  
Note: there is no need to dry-run the algorithm.

Identify and describe the purpose of the following constructs in the algorithm:

(a) Constant.

[2]

.....

.....

.....

.....

(b) Variable.

[2]

.....

.....

.....

.....

(c) Selection.

[2]

.....

.....

.....

.....

(d) Repetition.

[2]

.....

.....

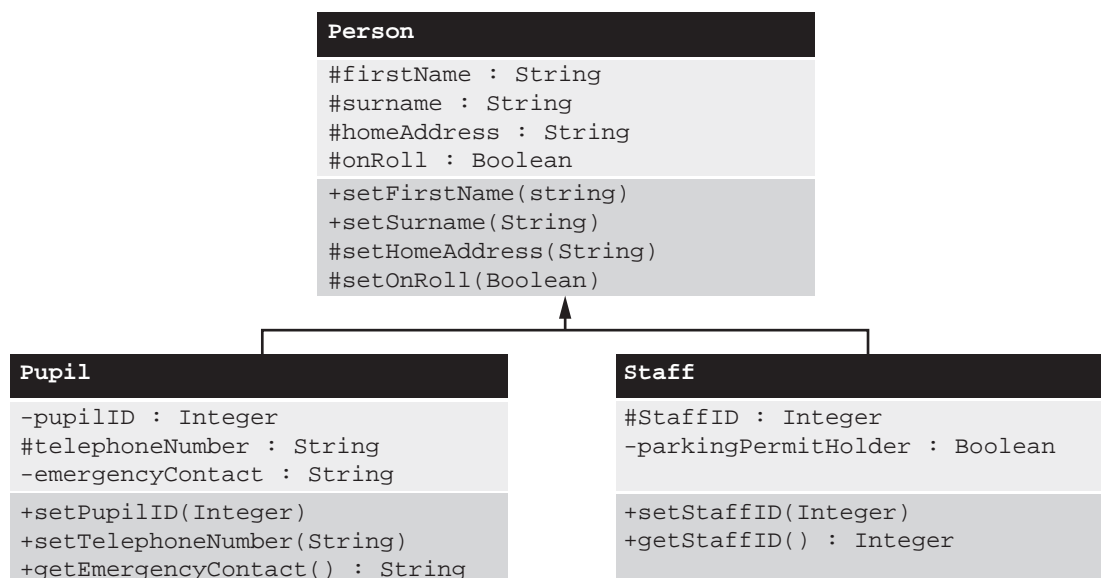

.....

.....

10. Object-oriented programming is a paradigm that organises code into reusable, modular objects that can interact with each other to accomplish specific tasks.

Consider the following class diagram for a school:

- (a) Describe the relationship between an object and a class.

[2]

.....

.....

.....

.....

.....

.....

(b) Give **one** example for each of the following from the class diagram opposite.

(i) Super class.

[1]

.....

.....

(ii) Sub class.

[1]

.....

.....

(iii) Method that does not require a parameter.

[1]

.....

.....

(c) Describe the difference between public, private and protected methods.

[3]

.....

.....

.....

.....

.....

.....

11. Describe the contents and use made of the following documentation:

(a) User documentation.

[4]

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

(b) Maintenance documentation.

[4]

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

12. Explain the role of Integrated Development Environment (IDE) tools in developing and debugging programs.

[6]

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

**13.** Describe the following stages in the compilation process:

(a) Lexical analysis.

[3]

.....

.....

.....

.....

.....

.....

.....

.....

(b) Semantic analysis.

[3]

.....
