## GCSE (9-1)

## Computer Science

J276/02: Computational thinking, algorithms and programming

General Certificate of Secondary Education

Mark Scheme for November 2020

OCR (Oxford Cambridge and RSA) is a leading UK awarding body, providing a wide range of qualifications to meet the needs of candidates of all ages and abilities. OCR qualifications include AS/A Levels, Diplomas, GCSEs, Cambridge Nationals, Cambridge Technicals, Functional Skills, Key Skills, Entry Level qualifications, NVQs and vocational qualifications in areas such as IT, business, languages, teaching/training, administration and secretarial skills.

It is also responsible for developing new specifications to meet national requirements and the needs of students and teachers. OCR is a not-for-profit organisation; any surplus made is invested back into the establishment to help towards the development of qualifications and support, which keep pace with the changing needs of today's society.

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which marks were awarded by examiners. It does not indicate the details of the discussions which took place at an examiners' meeting before marking commenced.

All examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes should be read in conjunction with the published question papers and the report on the examination.

## Annotations

| Annotation | Meaning |
| :---: | :--- |
| SEEN | Answer seen - this annotation must be used on all blank pages within an answer booklet (structured or unstructured) and on <br> each page of an additional object where there is no candidate response. |
| A | Omission mark |
| BOD | Benefit of doubt |
| Fro | Cross |
| NA | Follow through |
| NBOD | Not answered question |
| REP | Benefit of doubt not given |
|  | Repeat |
|  | Tick |

Each question must include annotation. All marks credited on point-based marking must be given a tick.

| 76 | Mark Scheme |  |  |  | November |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 2 | (b) | 1 mark per bullet to max 2 <br> - Easier/quicker for humans to write <br> - Easier/quicker to read / understand / remember <br> - Easier/quicker to maintain / debug / spot errors <br> - ...because code is closer to English / uses English words <br> - Less code to write <br> - ...because one HLL instruction represents many assembly instructions <br> - Portable (between processors) // will work with different types of computer | $\begin{gathered} 2 \\ \\ \mathrm{AO} 1 \\ \mathrm{lb}(2) \end{gathered}$ | Accept "human language" as English for BP4 "Easier to use" is too vague. |  |
| 2 | (c) | 1 mark per bullet to max 2 <br> - Each character (in character set) has a unique (binary) number/value <br> - Each character in the string is assigned its associated number/value <br> - The (binary) value of each character is stored/combined (in order) <br> - ... by example e.g. The binary value for D , then for $r$, then for $u$ <br> - Uses ASCII/Extended ASCII/Unicode | $\begin{gathered} 2 \\ \\ \mathrm{AO} 2 \\ \mathrm{la}(2) \end{gathered}$ |  |  |

| 76 |  | Mark Scheme November 2020 |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 3 | (b) | (i) | - money <br> - price | 1 <br> AO1 <br> 1b(1) | Must be an identifier, not description. Ignore case. |
| 3 | (b) | (ii) | - one | $1$ <br> AO2 <br> 1b(1) |  |
| 3 | (c) |  | 1 mark per bullet <br> - Checking if money>=price... <br> - ...decision (diamond shape) used <br> - ...venditem() and giveChange(money-price) if True/Yes <br> - ...output an error if False / No <br> - Terminator used to start and end the program and all paths terminated | $\begin{gathered} 5 \\ \\ \mathrm{AO} 3 \\ 2 \mathrm{~b}(5) \end{gathered}$ | Reasonable attempt at BP1 needed for credit BP2, 3 and 4 Ignore other additional code. <br> BP3 and BP4 must follow on from True/False // Yes/No decision to be credited. <br> Subroutines names and parameters must be correct. Ignore missing brackets on venditem. |

| Question |  |  | Answer | Mark | Guidance |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 3 | d | i | 1 mark per bullet to max 2 <br> - Indentation // whitespace <br> - Appropriately named variables / identifiers <br> - Modularisation / use of subroutines | $\begin{gathered} 2 \\ \mathrm{AO} 2 \\ 1 \mathrm{~b}(2) \end{gathered}$ |  |
| 3 | d | ii | - Comments <br> - Use of constants | 1 <br> AO2 <br> 1b(1) |  |
| 3 | e |  | - SELECT ItemCode //* <br> - FROM ITEMS <br> - WHERE <br> - ...Stock < 10 | $\begin{gathered} 4 \\ \\ \text { AO3 } \\ 2 \mathrm{~b}(4) \end{gathered}$ | Accept other fields shown in addition to ItemCode <br> Accept Stock <=9 / etc. <br> Ignore case. Spelling of fields and table must be correct. <br> If WHERE missing, Stock < 10 must be after FROM clause. |
| 3 | f |  | 1 mark per bullet <br> - Input from user <br> - Check IF input value is "on"... <br> - ... if so, assign 1 to statevalue <br> - Correct assignment of 2 for "off" and $\mathbf{3}$ for "suspended" with correct state and IF <br> - Correct logical check (else) to output "invalid state" if no state set | $\begin{gathered} 5 \\ \\ \text { AO3 } \\ 2 \mathrm{~b}(5) \end{gathered}$ | Accept alternative error messages. Variable names must not include obvious spaces. <br> BP 3 dependent on BP2. BP2 and BP4 must be a logical comparison using IF and not just the CASE statement. NE to simply replace CASE with IF. ```Penalise each error once then apply FT. e.g. newstate = input("Enter the new state : ") if newstate == "on" then statevalue = 1 elseif newstate = "off" then statevalue = 2 elseif newstate = "suspended" statevalue = 3 else print("Invalid state") endif``` |

| 76 |  | Mark Scheme |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 4 | (a) |  | - E 3 | 2 <br> AO1 <br> 1b(2) | 1 mark per digit (mark right to left) Max 1 if any additional leading values |
| 4 | (b) |  | - 01101001 must be 8 bits | $2$ <br> AO1 <br> 1b(2) | 1 mark per nibble (mark right to left). Max 1 if any additional leading values |
| 4 | (c) |  | 1 mark per bullet to max 2 <br> - Easier/quicker to communicate / enter / write / read / remember <br> - Less chance of input errors // easier to spot errors <br> - They are smaller / shorter <br> - Easy to convert between binary and Hexadecimal | $\begin{gathered} 2 \\ \text { AO1 } \\ 1 \mathrm{~b}(2) \end{gathered}$ | Mark response as a whole. <br> Do not accept answers simply describing what hexadecimal is. <br> "easier to understand" or "easier to use" on its own is NE <br> BP3 (smaller) must refer to size when written down, NOT size when stored which is unaffected) |
| 4 | (d) | (i) | - 3 | 1 <br> AO1 <br> 1b(1) | CAO |
| 4 | (d) | (ii) | - 1 | 1 <br> AO1 <br> 1b(1) | CAO |
| 4 | e |  | - 00001111 | 1 <br> AO1 <br> 1b(1) | Ignore missing or additional leading zeros |
| 4 | f | i | 1 mark per bullet point <br> - B AND C <br> - OR gate with two inputs, one of which is A <br> - ...correct connection of these two gates with no additional gates / connections | 3 <br> AO1 <br> 1b(3) | Shape must be accurate |

| 4 | f | ${ }^{\text {ii }}$ | 1 mark per bullet point <br> - Correct completion of $A$ and $B$ inputs as 11 <br> - 0 output for 01 input <br> - 0 output for 10 input <br> - 0 output for 11 input | $\begin{gathered} \hline 4 \\ \\ \mathrm{AO1} \\ \mathrm{1b}(1) \\ \mathrm{AO} 2 \\ \mathrm{1b}(3) \end{gathered}$ | CAO |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  |  |  | A | B | P |
|  |  |  |  |  |  | 0 | 0 | 1 |
|  |  |  |  |  |  | 0 | 1 | 0 |
|  |  |  |  |  |  | 1 | 0 | 0 |
|  |  |  |  |  |  | 1 | 1 | 0 |

| Question |  |  | Answer | Mark | Guidance |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 5 | a |  | - Number of pixels (in an image) <br> - Height and width (of an image) | 1 <br> AO 2 <br> 1b(1) | Accept pixels per inch / mm / unit area (density) |
| 5 | b |  | - 90 (pixels in an image) // $15 \times 6$ (pixels in image) <br> - Multiply pixels $x$ bits per pixel <br> - ... 2 bits required per pixel (because 3 colours) <br> - 180 bits overall answer | 4 AO1 1b(2) AO1 1b(2) | Must clearly show multiplication for $3{ }^{\text {rd }} \mathrm{BP}$ |
| 5 | c |  | - Reduce number of pixels / resolution <br> - Reduce number of colours <br> - Use lossy compression <br> - Use lossless compression | 2 <br> AO2 <br> 1a(2) | Accept descriptive answers linked to given logo (e.g "change to black and white only") <br> "Make image smaller" is NE <br> Allow compression by itself for one answer. |
| 5 | d | i | - Data about data / the image/file // properties of the file | $\begin{gathered} 1 \\ \text { AO1 } \\ \text { 1b(2) } \\ \hline \end{gathered}$ | Do not accept examples without a definition. |
| 5 | d | Ii | e.g. <br> - height <br> - width <br> - colour depth <br> - resolution <br> - geolocation <br> - date/time created/last edited /I timestamp <br> - file type <br> - author details | 1 <br> AO1 <br> 1a(2) | Accept any sensible data that could be stored alongside an image. <br> Do not accept filename |
| 6 | (a) |  | - Access "Rob" / studentnames[0]... <br> - ...does not equal "Anna" // not desired item // move on <br> - Access "Anna" / studentnames[1] <br> - ...does equal "Anna" // stop // item found | 4 <br> AO2 <br> 1b(4) | Answer must refer to this array, not a generic description of linear search. "Access first item" is NE for BP1 or BP3. Must refer to this scenario. <br> Max 1 for "Compare 'Anna' to each item in list" if nothing else credited. |
