

Question	Part	Marking guidance	Total marks								
01	1	<p>2 marks for AO1 (recall)</p> <p>A sequence/number/set of steps/instructions; that can be followed to complete a task/to solve a problem;</p> <p>A. Different wording with similar meaning</p>	2								
01	2	<p>3 marks for AO1 (recall)</p> <p>One mark for each correct distinct label.</p> <p>If the answers given were, for example, C, C, B then award only 1 mark for the B as the C is duplicated. Likewise if C, C, C was the answer then no marks would be given. The correct table is:</p> <table><tr><td></td><td>Label</td></tr><tr><td>Breaking a problem down into a number of sub-problems.</td><td>C</td></tr><tr><td>The process of removing unnecessary detail from a problem.</td><td>A</td></tr><tr><td>Defines the sort of values a variable may take.</td><td>B</td></tr></table> <p>A. If actual terms are written out instead of labels R. All instances of duplicate labels</p>		Label	Breaking a problem down into a number of sub-problems.	C	The process of removing unnecessary detail from a problem.	A	Defines the sort of values a variable may take.	B	3
	Label										
Breaking a problem down into a number of sub-problems.	C										
The process of removing unnecessary detail from a problem.	A										
Defines the sort of values a variable may take.	B										

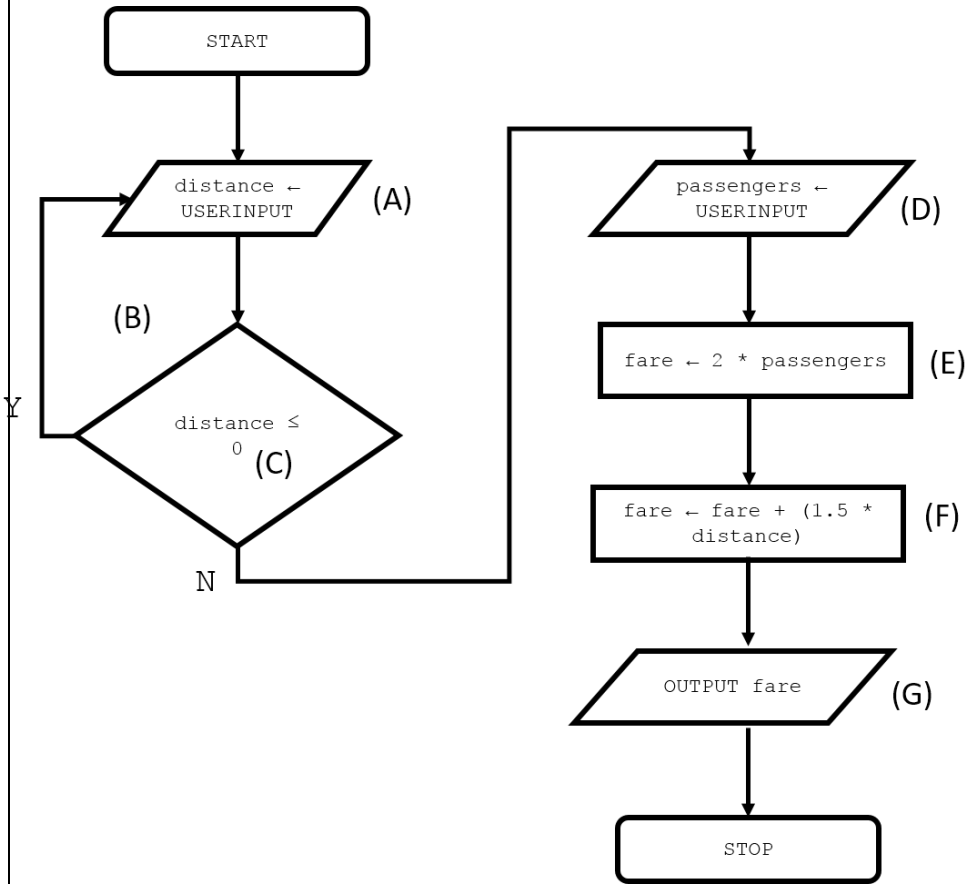

Question	Part	Marking guidance	Total marks
02		<p>7 marks for AO3 (program)</p> <p>If CHAR_TO_CODE is not used then a maximum of 6 marks.</p> <p>Mark A for using user input; Mark B for storing the result of user input in a variable or using the user input directly as a parameter to CHAR_TO_CODE; Mark C for using selection to determine if character is lowercase or otherwise; Mark D for using a Boolean expression that uses CHAR_TO_CODE with the input parameter being the user input (either directly or when stored in a variable); Mark E for a Boolean expression that checks if the character code is between 97 and 122 (97+25) inclusive; Mark F for outputting LOWER and NOT LOWER in logically separate places such as the IF and ELSE part of selection;</p> <p>Mark G if the algorithm is completely correct;</p> <p>A. LOWER and NOT LOWER stated in lower case for Mark F. A. Any logically equivalent Boolean expression for Mark E. A. Minor errors in spelling if the meaning is clear.</p> <p>Example 1 (fully correct)</p> <pre> character ← USERINPUT character_code ← CHAR_TO_CODE(character) IF character_code ≥ 97 AND character_code ≤ 122 THEN OUTPUT 'LOWER' ELSE OUTPUT 'NOT LOWER' ENDIF </pre> <p>(A, B) (Part of D) (C, D, E) (Part of F) (Part of F)</p> <p>(G awarded as completely correct)</p> <p>Example 2 (fully correct)</p> <pre> character_code ← CHAR_TO_CODE(USERINPUT) IF character_code < 97 OR character_code > 122 THEN OUTPUT 'NOT LOWER' ELSE OUTPUT 'LOWER' ENDIF </pre> <p>(A, B, Part of D) (C, D, E) (Part of F) (Part of F)</p> <p>(G awarded as completely correct)</p>	7

	<div><div><div>Example 3 (fully correct)</div><div><pre>character ← USERINPUT character_code ← CHAR_TO_CODE(character) IF 97 ≤ character_code ≤ 122 THEN OUTPUT 'LOWER' ELSE OUTPUT 'NOT LOWER' ENDIF</pre></div><div><div>(A, B)</div><div>(Part of D)</div><div>(C, D, E)</div><div>(Part of F)</div><div>(Part of F)</div></div><div>(G awarded as completely correct)</div></div></div>	
	<div><div><div>Example 4 (fully correct)</div><div><pre>graph TD START([START]) --> Input[/character ← USERINPUT/ (A, B)] Input --> Process[character_code ← CHAR_TO_CODE(character) (Part of D)] Process --> Decision{ (C) (D, E) character_code ≥ 97 AND character_code ≤ 122 } Decision -- N --> Output1[/OUTPUT 'NOT LOWER' / (F)] Decision -- Y --> Output2[/OUTPUT 'LOWER'/] Output1 --> STOP([STOP]) Output2 --> STOP</pre></div><div>(G awarded as completely correct)</div></div></div>	

	<div><div><div><div><div><div></div><div>Example 5 (6 marks)</div></div></div><div><div><div>IF CHAR_TO_CODE (USERINPUT) ≥ 97 AND</div><div>CHAR_TO_CODE (USERINPUT) ≤ 122 THE</div><div>E)</div><div>OUTPUT 'LOWER'</div><div>ELSE</div><div>OUTPUT 'NOT LOWER'</div><div>ENDIF</div></div><div><div>(A, B, C, D,</div><div>(Part of F)</div><div>(Part of F)</div></div><div><div>(G not awarded as USERINPUT used twice)</div></div></div></div><div><div><div><div><div></div><div>Example 6 (6 marks)</div></div></div><div><div><div>character_code ← CHAR_TO_CODE (USERINPUT)</div><div>D)</div><div>IF character_code < 97 OR character_code > 122 THEN (C, D, E)</div><div>OUTPUT 'LOWER'</div><div>ELSE</div><div>OUTPUT 'NOT LOWER'</div><div>ENDIF</div></div><div><div>(A, B, Part of</div><div>(Part of F)</div><div>(Part of F)</div></div><div><div>(G not awarded as LOWER and NOT LOWER are in the wrong places)</div></div></div></div></div></div></div>
