INSTRUCTIONS

- Use black ink. You can use an HB pencil, but only for graphs and diagrams.
- Write your answer to each question in the space provided. If you need extra space use the lined pages at the end of this booklet. The question numbers must be clearly shown.
- Answer all the questions in Section A and B and one question in Section C.

INFORMATION

- The total mark for this paper is **60**.
- The marks for each question are shown in brackets [].
- Quality of extended response will be assessed in questions marked with an asterisk (*).
- This document has 20 pages.

ADVICE

Read each question carefully before you start your answer.

2 SECTION A

Write your answer to **each** question in the box provided.

- 1 Which is a positive externality of a new factory being built in a town?
 - **A** Air pollution
 - **B** Employment
 - C Noise
 - **D** Traffic congestion

Your answer [1]

2 The diagram shows the production possibility curve for a country that produces computers and cars.

The economy is currently producing at point X.

What would be the opportunity cost of moving to point Y?

- **A** 200 cars
- **B** 600 cars
- C 500 computers
- **D** 2000 computers

Your answer [1]

- **3** Which of these is an example of a normative statement?
 - A More people will use solar energy
 - **B** Solar energy will be the only type of energy available
 - C Solar energy is a natural source of energy
 - **D** The UK government must subsidise solar energy

Your answer		[1]
-------------	--	-----

- 4 Which of these is **not** an example of a composite demand good?
 - A Chair
 - B Milk
 - C Oil
 - **D** Wood

Your answer [1]

5 The diagram shows the demand and supply of oil. The market is initially in equilibrium at E.

What would be the **most** likely cause of the market equilibrium moving to E1?

- A Decrease of costs of oil production and decrease in air travel
- **B** Decrease of costs of oil production and increase in air travel
- C Increase of costs of oil production and decrease in air travel
- **D** Increase of costs of oil production and increase in air travel

- 11 Which of these is **not** a type of economic system?
 - A Market economy
 - **B** Mixed economy
 - C National economy
 - **D** Planned economy

Your answer [1]

12 The diagram shows the social and private costs of manufacturing chemicals.

Benefits, costs, price

Which of the statements is true?

- A Costs to society are shown by MPC
- **B** Social optimum level of output is q
- C There is a net loss to society of triangle XYZ
- **D** Without government intervention profit-maximising firms will charge a price of P2

SECTION B

First, it was a fad. Now, as meat consumption falls, it's part of everyday life.

Veganuary is a global campaign that encourages people to go vegan. A record 500,000 people signed up to the Veganuary challenge to eat only plant-based foods for a month in January 2021. This included 150,000 people in Latin America, 80,000 in the USA and 50,000 in Germany. In 2021 the overall number was double the number in January 2019.

Research from the investment bank UBS on plant-based alternatives to meat, such as veggie burgers and sausages, showed a rising number of people trying the new products. The proportion of people who tried the alternatives rose from 48% to 53% between March and November 2020, according to UBS's survey of 3,000 consumers in the UK, US and Germany. It also found that half of those who tried plant-based alternatives continued to eat them at least weekly.

A spokesperson from Veganuary said "Pretty much everyone has accepted we need to be reducing animal products in our diets for environmental reasons. The way British supermarkets have embraced Veganuary in 2020 is truly game-changing with television and radio campaigns as well as promoting veganism on their websites and offering free recipes. They are not simply using it as a marketing opportunity, but are promoting the many benefits of plant-based eating. As key players of our food supply, they know that the only sustainable way forward is

5

10

Plant-based milk has been steadily growing and represented 14% of the milk category in 2019, according to statistics from the Plant Based Foods Association. While sales of plant-based milk continue to grow, sales of dairy milk are relatively flat. The cross elasticity of demand between oat milk and dairy milk is 0.23. Oat milk sales have jumped from 2020 to 2022 by 345%. The health benefits, such as high prebiotic fibre in oat milk are factors attracting customers. As consumers consider health to be more important than ever, they are willing to pay a premium for products that offer health benefits, as well as being able to contribute towards environmental protection. The income elasticity of demand for oat milk is +1.8. As well as the mass adoption of vegan and similar diets owing to moral concerns, plant-based milk market growth continues to be driven by an increase in milk allergies and lactose-intolerant

consumers. This is encouraging manufacturers such as the Coca-Cola Company, to introduce

new oat milk variants to appeal to their consumers, further driving oat milk sales.

Fig. 1
Reasons people give for eating less or no meat

Fig. 2

Number of people signing up to Veganuary

16 (a)	Using Fig. 1 , state what percentage of non-meat eaters thought it was better for their health not to eat meat.
/b .\	[1]
(b) (i)	Using Fig. 2 , calculate the percentage increase in the number of people who signed up for Veganuary from 2017 to 2021.
	[2]
(ii)	Using the income elasticity value (line 25), explain how a fall in income will affect the demand for oat milk.
	[2]
(c)	Using a diagram, explain how supermarkets may respond to the popularity of Veganuary.
	[4]

(d) (i)	Using the value of cross elasticity of demand (lines 20–21), explain the relationship between oat milk and dairy milk.
	[2]
(ii)	Explain how the change in demand for oat milk will affect the producer surplus of oat farmers.
	[4

(e)*	Evaluate, using an appropriate diagram(s), the effects on farmers of an increase in demand vegan products.	for [10]
