Paper 2 Structured Questions

**May/June 2021**

MARK SCHEME

Maximum Mark: 90

---

**Published**

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge International will not enter into discussions about these mark schemes.

Cambridge International is publishing the mark schemes for the May/June 2021 series for most Cambridge IGCSE™, Cambridge International A and AS Level components and some Cambridge O Level components.

---

This document consists of **23** printed pages.

**PUBLISHED****Generic Marking Principles**

These general marking principles must be applied by all examiners when marking candidate answers. They should be applied alongside the specific content of the mark scheme or generic level descriptors for a question. Each question paper and mark scheme will also comply with these marking principles.

**GENERIC MARKING PRINCIPLE 1:**

Marks must be awarded in line with:

- the specific content of the mark scheme or the generic level descriptors for the question
- the specific skills defined in the mark scheme or in the generic level descriptors for the question
- the standard of response required by a candidate as exemplified by the standardisation scripts.

**GENERIC MARKING PRINCIPLE 2:**

Marks awarded are always **whole marks** (not half marks, or other fractions).

**GENERIC MARKING PRINCIPLE 3:**

Marks must be awarded **positively**:

- marks are awarded for correct/valid answers, as defined in the mark scheme. However, credit is given for valid answers which go beyond the scope of the syllabus and mark scheme, referring to your Team Leader as appropriate
- marks are awarded when candidates clearly demonstrate what they know and can do
- marks are not deducted for errors
- marks are not deducted for omissions
- answers should only be judged on the quality of spelling, punctuation and grammar when these features are specifically assessed by the question as indicated by the mark scheme. The meaning, however, should be unambiguous.

**GENERIC MARKING PRINCIPLE 4:**

Rules must be applied consistently, e.g. in situations where candidates have not followed instructions or in the application of generic level descriptors.

**GENERIC MARKING PRINCIPLE 5:**

Marks should be awarded using the full range of marks defined in the mark scheme for the question (however; the use of the full mark range may be limited according to the quality of the candidate responses seen).

**GENERIC MARKING PRINCIPLE 6:**

Marks awarded are based solely on the requirements as defined in the mark scheme. Marks should not be awarded with grade thresholds or grade descriptors in mind.

**Social Science-Specific Marking Principles  
(for point-based marking)****1 Components using point-based marking:**

- Point marking is often used to reward knowledge, understanding and application of skills. We give credit where the candidate's answer shows relevant knowledge, understanding and application of skills in answering the question. We do not give credit where the answer shows confusion.

From this it follows that we:

- a** DO credit answers which are worded differently from the mark scheme if they clearly convey the same meaning (unless the mark scheme requires a specific term)
- b** DO credit alternative answers/examples which are not written in the mark scheme if they are correct
- c** DO credit answers where candidates give more than one correct answer in one prompt/numbered/scaffolded space where extended writing is required rather than list-type answers. For example, questions that require  $n$  reasons (e.g. State two reasons ...).
- d** DO NOT credit answers simply for using a 'key term' unless that is all that is required. (Check for evidence it is understood and not used wrongly.)
- e** DO NOT credit answers which are obviously self-contradicting or trying to cover all possibilities
- f** DO NOT give further credit for what is effectively repetition of a correct point already credited unless the language itself is being tested. This applies equally to 'mirror statements' (i.e. polluted/not polluted).
- g** DO NOT require spellings to be correct, unless this is part of the test. However spellings of syllabus terms must allow for clear and unambiguous separation from other syllabus terms with which they may be confused (e.g. Corrasion/Corrosion)

**2 Presentation of mark scheme:**

- Slashes (/) or the word 'or' separate alternative ways of making the same point.
- Semi colons (;) bullet points (•) or figures in brackets (1) separate different points.
- Content in the answer column in brackets is for examiner information/context to clarify the marking but is not required to earn the mark (except Accounting syllabuses where they indicate negative numbers).

**3 Calculation questions:**

- The mark scheme will show the steps in the most likely correct method(s), the mark for each step, the correct answer(s) and the mark for each answer
- If working/explanation is considered essential for full credit, this will be indicated in the question paper and in the mark scheme. In all other instances, the correct answer to a calculation should be given full credit, even if no supporting working is shown.
- Where the candidate uses a valid method which is not covered by the mark scheme, award equivalent marks for reaching equivalent stages.
- Where an answer makes use of a candidate's own incorrect figure from previous working, the 'own figure rule' applies: full marks will be given if a correct and complete method is used. Further guidance will be included in the mark scheme where necessary and any exceptions to this general principle will be noted.

**4 Annotation:**

- For point marking, ticks can be used to indicate correct answers and crosses can be used to indicate wrong answers. There is no direct relationship between ticks and marks. Ticks have no defined meaning for levels of response marking.
- For levels of response marking, the level awarded should be annotated on the script.
- Other annotations will be used by examiners as agreed during standardisation, and the meaning will be understood by all examiners who marked that paper.

Question	Answer	Marks	Guidance
1(a)	<p><b>Calculate Chile's agricultural output in 2017.</b></p> <p>\$11.76bn / \$11 760 000 000 / \$11 760m (1).</p>	1	<p>Accept \$11.8bn and \$12bn. \$ is not essential.</p>
1(b)	<p><b>Identify <u>two</u> disadvantages of a country specialising.</b></p> <p>Two from:</p> <ul style="list-style-type: none"> <li>• demand may fall / new competitors may appear</li> <li>• supply/output may fall / diseases / natural disasters / bad weather may affect agricultural output / costs may rise</li> <li>• non-renewable resources may run out</li> <li>• structural unemployment may occur</li> <li>• reliance on imports no longer produced by home country / overdependency on other countries</li> </ul>	2	<p>One mark each for each of two disadvantages. Rely on a small number of industries is not sufficient.</p>
1(c)	<p><b>Explain <u>one</u> reason why demand for cherries is price-elastic.</b></p> <p>A luxury product (1) they do not have to be purchased / not essential / not a necessity (1). Has close substitutes (1) example / rise in price will cause some people to switch to rival products (1).</p>	2	<p>In terms of close substitutes, also accept: fall in price will cause some people to switch towards this product and away from rival products.</p> <p><b>One mark for the reason identified and one mark for the explanation.</b></p> <p>A candidate who writes a luxury product and has close substitutes and no more has identified two reasons, so just one mark.</p> <p>If a candidate identifies one of the two reasons but does not explain it and then identifies the second reason and explains it, the second reason can be taken and with the explanation, 2 marks.</p>

Question	Answer	Marks	Guidance
1(d)	<p><b>Explain how Chile's population structure differs from Haiti's population structure.</b></p> <p>Logical explanation which might include: Chile has a higher proportion of its population aged over 65 / Haiti a lower proportion aged over 65 (1).</p> <p>Chile has a lower proportion of the population aged under 15 / Haiti has a higher proportion aged under 15 (1).</p> <p>Chile is likely to have a lower birth rate / Haiti is likely to have a higher birth rate (1).</p> <p>Chile likely to have a lower death rate / Haiti is likely to have a higher death rate (1).</p> <p>Chile's population pyramid indicates a relatively high level of development/high income country / Haiti's population pyramid indicates a relatively low level of development/low income country (1).</p> <p>Chile's population pyramid is less pyramid shaped / more stationary / constrictive / bulges out in the middle / more egg-shaped / Haiti's is more pyramid shaped / more expansive (1).</p> <p>Lower dependency ratio in Chile / higher dependency ratio in Haiti (1).</p> <p>Higher proportion of population of working age in Chile / lower proportion of population of working age in Haiti (1).</p> <p>Higher population size in Chile / lower population size in Haiti (1).</p>	4	<p>Accept for the first and second points other relevant age ranges e.g. over 60, under 10.</p> <p>Accept longer life expectancy for lower death rate and shorter life expectancy for higher death rate.</p> <p>Note that each country overall has more females than males, so not a difference.</p>

Question	Answer	Marks	Guidance
1(d)	Chile has a higher average age / older population / Haiti has a lower average age population / younger population (1).		
1(e)	<p><b>Analyse why China buys most of its cherries from Chile.</b></p> <p>Coherent analysis which might include:            Chile has high production standards (1) cherries are likely to be of a high quality (1).            China does not impose tariffs on Chilean cherries (1) may keep their price low (1).</p>	<b>4</b>	Free trade agreement on its own is not sufficient.
1(f)	<p><b>Analyse why Chilean astronomers are paid more than Chilean farm workers.</b></p> <p>Coherent analysis which might include:            Most astronomers have a university degree (1) high cost of training/ long period of training (1) well qualified / well educated / high level of knowledge (1) highly productive / highly skilled / efficient (1) in short supply (1) high demand (1) more inelastic demand (1) more inelastic supply (1).            Most work in the public sector (1) government may be more willing / able to pay higher wages (1) public sector workers are more likely to belong to a trade union (1) have stronger bargaining power (1).</p>	<b>5</b>	Also accept an approach based on an analysis of why Chilean farm workers are paid less than Chilean astronomers. This may include reference to immigrant farm workers who may be prepared to accept relatively low wages and Chilean farm workers being replaced by capital equipment / more replaceable than astronomers.

Question	Answer	Marks	Guidance										
1(g)	<p><b>Discuss whether or not Chilean consumers would benefit from more government intervention in the economy.</b></p> <p><b>Award up to 4 marks for why they might:</b></p> <ul style="list-style-type: none"> <li>• evidence of market failure (1)</li> <li>• merit goods may be underproduced (1) as under-consumed (1)</li> <li>• demerit goods may be overproduced (1) as overconsumed (1)</li> <li>• external costs could be reduced (1) external benefits may be increased (1) external costs / external benefits are not taken into account by the private sector (1)</li> <li>• public goods may not be produced (1) no profit incentive to make them (1) as there can be free riders (1)</li> <li>• inequality (1) poor consumers may lose out / there may be poverty (1) resources may not be devoted to producing what the poor need (1) may not be able to afford prices charged (1)</li> <li>• government subsidies (1) can lower prices (1)</li> <li>• government could set maximum prices (1) lower prices of necessities (1)</li> <li>• government could control (private sector) monopoly power (1) prevent abuse of market power (1)</li> <li>• government investment in education (1) could lower prices / raise quality of output (1).</li> </ul> <p><b>Award up to 4 marks for why they might not:</b></p> <ul style="list-style-type: none"> <li>• government failure may occur (1) e.g. government may lack information (1).</li> <li>• market forces can provide wide choice of products (1) may be consumer sovereignty (1)</li> </ul>	6	<p><b>Apply this example to all questions with the command word DISCUSS</b> <b>(1(g), 1(h), 2(d), 3(d), 4(d) and 5(d))</b></p> <p>Not taking lower taxes, lower subsidies or reduced immigration controls as a form of government intervention.</p> <p>Each point may be credited only once, on either side of an argument, but separate development as to how/why the outcome may differ is rewarded.</p> <table border="1" data-bbox="1205 587 2056 1050"> <thead> <tr> <th data-bbox="1205 587 1951 652">Generic example</th> <th data-bbox="1951 587 2056 652">mark</th> </tr> </thead> <tbody> <tr> <td data-bbox="1205 652 1951 716">Tax revenue may decrease ...</td> <td data-bbox="1951 652 2056 716">1</td> </tr> <tr> <td data-bbox="1205 716 1951 780">... because of reason e.g. incomes may be lower.</td> <td data-bbox="1951 716 2056 780">1</td> </tr> <tr> <td data-bbox="1205 780 1951 882">Tax revenue may increase because incomes may be higher i.e. reverse of a previous argument.</td> <td data-bbox="1951 780 2056 882">0</td> </tr> <tr> <td data-bbox="1205 882 1951 1050">Tax revenue may increase because of a different reason i.e. <u>not</u> the reverse of a previous argument e.g. government spending on subsidies may stimulate the economy more than spending on education.</td> <td data-bbox="1951 882 2056 1050">1</td> </tr> </tbody> </table>	Generic example	mark	Tax revenue may decrease ...	1	... because of reason e.g. incomes may be lower.	1	Tax revenue may increase because incomes may be higher i.e. reverse of a previous argument.	0	Tax revenue may increase because of a different reason i.e. <u>not</u> the reverse of a previous argument e.g. government spending on subsidies may stimulate the economy more than spending on education.	1
Generic example	mark												
Tax revenue may decrease ...	1												
... because of reason e.g. incomes may be lower.	1												
Tax revenue may increase because incomes may be higher i.e. reverse of a previous argument.	0												
Tax revenue may increase because of a different reason i.e. <u>not</u> the reverse of a previous argument e.g. government spending on subsidies may stimulate the economy more than spending on education.	1
