

Mark Scheme (RESULTS)

January 2023

Pearson Edexcel International GCSE
In Economics (4EC1)
Paper 02 Macroeconomics and the global
economy

Edexcel and BTEC Qualifications

Edexcel and BTEC qualifications are awarded by Pearson, the UK's largest awarding body. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information visit our qualifications websites at www.edexcel.com or www.btec.co.uk. Alternatively, you can get in touch with us using the details on our contact us page at www.edexcel.com/contactus.

Pearson: helping people progress, everywhere

Pearson aspires to be the world's leading learning company. Our aim is to help everyone progress in their lives through education. We believe in every kind of learning, for all kinds of people, wherever they are in the world. We've been involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for our commitment to high standards and raising achievement through innovation in education. Find out more about how we can help you and your students at: www.pearson.com/uk

General Marking Guidance

- All candidates must receive the same treatment. Examiners must mark the first candidate in exactly the same way as they mark the last.
- Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.
- Examiners should mark according to the mark scheme not according to their perception of where the grade boundaries may lie.
- There is no ceiling on achievement. All marks on the mark scheme should be used appropriately.
- All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.
- Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification may be limited.
- Crossed out work should be marked UNLESS the candidate has replaced it with an alternative response.

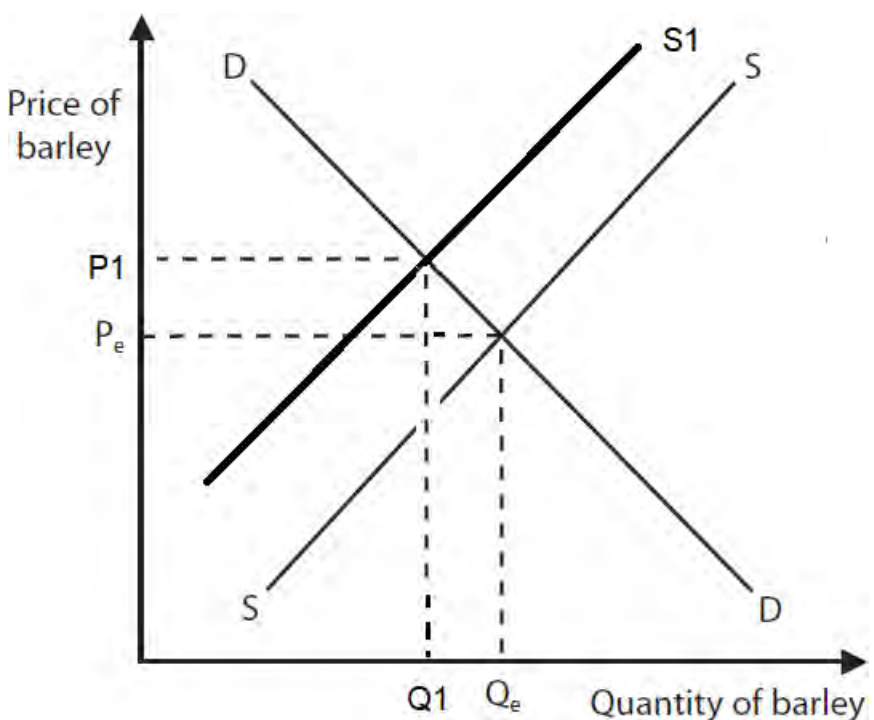

Question Number	Which one of the following is a role of the World Trade Organization (WTO)? Answer	Mark
1(a)	AO1 1 marks The only correct answer is: B Settling trade disputes A is not correct because it does not have the power to do this C is not correct because its role is to decrease trade barriers D is not correct because this would increase protectionism	(1)

Question Number	Which one of the following is an example of a supply-side policy to increase output? Answer	Mark
1(b)	AO1 1 mark The only correct answer is: C Increasing the school-leaving age A is not correct because it is a fiscal policy B is not correct because it is a monetary policy D is not correct because it would deter investment	(1)

Question Number	What is meant by the term economies of scale? Answer	Mark
1(c)	AO1 2 marks Award 1 mark for reference to falling average costs and 1 mark for reference to expansion Falling average costs (1) due to expansion of the firm (1) Accept any other appropriate response	(2)

Question Number	Describe one advantage of free trade for consumers. Answer	Mark
1(d)	<p style="text-align: center;">A01 2 marks</p> <p>Award 1 mark for reference to an advantage for consumers and 1 mark for development of an advantage for consumers</p> <p>An increase in choice (1) due to more foreign goods/services being imported into the country (1)</p> <p>Accept any other appropriate response</p>	(2)

Question Number	Calculate the net pay in £ for Sofia. You are advised to show your working. Answer	Mark
1(e)	<p style="text-align: center;">A02 2 marks</p> <p>Award 1 mark for showing the calculation $£22\,500 \times 20\% = £4\,500$ (1)</p> <p>Award 1 mark for the correct answer $£35\,000 - £4\,500 = £30\,500$ (1)</p> <p>Award 2 marks if the correct answer £30 500 is shown, with £ sign, even if no calculations are shown</p> <p>Award 1 mark if correct answer 30 500 is shown but with no £ sign, with or without calculations</p> <p>Do not award marks for the formula</p>	(2)

Question Number	Using the diagram below, draw the effects of the introduction of a tariff on the equilibrium price and quantity of Australian barley. Label the new curve, the new equilibrium price and new equilibrium quantity. Answer	Mark
1(f)	<p style="text-align: center;">AO2 3 marks</p> <p>Award 1 mark for leftward shift of supply, labelled Award 1 mark for higher equilibrium price, labelled Award 1 mark for lower equilibrium quantity, labelled</p>  <p>The diagram is a coordinate plane with 'Price of barley' on the vertical axis and 'Quantity of barley' on the horizontal axis. A downward-sloping demand curve is labeled 'D'. Two upward-sloping supply curves are shown: the original supply curve 'S' and a new supply curve 'S1' shifted to the left. The initial equilibrium is at the intersection of 'S' and 'D', with dashed lines leading to price P_e and quantity Q_e on the axes. The new equilibrium is at the intersection of 'S1' and 'D', with dashed lines leading to a higher price P_1 and a lower quantity Q_1 on the axes.</p>	(3)

Question Number	Explain one reason why some people in the tourism sector might suffer from seasonal unemployment in a country such as France. Answer	Mark
1(g)	<p style="text-align: center;">AO2 3 marks</p> <p>Award 1 mark for identifying a relevant reason Award 1 mark for developing the reason Award 1 mark for the response being in context</p> <ul style="list-style-type: none"> • One reason is that workers are only required for certain times of the year (1). Tourist attractions/holiday resorts will require more workers during the holiday season (1). Seasonal workers are no longer needed when the holiday season ends so are therefore seasonally unemployed (1) <p>Accept any other appropriate response</p>	(3)

Question Number	Analyse the benefits of a current account surplus for a country such as Australia. Indicative content	Mark
1(h)	<p style="text-align: center;">AO2 (3 marks)/AO3 (3 marks)</p> <p>AO2 and AO3</p> <ul style="list-style-type: none"> • A current account surplus means an economy is exporting a greater value of goods and services than it is importing • Australia's current account surplus was \$18.1bn in December 2020 • Australia's current account surplus benefits the country in terms of employment as higher export sales help to create jobs • This encourages economic growth and a higher GDP • This is likely to result in a higher standard of living for people living in Australia • Australia's current account surplus will mean that it will have surplus foreign exchange it can use to invest in other countries 	(6)

Level	Mark	Descriptor
	0	No rewardable material.
Level 1	1-2	<ul style="list-style-type: none"> • Demonstrates basic knowledge and understanding by developing relevant points. Limited application of economic terms, concepts, theories and calculations (AO2). • Information presented will lack selectivity and organisation. Interpretation of economic information will be limited, with a lack of analysis of issues (AO3).
Level 2	3-4	<ul style="list-style-type: none"> • Demonstrates partial knowledge and understanding by developing relevant points. Partial application of economic terms, concepts, theories and calculations (AO2). • Information presented will demonstrate some selectivity and organisation. Interpretation of economic information will be good, with some analysis of issues (AO3).
Level 3	5-6	<ul style="list-style-type: none"> • Demonstrates clear knowledge and understanding by developing relevant points. Appropriate application of economic terms, concepts, theories and calculations (AO2). • Information presented will demonstrate excellent selectivity and organisation. Interpretation of economic information will be excellent, with a thorough analysis of issues (AO3).

Question Number	Money earned from foreign tourists visiting Canada is shown in Canada's current account on the balance of payments as: Answer	Mark
2(a)	A01 1 mark The only correct answer is: C invisible exports A is not correct because this is trade in goods leaving the country B is not correct because this is trade in goods entering the country D is not correct because this is money leaving the country	(1)

Question Number	Which one of the following is likely to help protect the environment? Answer	Mark
2(b)	A01 1 mark The only correct answer is: A An increase in fines B is not correct because this will allow more pollution C is not correct because this will reduce control of pollution D is not correct because this will reduce protected areas of the environment	(1)

Question Number	State one possible disadvantage of economic growth. Answer	Mark
2(c)	A01 1 mark Award 1 mark for one correct disadvantage <ul style="list-style-type: none"> • Inflation • Damage to the environment • Using up unsustainable resources Accept any other appropriate response	(1)

Question Number	What is meant by the term privatisation? Answer	Mark
2(d)	<p style="text-align: center;">AO1 2 marks</p> <p>Award 1 mark for reference to selling a government controlled activity and 1 mark to private investors</p> <p>The act of selling a company/activity controlled by the government (1) to private investors (1)</p> <p>Accept any other appropriate response</p>	(2)

Question Number	Explain one possible reason why the Scottish Government wants to reduce poverty and inequality. Answer	Mark
2(e)	<p style="text-align: center;">AO2 3 marks</p> <p>Award 1 mark for identifying a relevant reason Award 1 mark for developing the reason Award 1 mark for the response being in context</p> <ul style="list-style-type: none"> • One reason is to meet basic needs (1). Many people do not have enough income for food and shelter (1). By investing £37.2m fewer low income households may suffer from poverty (1) • One reason is to raise standards of living (1). Low income households would be able to access more goods and services (1) resulting in fewer low income households suffering from relative poverty (1) <p>Accept any other appropriate response</p>	(3)

Question Number	Using the diagram below, draw and label the remaining three stages of the economic cycle in the boxes on the diagram. Answer	Mark
2(f)	<p style="text-align: center;">AO2 3 marks</p> <p>Award 1 mark for downturn, labelled Award 1 mark for recession, labelled Award 1 mark for recovery, labelled</p> <div style="text-align: center;"> </div>	(3)

Question Number	With reference to the data above and your knowledge of economics, assess the likely impact on the demand for US exports to Australia after the depreciation of the US dollar. Indicative content	Mark
2(g)	<p style="text-align: center;">AO2 (3 marks)/AO3 (3 marks)/AO4 (3 marks)</p> <p>AO2 and AO3</p> <ul style="list-style-type: none"> • A depreciation is where the value of currency falls relative to another currency • A depreciation of the US dollar against the Australian dollar may result in an increase in the amount of exports of goods between the US and Australia • This is because US exports are now cheaper to purchase as fewer Australian dollars are required to be exchanged for US dollars • This could result in more exports of machinery, vehicles, medical instruments and aircraft between the two countries • This could further improve the trade balance between the US and Australia if more exports are traded compared to imports <p>AO4</p> <ul style="list-style-type: none"> • However, a depreciation of the US dollar may not result in an overall increase in exports of goods between the US and Australia • The impact will depend on the size and duration of the depreciation • The impact will also depend on PED for US exports • The amount of goods traded between the two countries will not just depend on the exchange rate between the US and Australia • The quality of US exports is a factor in whether Australia will purchase more US made goods, not just the exchange rate 	(9)

Level	Mark	Descriptor
	0	No rewardable material.
Level 1	1-3	<ul style="list-style-type: none"> • Demonstrates basic knowledge and understanding by developing relevant points. Limited application of economic terms, concepts, theories and calculations (AO2). • Information presented will lack selectivity and organisation. Interpretation of economic information will be limited, with a lack of analysis of issues (AO3). • Only offers one viewpoint, meaning there is an unbalanced and incomplete evaluation, showing limited understanding and awareness (AO4).
Level 2	4-6	<ul style="list-style-type: none"> • Demonstrates partial knowledge and understanding by developing relevant points. Partial application of economic terms, concepts, theories and calculations (AO2). • Information presented will demonstrate some selectivity and organisation. Interpretation of economic information will be good, with some analysis of issues (AO3). • Offers more than one viewpoint but the argument may lack balance, leading to an evaluation that may not demonstrate full understanding and awareness (AO4).
Level 3	7-9	<ul style="list-style-type: none"> • Demonstrates clear knowledge and understanding by developing relevant points. Appropriate application of economic terms, concepts, theories and calculations (AO2). • Information presented will demonstrate excellent selectivity and organisation. Interpretation of economic information will be excellent, with a thorough analysis of issues (AO3). • Offers more than one viewpoint. The argument is well balanced and coherent, leading to an evaluation that demonstrates full understanding and awareness (AO4).

Question Number	What was the rate of inflation if the consumer price index (CPI) of a country rose from 120 to 150? Answer	Mark
3(a)	<p style="text-align: center;">AO2 1 mark</p> <p>The only correct answer is: A 25%</p> <p>B is not the correct answer because this is 150-120 C is not the correct answer because this is 150-100 D is not the correct answer because this is not the increase in the rate of inflation</p>	(1)

Question Number	Which one of the following is an impact of globalisation? Answer	Mark
3(b)	<p style="text-align: center;">AO1 1 mark</p> <p>The only correct answer is: B Closing of traditional industries</p> <p>A is not the correct answer because increased competition reduces prices C is not the correct answer because there should be greater choice D is not the correct answer because there should be reduced cost of communication</p>	(1)

Question Number	Explain one likely impact on UK tax revenue from rising unemployment rates. Answer	Mark
3(c)	<p style="text-align: center;">AO2 3 marks</p> <p>Award 1 mark for identifying a relevant impact Award 1 mark for developing the impact Award 1 mark for the response being in context</p> <ul style="list-style-type: none"> • One impact is that direct tax revenues may decrease (1). Unemployed workers will have to rely on benefits (1) this means they do not pay income tax resulting in less tax revenue (1) • One impact is that indirect tax revenues may decrease (1). With fewer people in employment, spending on goods/services may decrease (1) resulting in less tax for the UK Government (1) <p>Accept any other appropriate response</p>	(3)

Question Number	Analyse how business activity can damage the environment in a country such as Chile. Indicative content	Mark
3(d)	<p style="text-align: center;">AO2 (3 marks)/AO3 (3 marks)</p> <p>AO2 and AO3</p> <ul style="list-style-type: none"> • Mining for lithium can cause many different types of pollution • These may include visual, noise, air and water pollution from the operation of the mines • Mining requires large amounts of water to process the lithium • This could result in a reduction of water in lakes so there is less water available for humans, wildlife and agriculture • This can cause damage to the local area from using so much water • Mining can result in large holes being dug which creates a visual impact for people in Chile • Roads might have to be built to transport the lithium from the mines to market, creating additional noise and air pollution for the people of Chile 	(6)

Level	Mark	Descriptor
	0	No rewardable material.
Level 1	1-2	<ul style="list-style-type: none"> • Demonstrates basic knowledge and understanding by developing relevant points. Limited application of economic terms, concepts, theories and calculations (AO2). • Information presented will lack selectivity and organisation. Interpretation of economic information will be limited, with a lack of analysis of issues (AO3).
Level 2	3-4	<ul style="list-style-type: none"> • Demonstrates partial knowledge and understanding by developing relevant points. Partial application of economic terms, concepts, theories and calculations (AO2). • Information presented will demonstrate some selectivity and organisation. Interpretation of economic information will be good, with some analysis of issues (AO3).
Level 3	5-6	<ul style="list-style-type: none"> • Demonstrates clear knowledge and understanding by developing relevant points. Appropriate application of economic terms, concepts, theories and calculations (AO2). • Information presented will demonstrate excellent selectivity and organisation. Interpretation of economic information will be excellent, with a thorough analysis of issues (AO3).

Question Number	With reference to the data above and your knowledge of economics, assess the likely benefits of lowering taxes to reduce unemployment for a country such as Spain. Indicative content	Mark
3(e)	<p style="text-align: center;">AO2 (3 marks)/AO3 (3 marks)/AO4 (3 marks)</p> <p>AO2 and AO3</p> <ul style="list-style-type: none"> • Taxes can be either direct or indirect • Lowering direct taxes such as income tax results in workers keeping more of their income from paid employment • Workers can then spend more on goods and services increasing consumption in the Spanish economy particularly in sectors such as tourism and commerce • Lowering indirect taxes such as VAT results in the price of goods and services falling which can lead to an increase in demand • These measures result in firms raising output and having to employ more workers to meet the increase in consumption • These new workers in turn have more to spend creating the incentive for firms to hire more workers • Unemployment should therefore be reduced in the Spanish economy <p>AO4</p> <ul style="list-style-type: none"> • However, taxes are the main source of income for the Spanish Government so reducing taxes could result in a fiscal deficit if this policy is unsuccessful • If consumer confidence is low, cutting taxes may not increase consumer spending as people prefer to save instead • There is no guarantee that people will spend the tax cuts on Spanish produced goods and could purchase imported goods resulting in a negative impact on the current account • The tax cuts could be inflationary if demand outstrips supply • It will all depend on the type of unemployment Spain is suffering from. Tax cuts are likely to be ineffective if Spain has structural and seasonal unemployment • There are currently 4 million unemployed so the effectiveness of reducing taxes may depend upon a range of factors within the Spanish economy 	(9)

Appropriate application of economic terms, concepts, theories and calculations (AO2). • Information presented will demonstrate excellent selectivity and organisation. Interpretation of economic information will be excellent, with a thorough analysis of issues (AO3).

Question Number	With reference to the data above and your knowledge of economics, evaluate the effectiveness of monetary policy in increasing total output in a country such as Mexico. Indicative content	Mark
4(c)	<p style="text-align: center;">AO2 (4 marks)/AO3 (4 marks)/AO4 (4 marks)</p> <p>AO2 and AO3</p> <ul style="list-style-type: none"> • Monetary policy is the use of interest rates and money supply to affect the level of economic activity • Expansionary monetary policy aims to boost economic growth by lowering interest rates • Mexico's central bank has lowered interest rates from a high of 8.25% in July 2019 to 4.25% in September 2020 • This makes borrowing more attractive to firms and households as a lower rate of interest is charged on loans • Firms and consumers with existing or new loans and mortgages will also see a drop in interest payments and therefore will have more disposable income to spend • This may increase the demand for goods and services within the Mexican economy, thus helping to increase economic growth which has fallen by 9.3% <p>AO4</p> <ul style="list-style-type: none"> • However, not all economic growth is dependent upon interest rates • Other factors such as business and consumer confidence play a large role in the demand for goods and services • Often there is a time lag for a reduction in interest rates to feed through into the economy in terms of increased demand • Lower interest rates may increase demand for goods and services but can result in inflationary pressures • Mexico has seen inflation rates of 3.3% which could have been caused by the lowering of interest rates since July 2019 • The effectiveness may depend upon a range of factors within the Mexican economy • There are other ways to stimulate economic growth including fiscal and supply-side policies • Mexico should use a combination of policies rather than just focus on monetary policy to increase total output. 	(12)
