Wednesday 20 May 2020

Afternoon (Time: 2 hours 15 minutes)

Paper Reference **9GE0/01**

**Geography
Advanced
Paper 1**

You must have:

Resource Booklet (enclosed)
Ruler, calculator

Total Marks

Instructions

- Use **black** ink or ball-point pen.
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Answer **all** questions in Section **A** and Section **C**.
- Answer **either** Question 2 **or** Question 3 in Section **B**.
- Answer the questions in the spaces provided
– *there may be more space than you need*.
- Calculators may be used.
- Any **calculations** must show **all** stages of **working out** and a **clear answer**.

Information

- The total mark for this paper is 105.
- The marks for **each** question are shown in brackets
– *use this as a guide as to how much time to spend on each question*.

Advice

- Read each question carefully before you start to answer it.
- Check your answers if you have time at the end.

SECTION A: TECTONIC PROCESSES AND HAZARDS

Answer ALL questions in this section. Write your answers in the spaces provided.

You must use the Resource Booklet provided.

- 1** Study Figure 1 below.

This data in Figure 1 was collected to investigate whether there was a significant relationship between the percentage of silica and the percentage of volatile gases in lava samples, found at 12 contrasting volcanic locations.

Lava samples from 12 contrasting volcanic locations (n=12)	% of silica in the lava	Rank	% of volatile gases*	Rank	d	d^2
1	50	9	1.9	11	-2	4
2	70	3	5.2	3	0	0
3	58	8	3.7	7	1	1
4	73	1	6.6	1	0	0
5	63	6	4.0	6	0	0
6	62	7	3.3	8	-1	1
7	45	12	3.0	9	3	9
8	71	2	4.1	5	-3	9
9	49	10	2.5	10	0	0
10	69	4	5.3	2	2	4
11	48	11	1.2	12	-1	1
12	68	5	4.5	4	1	1
					$\Sigma d^2 =$	

Figure 1

The % of silica and volatile gases in a selection of different lava samples found at 12 contrasting volcanic locations

*Volatile gases – gases emitted by volcanoes at high temperature such as water vapour, carbon dioxide and sulphur dioxide.

DO NOT WRITE IN THIS AREA

DO NOT WRITE IN THIS AREA

- (a) (i) Complete Figure 1 by calculating $\sum d^2$.

(1)

- (ii) The formula for Spearman's rank correlation coefficient value r_s is given below; in this data set n is equal to 12.

$$r_s = 1 - \frac{6\sum d^2}{n^3 - n}$$

Calculate the value of r_s to two decimal places for the data given.

You must show your working.

(2)

$$r_s = \dots$$

- (iii) The tables below show the two hypotheses that are being tested and the critical values of Spearman's rank r_s value when $n = 12$.

Null hypothesis: There is no significant relationship between the % of silica and the % of volatile gases in these lava samples.

Alternative hypothesis: There is a significant relationship between the % of silica and the % of volatile gases in these lava samples.

Confidence level	0.10 (90% significance)	0.05 (95% significance)	0.01 (99% significance)
Critical value	0.50	0.59	0.78

Using the Spearman's rank correlation r_s value calculated in (a)(ii), state which hypothesis can be accepted.

TOTAL FOR SECTION A = 16 MARKS

SECTION B: LANDSCAPE SYSTEMS, PROCESSES AND CHANGE

Answer ONE question in this section – either Question 2 OR Question 3.

Indicate which question you are answering by marking a cross in the box . If you change your mind, put a line through the box and then indicate your new question with a cross .

If you answer Question 2 put a cross in the box .

Glaciated Landscapes and Change

You must use the Resource Booklet provided.

2 Study Figure 2a in the Resource Booklet.

- (a) Explain the role of Milankovitch cycles in causing variations in the relative global ice volume.

(Total for Question 2 = 40 marks)

Do not answer Question 3 if you have answered Question 2.

Indicate which question you are answering by marking a cross in the box . If you change your mind, put a line through the box and then indicate your new question with a cross .

If you answer Question 3 put a cross in the box .

Coastal Landscapes and Change

You must use the Resource Booklet provided.

- ### **3 Study Figure 3a in the Resource Booklet.**

- (a) Explain the role of isostatic processes in causing changes in relative sea level.

(6)

Study Figure 3b in the Resource Booklet.

- (b) Explain the role of sediment transport in the development of this coastal landscape.
