INSTRUCTIONS TO CANDIDATES

Use black ink or black ball-point pen. Do not use gel pen or correction fluid.

You may use a pencil for graphs and diagrams only.

Write your name, centre number and candidate number in the spaces at the top of this page.

Answer **all** questions.

Write your answers in the spaces provided in this booklet. If you run out of space, use the additional page(s) at the back of the booklet, taking care to number the question(s) correctly.

INFORMATION FOR CANDIDATES

The number of marks is given in brackets [] at the end of each question or part-question; you are advised to divide your time accordingly.

This paper requires that you make as full use as possible of appropriate examples and reference to data to support your answers. Sketch maps and diagrams should be included where relevant.

A plain page is available at the end of each section for you to add any relevant sketch maps and diagrams you may wish to include. The question number(s) should be clearly shown.

Section B: Fieldwork in Physical and Human Geography

Answer **all** questions.

In your answers to Section B you should include evidence from **your** fieldwork investigations in **physical** geography and **human** geography.

A group of AS level Geography students set out to investigate issues surrounding rural change and inequality in rural Northumberland. They wanted to investigate access to healthcare services. The students conducted 36 questionnaires as part of their data collection method.

Figure 4: Extract from students' questionnaire

Q: What was your household's **main** use of healthcare services in the previous 12 months?
Please select **one** answer (only).

- | | |
|---|--------------------------|
| Hospital visits relating to a significant illness (for example, diabetes, cancer) | <input type="checkbox"/> |
| 'Alternative' healthcare providers (for example, acupuncturist, chiropractor) | <input type="checkbox"/> |
| GP appointments | <input type="checkbox"/> |
| Routine appointments (for example, dental/eye checks/physiotherapy) | <input type="checkbox"/> |

The students completed a Chi-square test to analyse their results.

Hypothesis: there is an association between household uptake of healthcare services and main use of healthcare services.

Null hypothesis: there is no significant association between household uptake of healthcare services and main use of healthcare services.

Figure 5: Chi-square data table

	observed	expected	(o-e)	(o-e) ²	(o-e) ² /e
Hospital visits relating to a significant illness	3	9	-6	36	4
'Alternative' healthcare providers	6	9	-3	9	1
GP appointments	16	9
Routine appointments	11	9	2	4	0.44
Total	36	36	n/a	n/a	10.88

Examiner only

3. (a) (i) Calculate the missing values for the 'GP appointments' category and insert them into **Figure 5** giving your answers to **two** decimal places where appropriate. [3]

(ii) Use **Figure 6** to interpret the result of the Chi-square test. [2]

.....

.....

.....

.....

Figure 6: Critical values of Chi-square test

Significance (confidence level)		
Degrees of freedom	95% (0.05)	99% (0.01)
3	7.82	11.34
4	9.49	13.28
5	11.07	15.09

(iii) Explain why you would **either** accept **or** reject the null hypothesis. [2]

.....

.....

.....

.....

(iv) Identify an appropriate graphical technique to display the observed data shown in **Figure 5**. [1]

.....

.....

(v) Justify your choice of graphical technique in 3(a)(iv). [2]

.....

.....

.....

.....

Examiner
only

The students sampled a mother-and-toddler group and a pensioners' lunch club for their questionnaire survey.

(b) Suggest what impact this sampling strategy might have on the questionnaire results. [5]
