INSTRUCTIONS TO CANDIDATES

Use black ink or black ball-point pen. Do not use gel pen. Do not use correction fluid.

Write your name, centre number and candidate number in the spaces at the top of this page.

Write your answers in the spaces provided in this booklet.

In Section A, answer **either** questions 1 and 2 **or** questions 3 and 4.

Answer **all** questions in Section B.

If further space is required you should use the additional page(s) at the back of this booklet. The question number(s) should be clearly shown.

INFORMATION FOR CANDIDATES

The number of marks is given in brackets [ ] at the end of each question or part-question; you are advised to divide your time accordingly.

This paper requires that you make as full use as possible of appropriate examples and reference to data to support your answers. Sketch maps and diagrams should be included where relevant.

A plain page is available near the back of the booklet for you to add any relevant sketch maps and diagrams you may wish to include. The question number(s) should be clearly shown.

MAY192110U10101

Section A: Changing Landscapes

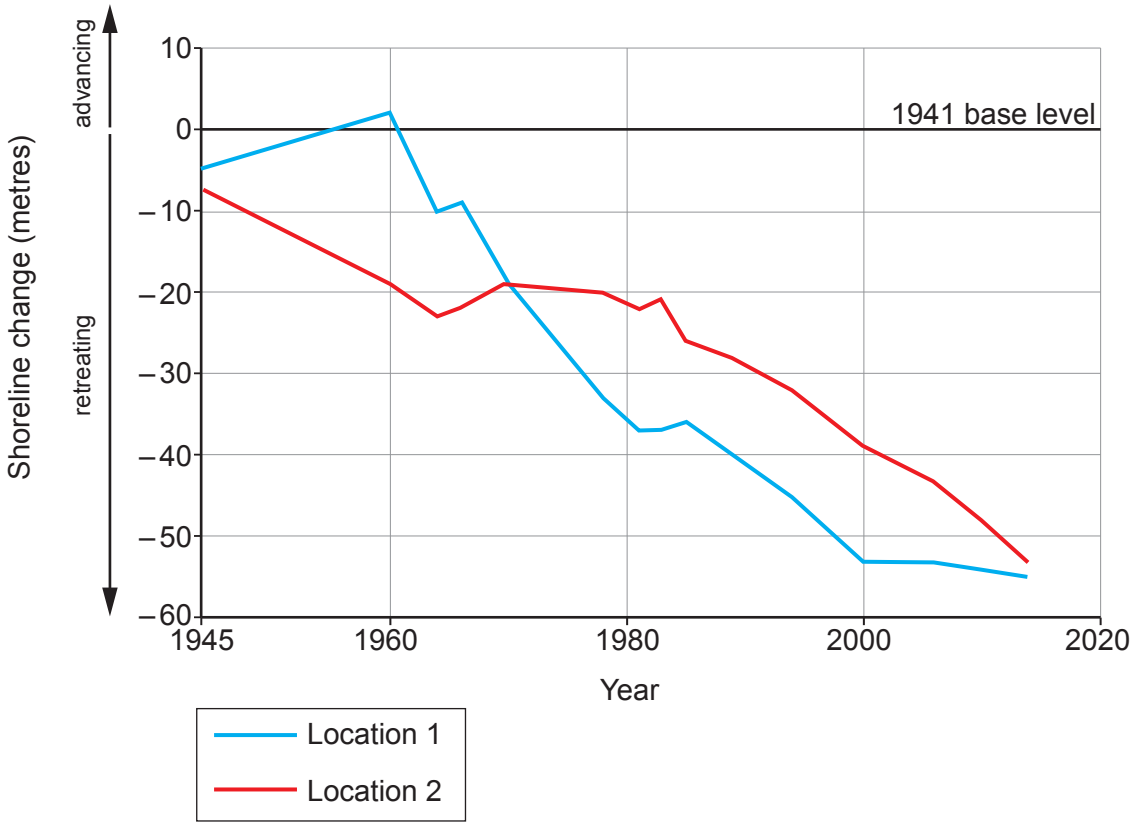
Answer **either** *questions 1 and 2* **or** *questions 3 and 4 from your chosen landscape.*

Make the fullest possible use of examples and data to support your answers.

Coastal Landscapes

Answer questions 1 and 2 if this is your chosen landscape.

Figure 1: Shoreline change on South Beach, Tenby 1945-2014



Source: www.mdpi.com

Examiner only

1. *(a)* (i) Use **Figure 1** to compare the shoreline changes shown at Location 1 and Location 2. [5]

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

(ii) Suggest how wave type could explain the overall change from 1945-2014. [3]

.....

.....

.....

.....

.....

.....

2110U101
03

Examiner only

(b) Examine the role of coastal transport processes in the formation of **one** landform of coastal deposition. [8]

Additional space for Question **1***(b)* only:

Examiner only

Figure 2: Links between time, space and process in the Louisiana coastal marshes, USA

Time scale	Minutes	Days	Years	Centuries/Millennia
Spatial scale	MICRO	← MESO →		MACRO
Processes	Waves	Storms	Flood cycles	Sea level change
	← Currents →			
		← Wind →		
	Localised sediment movements	Erosion and deposition across whole marsh		Shoreline advance and retreat

Source: https://pubs.usgs.gov

2. *(a)* (i) Use **Figure 2** to describe the links between time, space and process. [5]

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

(ii) Explain why changes in sea level take place over millennia. [3]

.....

.....

.....

.....

.....

.....

Examiner only

(b) Examine the importance of geology in the formation of **one** landform of coastal erosion. [8]

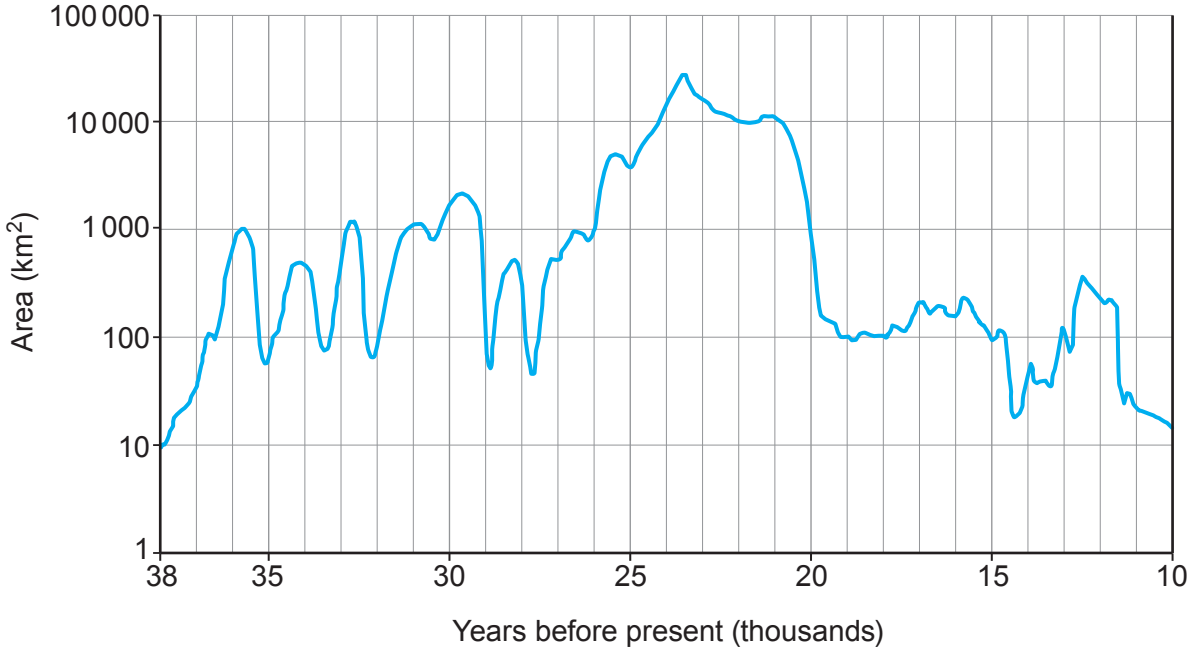
Additional space for Question **2***(b)* only:

Examiner only

Glaciated Landscapes

Answer questions 3 and 4 if this is your chosen landscape.

Figure 3: Variations in the area of the last Welsh Ice Cap



Source: www.researchgate.net

3. *(a)* (i) Use **Figure 3** to describe variations in the area covered by the last Welsh Ice Cap. [5]

Examiner only

(ii) Explain why there are periodic increases in the area covered by the last Welsh Ice Cap. [3]

.....

.....

.....

.....

.....

.....

(b) Examine the importance of plucking and abrasion in the formation of **one** macro-scale landform of glacial erosion. [8]

.....

.....

.....

.....

.....

.....

Figure 6d: Issues of aid in the Ecuador earthquake 2016

Earthquake survivors in Ecuador struggle without food and basic aid

A woman argues with police as tensions rise among people waiting for more than an hour for free food and water from the government.

The response of the government of Ecuador was swift and more than 25,000 survivors have been sheltered in stadiums and airports. However, shattered roads and infrastructure have limited the distribution of aid to many of the most vulnerable people in remote areas.

	Population 0-14 years of age (%)	Literacy rate (%)
Pedernales	41	82
Average for Ecuador	**28**	**95**

The region of Pedernales was amongst the worst hit.

Examiner only

(c) Use **Figures 6a, 6b** and **6d** to suggest why it was difficult to respond to this earthquake. [10]

Additional space for Question **6***(c)* only:

Examiner only

7. *(a)* Explain why there are differences in the characteristics of shield and cinder volcanoes. [8]

Additional space for Question **7***(a)* only:

Examiner only

(b) Explain variations in the impacts of **one** volcanic eruption. [10]

Additional space for Question **7***(b)* only:
