**Mark scheme**

June 2019

---

Version: 1.0 Final

Mark schemes are prepared by the Lead Assessment Writer and considered, together with the relevant questions, by a panel of subject teachers. This mark scheme includes any amendments made at the standardisation events which all associates participate in and is the scheme which was used by them in this examination. The standardisation process ensures that the mark scheme covers the students' responses to questions and that every associate understands and applies it in the same correct way. As preparation for standardisation each associate analyses a number of students' scripts. Alternative answers not already covered by the mark scheme are discussed and legislated for. If, after the standardisation process, associates encounter unusual answers which have not been raised they are required to refer these to the Lead Examiner.

It must be stressed that a mark scheme is a working document, in many cases further developed and expanded on the basis of students' reactions to a particular paper. Assumptions about future mark schemes on the basis of one year's document should be avoided; whilst the guiding principles of assessment remain constant, details will change, depending on the content of a particular examination paper.

Further copies of this mark scheme are available from [aqa.org.uk](http://aqa.org.uk)

## Point marked questions marking instructions

The mark scheme will state the correct answer or a range of possible answers, although these may not be exhaustive. It may indicate how a second mark is awarded for a second point or developed idea. It may give an indication of unacceptable answers. Each mark should be shown by placing a tick where credit is given. The number of ticks must equal the mark awarded. Do not use crosses to indicate answers that are incorrect.

## Level of response marking instructions

Level of response mark schemes are broken down into levels, each of which has a descriptor. The descriptor is linked to the assessment objective(s) being addressed. The descriptor for the level shows the average performance for the level.

Before you apply the mark scheme to a student's answer read through the answer and annotate it (as instructed) to show the qualities that are being looked for. You can then apply the mark scheme. You should read the whole answer before awarding marks on levels response questions.

### Step 1 Determine a level

Descriptors for the level indicate the different qualities that might be seen in the student's answer for that level. When assigning a level you should look at the overall quality of the answer and not look to pick holes in small and specific parts of the answer where the student has not performed quite as well as the rest. If the answer covers different aspects of different levels of the mark scheme you should use a best fit approach for defining the level and then use the variability of the response to help decide the mark within the level, ie if the response is predominantly Level 2 with a small amount of Level 3 material it would be placed in Level 2 but be awarded a mark near the top of the level because of the Level 3 content. For instance, in a 9 mark question with three levels of response, an answer may demonstrate thorough knowledge and understanding (AO1 and AO2) but fail to respond to command words such as assess or evaluate (AO3). The script could still access Level 2 marks. Note that the mark scheme is not progressive in the sense that students don't have to fulfil all the requirements of Level 1 in order to access Level 2.

### Step 2 Determine a mark

Once you have assigned a level you need to decide on the mark. The descriptors on how to allocate marks can help with this. The exemplar materials used during standardisation will also help. There will generally be an answer in the standardising materials which will correspond with each level of the mark scheme. This answer will have been awarded a mark by the Lead Examiner. You can compare the student's answer with the example to determine if it is the same standard, better or worse than the example. You can then use this to allocate a mark for the answer based on the Lead Examiner's mark on the example.

You may well need to read back through the answer as you apply the mark scheme to clarify points and assure yourself that the level and the mark are appropriate.

Indicative content in the mark scheme is provided as a guide for examiners. It is not intended to be exhaustive and you must credit other valid points. Students do not have to cover all of the points mentioned in the indicative content to reach the highest level of the mark scheme.

An answer which contains nothing of relevance to the question must be awarded no marks.

## Assessment of spelling, punctuation, grammar and use of specialist terminology (SPaG)

Accuracy of spelling, punctuation, grammar and the use of specialist terminology will be assessed via the indicated 9 mark questions. In each of these questions, three marks are allocated for SPaG as follows:

- **High performance** – 3 marks
- **Intermediate performance** – 2 marks
- **Threshold performance** – 1 mark

## General guidance

- Mark schemes should be applied positively. Examiners should look for qualities to reward rather than faults to penalise. They are looking to find credit in each response they mark. Unless the mark scheme specifically states, candidates must never lose marks for incorrect answers.
- The full range of marks should be used. Examiners should always award full marks if deserved, ie if the answer matches the mark scheme.
- When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the team leader must be consulted.
- Crossed out work should be marked unless the candidate has replaced it with an alternative response.
- Do NOT add ticks to level-marked questions – use the highlight tool/brackets to signify what is relevant.
- Sometimes there are specific “triggers” in the mark scheme that enable higher level marks to be awarded. For instance, an example or case study may be required for Level 3 if it is stated within the question.
- Where a source, such as a photograph or map, is provided as a stimulus it should be used if requested in the question, but credit can often be given for inferred as well as direct use of the source.
- Always be consistent – accept the guidelines given in the mark scheme and apply them to every script.
- If necessary make comments to support the level awarded and to help clarify a decision you have made.
- Examiners should revisit standardised script answers as they apply the mark scheme in order to confirm that the level and the mark allocated is appropriate to the response provided.
- Mark all answers written on the examination paper.

## Description of annotations

<b>Annotation</b>	<b>Meaning/Use</b>
?	Unclear
[	Left square bracket
]	Right square bracket
^	Omission mark
AO1	Assessment Objective 1
AO2	Assessment Objective 2
AO3	Assessment Objective 3
L1	Level 1
L2	Level 2
L3	Level 3
DP	Developed point
DEV	Development
EG	Example / reference
EVAL	Evaluation
HLINE	Horizontal Line
JUST	Level or point just awarded
MAX	Max
Vertical Wavy Line	Not relevant
NC	Nothing Creditworthy
NAQ	Not answered the question
REP	Repeat
SEEN	Reviewed but no marks awarded
Tick	Correct point
TV	Too vague
Highlight	Highlight Box
On Page comment	On Page Comment
Off Page Comment	Off page Comment

**Section A**

Qu	Pt	Marking Guidance	Total marks
01	1	<p><b>Use the following data to complete Figure 1.</b></p> <p>One mark for correct completion of each element of the bar, with some shading of lower section.</p> <p>They should be 'stacked', not superimposed or adjacent, in the same order as the other bars,</p> <p>Width can be ignored.</p> <p>AO4 = 2 marks</p>	2
01	2	<p><b>Outline one reason why rates of natural increase are high in many cities in LIC/NEEs.</b></p> <p>The question focuses on natural increase, it should be clear the candidate is referring to this and not migration.</p> <p>One mark for an initial overall comment or single relevant statement eg:</p> <ul style="list-style-type: none"> <li>• there is better healthcare (1)</li> <li>• the population is younger (1)</li> <li>• the birth rate is higher in cities than rural areas (1)</li> </ul> <p>Second mark for <b>developing</b> the comment eg:</p> <ul style="list-style-type: none"> <li>• there is better healthcare (1) so more children survive and the population grows (d)(1)/reducing the death rate in relation to the birth rate and leading to natural increase (d)(1)</li> <li>• the population is younger (1) so they are more likely to have children and increase the population (d)(1)</li> <li>• the birth rate is higher in cities than rural areas (1) because of the relatively youthful population (d)(1).</li> </ul> <p>No credit for definition of natural increase. Allow 1 mark for generic comment on population increase re LIC/NEE population increase</p> <p>AO1 = 2 marks</p>	2
01	3	<p><b>Give one way in which a major city in a LIC/NEE is internationally important.</b></p> <p>Credit any reasonable statement in relation to the named city. Eg:</p> <ul style="list-style-type: none"> <li>• Lagos – the main financial centre for West Africa</li> </ul>	1

		<ul style="list-style-type: none"><li>• Mumbai – the home of ‘Bollywood’, the Indian film industry.</li></ul> <p>No credit for HIC city.</p> <p>AO1 = 1 marks</p>	
--	--	---	--

01	4	<p><b>Explain how urban industrial areas can help encourage development. Use Figure 2 and your own understanding.</b></p> <table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="text-align: center;">Level</th> <th style="text-align: center;">Marks</th> <th style="text-align: center;">Description</th> </tr> </thead> <tbody> <tr> <td style="text-align: center;">3 (Detailed)</td> <td style="text-align: center;">5–6</td> <td>AO2 – Shows detailed understanding of the relationship between industrial growth and/or establishing industrial areas and development. ## Section B

Qu	Pt	Marking Guidance	Total marks
02	1	<p><b>Plot the following data on to Figure 5.</b></p> <p>One mark for the correct alignment of each value in the plot. Germany does not have to be named</p> <p>AO4 = 1 mark</p>	1
02	2	<p><b>Draw a best fit line on Figure 5.</b></p> <p>Line should be straight, approximately in the centre of the scatter and inclined top left to bottom right.</p> <p>AO4 = 1 mark</p>	1
02	3	<p><b>‘Japan is in stage 5 of the Demographic Transition Model (DTM) and is a highly developed country.’</b> <b>Explain this statement.</b> <b>Use Figure 5 and your own understanding.</b></p> <p>Candidates should make reference to <b>Figure 5</b> through using country name(s) and/or data provided. They should show that they can apply knowledge and understanding in analysing Japan’s position on the graph. Expect recognition of Japan’s place in a negative correlation showing that with a high level of wealth the birth rate has fallen very low. The connection should be made with the DTM such that it marks a general progression of population structure associated with corresponding economic changes.</p> <p><b>Figure 5</b> shows a negative correlation between GNI and birth rate. (1) The birth rate falls as the DTM progresses, which generally happens alongside economic growth, shown here by Japan’s high GNI/low BR. (1) As people become wealthier they realise they don’t need to have so many children (1) As countries’ GNI grows they can invest in health care which means lower infant mortality so fewer children need to be born in an effort to make sure some survive. (1) As the birth rate begins to fall more money will become available in households and more widely in the economy for investment which will increase GNI (1). At stage 5 will be Japan with very low birth rate and high wealth (1).</p> <p>Max 1 mark if no reference to Fig 5, at least implicitly. Reserve 3<sup>rd</sup> mark for the link between DTM and development.</p> <p>AO3 = 3 marks</p>	3
02	4	<p><b>Outline how one historical factor can lead to uneven development.</b></p> <p>Candidates should clarify the factor and its resultant impact upon development. There is no requirement for an example though it may aid clarity and development.</p>	2

		<p>Specification states this in the context of LIC/NEE but question does not, therefore allow valid positive points re HICs.</p> <p>One mark for a basic statement, eg:</p> <ul style="list-style-type: none"> <li>• countries used to be colonies (1)</li> <li>• past wars left the country worse off (1).</li> </ul> <p>Two marks for a <b>developed</b> idea, eg:</p> <ul style="list-style-type: none"> <li>• many African countries were European colonies (1) this meant their resources were exploited for European gain and hindered their independent development (d) (1)</li> <li>• past civil wars such as Mozambique 1977-1992 (1) left much of the infrastructure damaged and therefore hampered development (d) (1).</li> </ul> <p>No credit for factors other than historic ones.</p> <p>AO1 = 2 marks</p>	
--	--	---	--

Qu	Pt	Marking Guidance	Total marks
06	1	<p><b>Complete Figure 14 using the following data.</b></p> <p>One mark for each correctly drawn bar (width can be ignored).</p> <p>Bars need not be shaded.</p> <p>AO4 = 2 marks</p>	2
06	2	<p><b>Calculate the difference between the 2018 percentage from renewables and the 2035 target.</b></p> <p>One mark for the correct figure:</p> <p>31% percentage not required</p> <p>AO4 = 1 mark</p>	1
06	3	<p><b>State two alternatives to large solar farms suggested in Figure 15.</b></p> <p>Solar panels on roof tops, expand renewables on the mainland, upgrade undersea cables.</p> <p>AO4 = 2 marks</p>	2
06	4	<p><b>Suggest how energy supply issues can lead to conflict.</b></p> <p>Candidates should show that they understand the link between understanding of energy (in)security and conflict.</p> <p>Credit any reasonable impacts which do not have to come from <b>Figure 15</b> e.g. There is dispute about the best strategy for supplying energy (1) this can be because people in existing industries see their jobs at risk (1). Energy costs may increase (1) which can cause conflict between those who can afford it and those who can't (1). There may be independence issues as parts of a country look to leave the mainland (1) because they see that they can secure their energy supply by leaving and not having to 'share'</p> <p>AO2 = 3 marks</p>	3

06	5	<p><b>‘Extraction of fossil fuels can bring both advantages and disadvantages.’</b>  <b>Explain this statement using an example you have studied.</b></p> <table border="1"> <thead> <tr> <th style="text-align: center;">Level</th> <th style="text-align: center;">Marks</th> <th style="text-align: center;">Description</th> </tr> </thead> <tbody> <tr> <td style="text-align: center;">3 (Detailed)</td> <td style="text-align: center;">5–6</td> <td>AO1 – Demonstrates detailed knowledge of the advantages and disadvantages of fossil fuel extraction.
