CAMBRIDGE INTERNATIONAL EXAMINATIONS

International General Certificate of Secondary Education

MARK SCHEME for the May/June 2013 series

0460 GEOGRAPHY

0460/22

Paper 2, maximum raw mark 60

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2013 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

| Page 2 | Mark Scheme | Syllabus | Paper |
|--------|-----------------------|----------|-------|
| | IGCSE – May/June 2013 | 0460 | 22 |

1 (a) (i) 10m [1]

(ii) 1 km^2 [1] more than one answer = 0

(b) (i) A/Main A/A3 [1]

(ii) embankment [1]

(iii) cultivation/plantation [1]

(iv) marsh/swamp [1]

(v) water tank [1]

(vi) bridge [1]

(vii) district (boundary) [1] more than one answer = 0

(c)

| | Pte Moyenne (8495) | La Mecque (8694) | Both these areas | Neither of these areas |
|------------------------|--------------------------|---------------------|------------------|------------------------|
| coral | ✓ | | | |
| a river or watercourse | | | ✓ | |
| a populated area | | ✓ | | |
| forest | | | | ✓ |
| gentle slopes | | | ✓ | |

more than one tick per row = 0

(d) hilly/hill/high/mountain/upland (don't extract from place name)

steep

cliffs (steep cliffs = 1)

any height between 400m and 630m (allow 446m as highest point)

ridge/spur

col/saddle/pass

concave slope

V-shaped valley

flatter/gentle in south/in 8991/9091/9191/at poultry farm/at sugar plantation

(As alternative to this line allow "steeper in the north".)

[3]

(e) (i) 2500 – 2650 (metres) [1]

(ii) N/NNE/NE [1]

[1]

| | IGCSE – May/June 2013 | 0460 | 22 |

3 (a) Erosion: waterfall

notch/V cut by stream/path cut by stream (allow other expressions)

plunge pool undercut

stepped profile (allow terraced)

valley at top of photo

exposed rocks/lack of soil/lack of vegetation

Weathering: harder layers stand out/bedding planes opened/cracks wide(ened)

vegetation growing in cracks/in rocks/on cliff (not just on rocks)/

vegetation shows biological/chemical weathering

fallen/disturbed/loose blocks/boulders/rocks/stones/slabs/layers

reserve one mark for each section no transfer between sections

[4]

(b) (i) boulders/large rocks/large stones

different sizes/large and small

rounded/smooth

red/orange/colour variation/coloured altered (but not black)

joints/cracks

layers peel/onion skin effect

don't allow points clearly linked to erosion

[3]

(iii) exfoliation

Laki:

(b)

freeze-thaw/frost shattering

any chemical process spoils the answer

[1]

- 4 (a) (i) there are active volcanoes in Africa, Asia, Europe, North America and South America [1]
 - (ii) there are active volcanoes close to most coastlines of the Pacific Ocean

[1]

[1]

(iii) most active volcanoes are close to plate boundaries

plates diverge/constructive margin

hotspot/hot area within mantle

melting/rising magma/magma escapes

All others: plates converge/destructive margin

subduction (allow if it is the wrong plate) melting/rising magma/magma escapes

If volcano chosen not from Fig. 6 MAX 1 – don't allow the first point

[2]
