

Please check the examination details below before entering your candidate information

Candidate surname					Other names				
Centre Number					Candidate Number				
Pearson Level 1/Level 2 GCSE (9–1)									
Wednesday 5 June 2024									
Morning (Time: 1 hour 30 minutes)					Paper reference		1GB0/02		
Geography B PAPER 2: UK Geographical Issues									
You must have: Calculator								Total Marks	

Instructions

- Use **black** ink or ball-point pen.
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Answer **ALL** questions in Sections A and B.
- In Section C1 answer **either** Question 8 **or** Question 9.
- In Section C2 answer **either** Question 10 **or** Question 11.
- Answer the questions in the spaces provided
– *there may be more space than you need.*
- You must **show all your working out** with **your answer clearly identified** at the **end of your solution**.

Information

- The total mark for this paper is 94.
- The marks for **each** question are shown in brackets
– *use this as a guide as to how much time to spend on each question.*
- The marks available for spelling, punctuation, grammar are clearly indicated.

Advice

- Read each question carefully before you start to answer it.
- Check your answers if you have time at the end.

SECTION A

The UK's Evolving Physical Landscape

Answer ALL questions. Write your answers in the spaces provided.

Some questions must be answered with a cross in a box ☒. If you change your mind about an answer, put a line through the box ☒ and then mark your new answer with a cross ☒.

- 1 (a) Identify which **one** of the following countries of the UK has the highest mountains.

(1)

- ☐ **A** England
- ☐ **B** Northern Ireland
- ☐ **C** Scotland
- ☐ **D** Wales

- (b) Explain **one** reason why precipitation is higher in the western regions of the UK.

(2)

.....

.....

.....

.....

- (c) Explain **one** way in which tectonic processes have affected the physical landscape of the UK.

(2)

Coastal Change and Conflict

- 2 (a) Study Figure 1 which shows a part of the coastline at Trimingham in Norfolk, England.

Figure 1

- (i) Identify which method of hard engineering is being used at Trimingham.

(1)

- ☐ A groynes
- ☐ B beach replenishment
- ☐ C slope stabilisation
- ☐ D managed retreat

- (ii) Trimingham is a village situated on a coastline that is being eroded rapidly, threatening its economy.

Explain how hard engineering has been used to protect this coastal landscape and community.

(3)

.....

.....

.....

.....

.....

.....

(b) Explain **two** reasons why coastal erosion is faster in some parts of the UK than in others.

Investigating a UK Geographical Issue

- 4 Analyse Figure 2. The map shows the 2022 summer temperatures when compared to the long-term summer average. The bullet points give information about summer rainfall in the UK for 2022.

- June rainfall was 24% below the long-term average. Southern and eastern areas of the UK were the driest regions.
- July rainfall was 44% below the long-term average but the north-west of Scotland was slightly wetter than average.
- August rainfall was 46% below the long-term average. Southern and eastern areas were again the driest regions.

SECTION B

The UK's Evolving Human Landscape

Answer ALL questions. Write your answers in the spaces provided.

Some questions must be answered with a cross in a box ☐. If you change your mind about an answer, put a line through the box ☒ and then mark your new answer with a cross ☐.

- 5 (a) Study Figure 3 which shows the amount of Foreign Direct Investment (FDI) in £ billion into regions of the UK for 2015 and 2019.

Region	FDI £ billion in 2015	FDI £ billion in 2019
London	416	661
South East England	119	197
Scotland	78	85
East of England	52	80
North West England	70	74
All other regions	289	460
TOTAL FDI	1,024	1,557

Figure 3

- (i) Identify the region with the smallest increase in FDI between 2015 and 2019.

(1)

- (ii) Calculate the percentage (%) increase in the FDI into the London region

Answer to **one** decimal place.

You **must** show your working in the space below.

(2)

Answer%

(iii) Compare the importance of London in attracting FDI, with the rest of the UK.

(3)

(iv) Explain **one** reason for the regional variations in FDI in 2019.

Dynamic UK Cities

- 6 (a) Study Figure 4 which shows how people travelled to work in a UK city in 2011 and 2021.

Figure 4

- (i) Identify which **one** of the following methods of travel was twice as popular in 2021 than it was in 2011.

(1)

- ☐ A bus
- ☐ B train
- ☐ C walking
- ☐ D cycling

- (ii) Suggest **one** reason why the % of people travelling to work by car has declined.

Investigating a UK Geographical Issue

In this question, up to four additional marks will be for your spelling, punctuation and grammar and for your use of specialist terminology.

- 7 Analyse the information in Figure 5 which shows the population of England's 10 largest cities in 2021 and their population growth since 2011.

City	Population in 2021 (to nearest 100)	Percentage (%) growth in population since 2011
London	10,076,300	7.8
Birmingham	2,574,300	6.4
Manchester	2,538,600	7.4
Newcastle	853,100	2.9
Sheffield	822,300	1.5
Leeds	812,000	8.1
Bristol	762,800	10.4
Nottingham	664,800	3.7
Liverpool	640,600	4.6
Bradford	564,400	4.6

- The population of England as a whole grew 6.5% to an estimated 56,536,000, the highest rate of the four countries of the UK.
- The fastest growing cities were medium sized cities e.g. Cambridge grew by 17.6%.
- Growth was frequently in the inner city, within a kilometre of the city centre, many of which had been regenerated.

Figure 5

Assess the reasons why population growth varies both within cities and between them.

You **must** use evidence from Figure 5 in your answer.

SECTION C1

Geographical Investigations: Fieldwork in a Physical Environment

Answer EITHER Question 8 OR Question 9 in this section.

Write your answers in the space provided.

If you answer Question 8, put a cross in the box ☐.

Investigating Coastal Change and Conflict

- 8 You have carried out your own fieldwork investigating the impact of coastal management on coastal processes and communities.

Name your coastal fieldwork location.

- (a) Explain **one** way that you collected quantitative data to investigate the impact of coastal management on coastal processes and communities.

(2)

- (b) Explain **one** reason why the quantitative data that you collected might not all be accurate.

(2)

- (c) Explain **one** way in which the qualitative data that you collected helped your investigation.

(4)

- 1
- 2

- (e) A group of students were asked to suggest a possible enquiry question and an outline plan to investigate the influence of drainage basin and channel characteristics on flood risk.

The students' enquiry question and outline plan are shown below.

	Enquiry Question What is the impact of geology on river gradient in two contrasting locations?
Location of fieldwork	The rivers are about 20 km apart – the closest is 40 km from the school. Parking looks to be easy for both rivers.
Methods used	Measuring river gradient (steepness) along both rivers: each with six sites about 200 metres apart.
Issues	One section of the second river is privately owned and we will need to collect a key from the landowner on arrival.
Secondary data needed	We need to check on the geology of the two rivers. We could also ask the landowner about any flood problems.

Figure 7

Evaluate the strengths and weaknesses of both the enquiry question and the outline plan.

You must use evidence from Figure 7 in your answer.

SECTION C2

Geographical Investigations: Fieldwork in a Human Environment

Answer EITHER Question 10 OR Question 11 in this section.

Write your answer in the space provided.

If you answer Question 10, put a cross in the box ☐.

Investigating Dynamic Urban Areas

- 10** As part of their urban fieldwork a group of students carried out an environmental quality survey (EQS) along a street in each of four different residential areas. Two are in the inner city, one in the suburbs and one in an area on the rural-urban fringe.

Their survey scored each street according to four aspects of the environment. Each aspect was scored out of 5 giving 20 as the best possible score.

1. The amount of graffiti (5 = none, 0 = visible almost everywhere)
2. The amount of litter (5 = none, 0 = visible almost everywhere)
3. The noise level (5 = very quiet, 0 = very noisy)
4. The quality of the pavements (5 = very good, 0 = cracked and uneven)

The students also used a secondary source to discover how deprived each area was using data for Income Deprivation (ID) and how the environment was rated for Environmental Deprivation (ED).

They ranked both of these from **least deprived** = 1, to **most deprived** = 4.

The results are shown below.

Location of urban areas	Environmental quality survey Score /20	Income deprivation Ranking	Environmental deprivation Ranking
Inner City 1	9	4	4
Inner City 2	15	1	3
Suburbs	11	3	1
Rural-urban fringe	18	2	2

Figure 8

- (a) (i) Explain **one** method the students could have used to select the residential areas to carry out their fieldwork.

(2)

.....

.....

.....

.....

- (ii) Explain **two** reasons why the results of their environmental quality survey might be unreliable.

(4)

If you answer Question 11, put a cross in the box ☐ .

Investigating Changing Rural Settlements

- 11** As part of their rural fieldwork a group of students carried out an environmental quality survey (EQS) along a street in each of four different rural settlements. Two are just outside a large city, one 40 km from the city and the other, an old seaside resort.

Their survey scored each street according to four aspects of the environment. Each aspect was scored out of 5 giving 20 as the best possible score.

1. The amount of graffiti (5 = none, 0 = visible almost everywhere)
2. The amount of litter (5 = none, 0 = visible almost everywhere)
3. The noise level (5 = very quiet, 0 = very noisy)
4. The quality of the pavements (5 = very good, 0 = cracked and uneven)

The students also used a secondary source to discover how deprived each area was using data for Income Deprivation (ID) and how the environment was rated for Environmental Deprivation (ED).

They ranked both of these from **least deprived** = 1, to **most deprived** = 4.

The results are shown below.

Location of rural settlements	Environmental quality survey	Income deprivation	Environmental deprivation
	Score /20	Ranking	Ranking
Just outside city 1	9	4	1
Just outside city 2	15	1	3
40 km from city	18	2	2
Seaside resort	11	3	4

Figure 9

- (a) (i) Explain **one** method the students could have used to select the rural settlements to carry out their fieldwork.

(2)

.....

.....

.....

.....

- (ii) Explain **two** reasons why the results of their environmental quality survey might be unreliable.
