

Mark Scheme (Results)

Summer 2023

Pearson Edexcel International GCSE in
Geography (4GE1/02R)
Paper 2: Human Geography

Edexcel and BTEC Qualifications

Edexcel and BTEC qualifications are awarded by Pearson, the UK's largest awarding body. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information visit our qualifications websites at www.edexcel.com or www.btec.co.uk. Alternatively, you can get in touch with us using the details on our contact us page at www.edexcel.com/contactus.

Pearson: helping people progress, everywhere

Pearson aspires to be the world's leading learning company. Our aim is to help everyone progress in their lives through education. We believe in every kind of learning, for all kinds of people, wherever they are in the world. We've been involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for our commitment to high standards and raising achievement through innovation in education. Find out more about how we can help you and your students at: www.pearson.com/uk

General Marking Guidance

- All candidates must receive the same treatment. Examiners must mark the first candidate in exactly the same way as they mark the last.
- Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.
- Examiners should mark according to the mark scheme not according to their perception of where the grade boundaries may lie.
- There is no ceiling on achievement. All marks on the mark scheme should be used appropriately.
- All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.
- Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification may be limited.
- When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the team leader must be consulted.
- Crossed out work should be marked UNLESS the candidate has replaced it with an alternative response.

How to award marks when level descriptions are used

1. Finding the right level

The first stage is to decide into which level the answer should be placed in. To do this, use a 'best-fit' approach, deciding which level most closely describes the quality of the answer. Answers can display characteristics from more than one level, and where this happens markers must use the guidance below and their professional judgement to decide which level is most appropriate.

For example, one stronger passage at L4 would not by itself merit a L4 mark, but it might be evidence to support a high L3 mark, unless there are substantial weaknesses in other areas. Similarly, an answer that fits best in L3 but which has some characteristics of L2 might be placed at the bottom of L3. An answer displaying some characteristics of L3 and some of L1 might be placed in L2.

2. Finding a mark within a level

After a level has been decided on, the next stage is to decide on the mark within the level. The instructions below tell you how to reward responses within a level. However, where a level has specific guidance about how to place an answer within a level, always follow that guidance.

Levels containing 2 marks only

Start with the presumption that the work will be at the top of the level. Move down to the lower mark if the work only just meets the requirements of the level.

Levels containing 3 or more marks

Markers should be prepared to use the full range of marks available in a level and not restrict marks to the middle. Markers should start at the middle of the level (or the upper-middle mark if there is an even number of marks) and then move the mark up or down to find the best mark. To do this, they should take into account how far the answer meets the requirements of the level:

- If it meets the requirements *fully*, markers should be prepared to award full marks within the level. The top mark in the level is used for answers that are as good as can realistically be expected within that level
- If it only *barely* meets the requirements of the level, markers should consider awarding marks at the bottom of the level. The bottom mark in the level is used for answers that are the weakest that can be expected within that level
- The middle marks of the level are used for answers that have a *reasonable* match to the descriptor. This might represent a balance between some characteristics of the level that are fully met and others that are only barely met.

Question number	Answer	Mark
1(a)(i)	<p style="text-align: center;">AO1 (1 mark)</p> <p>C miner. (1)</p> <p>The answer cannot be A, B or D as these are all tertiary and quaternary sector jobs.</p>	(1)

Question number	Answer	Mark
1(a)(ii)	<p style="text-align: center;">AO1 (1 mark)</p> <p>Award one mark for a suitable factor.</p> <ul style="list-style-type: none"> • Availability of workforce/labour (1). • Proximity to natural resources (1) • Availability of land for growing crops (1) . • Flat land/relief (1) <p>Accept any other appropriate response.</p>	(1)

Question number	Answer	Mark
1(b)	<p style="text-align: center;">AO1 (1 mark)</p> <p>D lack of unemployment benefits (1)</p> <p>It cannot be A, B or C as these are not characteristics of informal employment.</p>	(1)

Question number	Answer	Mark
1(c)	<p style="text-align: center;">AO2 (1 mark) / AO3 (1 mark)</p> <p>Award 1 mark for a basic evidence from the from the photograph (AO3) and a further 1 mark for extension through explanation (AO2), up to a maximum of 2 marks.</p> <ul style="list-style-type: none"> • Open space (1) which means there is potential to expand at a later date. • Roads (1) to provide good access for the workforce (1). • Nice/pleasant environment (1) which is designed to act as a benefit for attracting a high quality workforce (1). <p>Accept any other appropriate response.</p>	(2)

Question number	Answer	Mark
1(d)	<p>AO1 (1 mark)</p> <p>Award 1 mark for a suitable definition.</p> <ul style="list-style-type: none"> The difference between a country's demand for energy and its ability to produce that energy from its own resources (1). <p>Accept responses that acknowledge the idea of difference between production and demand.</p>	(1)

Question number	Answer	Mark
1(e)	<p>AO2 (4 marks)</p> <p>Award 1 mark for each reason and a further expansion mark or exemplification, up to a maximum of 2 marks each.</p> <p>Maximum 2 marks where a developed country or no country is provided.</p> <p>A range of country examples could be chosen.</p> <ul style="list-style-type: none"> [China] Government investment in dams (1) to create more renewable energy through turbines (1) [China] Multiple firms producing electric cars (1) so less fossil fuels used for transport (1). [Morocco] Large investment from government into solar farms [1] to generate electricity from the sun that is readily available in the country. [Morocco] Improving energy efficiency by updating technology (1) to update old solar farms with new technology (1). <p>Accept any other appropriate response.</p>	(4)

Question number	Answer	Mark
1(f)	<p>AO1 (1 mark) / (AO3) 2 marks</p> <p>Award 1 mark (AO1) for identification of a change and a further 2 marks (AO3) for extension through use of the resource, up to a maximum of 3 marks.</p> <ul style="list-style-type: none"> • A rise in the use of wind power (1) to reduce carbon emissions (1) and reliance on fossil fuel energy (1). • A decline in the use of coal (1) to maintain a more sustainable energy mix (1) which is less reliant on fossil fuels (1). • Development of other renewable energy types such as biomass (1) as country seeks to support a more sustainable energy mix (1) with a more renewable energy (1). <p>Accept any other appropriate response.</p>	(3)

Question number	Answer	Mark
1(g)	<p>AO2 (2+2 marks)</p> <p>Award 1 mark for an advantage and a disadvantage, with a further expansion mark, up to a maximum of 2 marks each.</p> <ul style="list-style-type: none"> • Advantage: <ul style="list-style-type: none"> ◦ Renewable sources such as solar do not run out (1) so can help increase energy security (1). ◦ Wind energy has a potentially infinite supply (1) so it can provide a complement to other energy sources (1). ◦ Hydroelectric energy using the movement of water can provide an infinite supply of energy (1) but can also create water reserves (dams) (1). • Disadvantage: <ul style="list-style-type: none"> ◦ Some renewable technologies can be expensive (1) so not always accessible to whole populations (1). ◦ Some renewable resources are not reliable (1) for example where there is no wind, wind energy would not be efficient (1). ◦ Some renewable energy resources such as tidal can only be located in certain places (1) so not always an option for national networks (1). <p>Accept any other appropriate response.</p>	(4)

Question number	Indicative content
1 (h)	<p style="text-align: center;">AO3 (4 marks)/AO4 (4 marks)</p> <p>Marking instructions</p> <p>Markers must apply the descriptors in line with the general marking guidance and the qualities outlined in the levels-based mark scheme below.</p> <p>Indicative content guidance</p> <p>The indicative content below is not prescriptive and candidates are not required to include all of it. Other relevant material not suggested below must also be credited. Relevant points may include:</p> <p>AO3</p> <ul style="list-style-type: none"> • Developed based around the changes that took place in the UK the Clark-Fisher model provides an overview of employment changes that a country could typically go through as it moved from being a pre-industrial country to a post-industrial country. • There are three distinct phases in the model: <ul style="list-style-type: none"> ◦ Pre-industrial phase where the primary sector dominates the economy and tends to account for over two thirds of employment. Agriculture tends to be the dominant activity. ◦ Industrial phase where the secondary and tertiary sectors increase in productivity. The secondary sector tends to peak in this phase but does not tend to account for more than two thirds of employment. ◦ Post-industrial phase which involves a fall in primary and secondary sectors, a rise in tertiary sector employment and the emergence of the quaternary sector. • Reasons for the changes: <ul style="list-style-type: none"> ◦ Mechanisation of agriculture reduces requirement for labourers which can then move to other sectors (with the potential for higher wages). ◦ A rise in secondary sector businesses tends to dominate in cities, which can lead to increased rural-urban migration which not only fuels the secondary sector but the growth of the tertiary sector too. ◦ Global shift of manufacturing in some developed countries can lead to a reduced secondary sector and the rise of tertiary and quaternary. ◦ Advances in technology allows for reduced labour required in the secondary sector, but also the spread of service based employment in the tertiary and quaternary sectors. ◦ <p>AO4</p> <ul style="list-style-type: none"> • Figure 1c shows the Clark-Fisher model which shows how employment structures typically change over time within a country. • On Figure 1c it can be seen that in pre-industrial countries there is a dominance of the primary sector. • On Figure 1c it can be seen that in industrial countries there is a rise initially in the secondary sector, followed by the tertiary sector.

		<ul style="list-style-type: none"> Figure 1c shows how post-industrial countries have high tertiary sector employment, with rising quaternary sector employment and falling primary and secondary employment.
Level	Mark	Descriptor
	0	No rewardable material.
Level 1	1–3	<ul style="list-style-type: none"> Attempts to apply understanding to deconstruct information but understanding and connections are flawed. An unbalanced or incomplete argument that provides limited synthesis of understanding. Judgements that are supported by limited evidence. (AO3) Uses some geographical skills to obtain information with limited relevance and accuracy, which supports few aspects of the argument. (AO4)
Level 2	4–6	<ul style="list-style-type: none"> Applies understanding to deconstruct information and provide some logical connections between concepts. An imbalanced argument that synthesises mostly relevant understanding, but not entirely coherently, leading to judgements that are supported by evidence occasionally. (AO3) Uses geographical skills to obtain accurate information that supports some aspects of the argument. (AO4)
Level 3	7–8	<ul style="list-style-type: none"> Applies understanding to deconstruct information and provide logical connections between concepts throughout. A balanced, well-developed argument that synthesises relevant understanding coherently leading to judgements that are supported by evidence throughout. (AO3) Uses geographical skills to obtain accurate information that supports all aspects of the argument. (AO4)

Question number	Answer	Mark
2(a)(i)	<p>C timber (1)</p> <p>The answer cannot be A, B or D as these are all services provided by a forest rather than goods.</p>	(1)

Question number	Answer	Mark
2(a)(ii)	<p>AO1 (1 mark)</p> <p>Award 1 mark for a suitable definition.</p> <ul style="list-style-type: none"> When crops and animals are produced by farmers to feed their family rather than selling goods at a market. (1) <p>Accept any other appropriate responses.</p>	(1)

Question number	Answer	Mark
2(b)	<p>AO1 (1 mark)</p> <p>A temperatures below 0°C most of the year (1)</p> <p>The answer cannot be B, C or D as these are not characteristics of a tundra ecosystem.</p>	(1)

Question number	Answer	Mark
2(c)	<p>AO2 (1 mark) / AO3 (1 mark)</p> <p>Award 1 mark for basic evidence from the image (AO3) and a further 1 mark for extension through explanation (AO2), up to a maximum of 2 marks.</p> <ul style="list-style-type: none"> Green spaces can be taken up with houses (1) which might cause conflicts with existing residents (1). New homes built (1) might cause a rise in house prices (1). Development of buildings/houses (1) could cause damage to local wildlife (1). <p>Accept any other appropriate responses.</p>	(2)

Question number	Answer	Mark
2(d)	<p style="text-align: center;">AO1 (1 mark)</p> <p>Award 1 mark for a suitable way:</p> <ul style="list-style-type: none"> • Fertilisers (1) • GM crops (1) • High yielding varieties of crops (1) • Increase farm size (1) • Pesticides/Herbicides (1) <p>Accept any other appropriate response.</p>	(1)

Question number	Answer	Mark
2(e)	<p style="text-align: center;">AO2 (2+2 marks)</p> <p>Award 1 mark for identification of a way farm incomes are being diversified and a further mark for development or exemplification, up to a maximum of 2 marks each.</p> <p>Maximum 2 marks where a developing or emerging country or no country is provided.</p> <p>A range of examples could be provided.</p> <ul style="list-style-type: none"> • United Kingdom: <ul style="list-style-type: none"> ○ Adding a bed and breakfast on site (1) to be able to earn money from tourism. (1). ○ Changing part of the farm to pick your own (1) to attract a wider range of people to the farm. • USA: <ul style="list-style-type: none"> ○ Allowing land to be used for wind turbines (1) to earn money for generating energy as well as growing crops (1). ○ Opening a farm shop (1) so produce can be sold direct to consumers rather than just through intermediaries (1). <p>Accept any other appropriate response.</p>	(4)

Question number	Answer	Mark
2(f)	<p>AO1 (1 mark) / (AO3) 2 marks</p> <p>Award 1 mark for an identification of a pattern and a further 2 marks for extension through explanation or description, up to a maximum of 3 marks.</p> <ul style="list-style-type: none"> • Most Polish cities have experienced an outflow of residents (1) which may lead to high demand for housing in suburban areas (1) which encroaches into rural areas (1). • A lot of movement to the suburbs (1) which there could be infrastructure developments (1) which could improve accessibility of some rural areas (1). <p>Accept any other appropriate response.</p>	(3)

Question number	Answer	Mark
2(g)	<p>AO2 (4 marks)</p> <p>Award 1 mark for each strategy and an additional 1 mark for development through further explanation or exemplification. Maximum 2 marks for each strategy.</p> <p>A range of strategies chosen and countries referred to.</p> <ul style="list-style-type: none"> • Efforts from NGOs to improve access to electricity (1) so people can run appliances from their home reliably (1). • Introducing GM crops (1) which can improve yields or be more pest resistant (1). • Reduce the use of pesticides and chemicals (1) and produce goods with certification standards which can gain a higher price from consumers (1). <p>Accept any other appropriate response.</p>	(4)

Question number	Indicative content	
2 (h)	<p style="text-align: center;">AO3 (4 marks)/AO4 (4 marks)</p> <p>Marking instructions</p> <p>Markers must apply the descriptors in line with the general marking guidance and the qualities outlined in the levels-based mark scheme below.</p> <p>Indicative content guidance</p> <p>The indicative content below is not prescriptive and candidates are not required to include all of it. Other relevant material not suggested below must also be credited. Relevant points may include:</p> <p>AO3</p> <ul style="list-style-type: none"> • The factors leading to change in rural areas are predominantly human in developing an emerging country. • Processes of rural-urban migration mean rural areas often lose many of their economically active population, leaving rural areas underpopulated. This leaves older age groups behind in rural areas. • Loss of economically active populations means there may be a shortage of suitable labourers in some areas. This could lead to reduced production in agriculture for example. If the country is experiencing a decline in primary sector industries such as agriculture then those remaining working in rural areas may need to consider alternative sources of income so diversification on farms may take place - this could involve developing tourist facilities, or switching to crops which gain a higher income but require less manual labour. • Globalisation often support continued economic growth in cities which means that economic development tends to focus on the urban areas supporting core-periphery theory. <p>AO4</p> <ul style="list-style-type: none"> • Figure 2c shows changes to the population of urban and rural populations in Brazil. • Figure 2c how in 1950 there was a total population of just over 50 million people which were around two thirds rural. • Figure 2c shows how the population of Brazil in general increased substantially over the time period to around 230 million people with the majority (around 90%) of these being urban. • Figure 2c shows how after 2000 there was a slow decline in rural populations.

Question number	Answer	Mark
3(a) (i)	<p>AO1 (1 mark)</p> <p>D – financial district (1)</p> <p>The answer cannot be A, B or C as these features usually associated with areas outside the city centre.</p>	(1)

Question number	Answer	Mark
3(a) (ii)	<p>AO1 (1 mark)</p> <p>Award 1 mark for any suitable reason.</p> <ul style="list-style-type: none"> • Accessibility/transport links (1) • Proximity to city centre (1) • Building quality (1) • Land use (1) <p>Accept any other appropriate response.</p>	(1)

Question number	Answer	Mark
3(b)	<p>AO1 (1 mark)</p> <p>A infrastructure (1)</p> <p>The answer cannot be B, C or D as these do not affect land use patterns.</p>	(1)

Question number	Answer	Mark
3(c)	<p>AO2 (1 mark) / AO3 (1 mark)</p> <p>Award 1 mark for a basic evidence from the from the photograph (AO3) and a further 1 mark for extension through explanation (AO2), up to a maximum of 2 marks.</p> <ul style="list-style-type: none"> • Potential for room to expand at a later date (1) as the land is usually on the edge of a settlement (1). • Nicer environment for a business (1) which can provide greater job satisfaction for workers (1). • No need to pay for land to be cleared before building (1) so may be cheaper than building on some brownfield sites (1). <p>Accept any other appropriate response.</p>	(2)

Question number	Answer	Mark
3(d)	<p>AO1 (1 mark)</p> <p>Award 1 mark for a suitable definition.</p> <ul style="list-style-type: none"> • Movement of people away from cities to more rural areas or smaller towns and cities (1). <p>Accept any other appropriate response.</p>	(1)

Question number	Answer	Mark
3(e)	<p>AO2 (2+2 marks)</p> <p>Award 1 mark for a suitable and a further development or exemplification, up to a maximum of 2 marks each.</p> <ul style="list-style-type: none"> • Population growth / natural increase (1) fuelled by rural-urban migration but also natural increase of the urban population as it grows (1). • Multiplier effect (1) as more people have moved there, more people need more services, which fuels more economic growth (1). <p>Accept any other appropriate response.</p>	(4)

Question number	Answer	Mark
3(f)	<p>AO1 (1 mark) / (AO3) 2 marks</p> <p>Award 1 mark for a trend and a further 2 marks for extension through explanation or description, up to a maximum of 3 marks.</p> <ul style="list-style-type: none"> • Asia has developed a larger proportion of urban dwellers over recent decades (1). This is due to the growth of secondary sectors and industrialisation (1) which had lead to growth of employment in urban areas (1). • Europe has a developed lower proportion of global urban population over time (1) as it went through processes or urbanisation earlier (1) and actually experienced process of counter-urbanisation as people seek places with a better quality of life (1). <p>Accept any other appropriate response.</p>	(3)

Question number	Answer	Mark
3(g)	<p>AO2 (4 marks)</p> <p>Award 1 mark for initial explanation and an additional 1 mark for development through further explanation or exemplification.</p> <p>A range of countries and stakeholders examples could be chosen, relating to different environmental challenges (these could include air pollution, waste, water pollution, noise pollution).</p> <p>Maximum 2 marks where a developed country or no country provided.</p> <ul style="list-style-type: none"> • [Brazil] In Curitiba, local government supporting sustainable transport (1) to try and reduce congestion and air pollution (1). • [Brazil] In Curitiba, planners have helped to create public transport systems that are effective (1) to reduce the number of vehicles on the road (1). • [India] In Delhi, government have been investing in waste management programmes to increase points for recycling. • [India] In India, a central pollution board was established (1) to develop programmes to reduce air pollution across different cities by finding new technologies (1). <p>Accept any other appropriate response.</p>	(4)

Question number	Indicative content	
3 (h)	<p style="text-align: center;">AO3 (4 marks)/AO4 (4 marks)</p> <p>Marking instructions</p> <p>Markers must apply the descriptors in line with the general marking guidance and the qualities outlined in the levels-based mark scheme below.</p> <p>Indicative content guidance</p> <p>The indicative content below is not prescriptive and candidates are not required to include all of it. Other relevant material not suggested below must also be credited. Relevant points may include:</p> <p>AO3</p> <ul style="list-style-type: none"> • There are a range of economic, social and environment problem that are associated with rapid urbanisation. • High traffic density is often associated with rapid urbanisation which can lead to congestion, but also increased air pollution. • Congestion can lead to reduced economic productivity as people cannot move effectively around urban areas. • The World Health Organisation air quality guidelines recommends that cities with a PM2.5 concentration should not exceed $10 \mu\text{g}/\text{m}^3$. Despite this many cities (in both developing and developed countries) exceed this level, and congestion exacerbates this issue. • High levels of air pollution can lead to more respiratory health issues in residents. • Rapid urbanisation facing many cities in developing countries, such as Dhaka has led to increase pressure on many services such as education and healthcare, and not all people can access them. <p>AO4</p> <ul style="list-style-type: none"> • Figure 3c shows how many cities which have experience rapid urbanisation face high level of congestion – with journey times over 43% above uncongested free flow of traffic. • Figure 3c shows how this issue affects urban areas from across different continents suggesting it is a global problem. • Figure 3c indicates that Moscow, Mumbai, Bogota and Manila have the highest average congestion levels, these are all based in developing/emerging economies.

Question number	Answer	Mark
4(a)(i)	<p>AO3 (1 mark)</p> <p>Award one mark for any of the following:</p> <ul style="list-style-type: none"> • Question 2/Q2/2 or 'What benefits does it bring?' (1) • Question 6/Q6/6 or 'What impact do you think the new power plant has had on the area? (1) . 	(1)

Question number	Answer	Mark
4(a)(ii)	<p>AO3 (2 marks)</p> <p>Award 1 mark for initial point, and a further mark for explanation, up to a maximum of 2 marks.</p> <ul style="list-style-type: none"> • Closed question allow opinions to be quantified (1) which make data analysis straightforward when creating graphs and charts (1). • Closed questions are usually quicker to respond to (1) so it might be possible to get more people to answer these (1). <p>Accept any other appropriate response.</p>	(2)

Question number	Answer	Mark
4(b)(i)	<p>AO4 (2 marks)</p> <p>Award 1 mark for at each point plotted correctly at 40m and 60m.</p> <p>Correct diagram shown below:</p>	(2)

Question number	Answer	Mark
4(b)(ii)	<p>AO4 (1 marks)</p> <p>Award 1 mark for: 200m (1) Accept 200.</p>	(2)

Question number	Answer	Mark
4(b)(iii)	<p>AO4 (1 mark)</p> <p>Award 1 mark for a suitable line drawn, similar to below:</p>  <p>Line of best fit needs to be within the first and last plots but angle and height can vary slightly from the example shown above.</p>	(1)

Question number	Answer	Mark
4(b)(iv)	<p>AO4 (2 marks)</p> <p>Award 1 mark for working and 1 mark for correct answer.</p> <ul style="list-style-type: none"> • $(52+60) / 2$ (1) • $56/56.0$ (1) 	(2)

Question number	Answer	Mark
4(c)	<p style="text-align: center;">AO3 (3 marks)</p> <p>Award 1 mark for a suitable type of secondary, and further 2 marks for explanation.</p> <ul style="list-style-type: none"> Local newspaper articles (1) can be used to find out views of local people on the new power plant (1) and compare to those from a questionnaire (1). Reports from local council on biodiversity and wildlife (1) to consider potential impacts on the local environment (1) and if anything is being done to reduce impact (1). <p>Accept any other appropriate response.</p> <p>Do not credit 'internet' on its own.</p>	(3)

Question number	Indicative content
4(d)	<p style="text-align: center;">AO3 (4 marks)/AO4 (4 marks)</p> <p>Marking instructions</p> <p>Markers must apply the descriptors in line with the general marking guidance and the qualities outlined in the levels-based mark scheme below.</p> <p>Indicative content guidance</p> <p>The indicative content below is not prescriptive and candidates are not required to include all of it. Other relevant material not suggested below must also be credited. Relevant points may include:</p> <p>AO3</p> <ul style="list-style-type: none"> Evaluation is likely to be linked to the use of a range of data collection methods to strengthen argument, linked to aims. Evaluation will most likely be linked to the evaluation of the data collection methods as well as fieldwork design and the techniques used to analyse and present data. Recognition of the extent to which data collection methods chosen were suitable for the data types collected e.g. doesn't allow for presentation of qualitative data effectively. A supported judgement is reached about the data collection methods, drawing on evidence such as strengths, weaknesses, alternatives and relevant examples using data. <p>AO4</p> <ul style="list-style-type: none"> There is evidence of using different data collection methods and thought about the design of these methods as part of primary fieldwork. There is evidence of using different skills and techniques relevant to design of the methodology stage of the enquiry.

		<ul style="list-style-type: none"> • There is evidence of using different skills and techniques to investigate aspects of economic activity and energy. • There is evidence of own fieldwork data (and design) i.e. reference to the field data collected by the student.
Level	Mark	Descriptor
	0	No acceptable response.
Level 1	1–3	<ul style="list-style-type: none"> • Attempts to apply understanding to deconstruct information but understanding and connections are flawed. An unbalanced or incomplete argument that provides limited synthesis of understanding. Judgements are supported by limited evidence. (AO3) • Few aspects of the enquiry process are supported by the use of geographical skills to obtain information, which has limited relevance and accuracy. Communicates generic fieldwork findings and uses limited relevant geographical terminology. (AO4)
Level 2	4–6	<ul style="list-style-type: none"> • Applies understanding to deconstruct information and provide some logical connections between concepts. An imbalanced argument that synthesises mostly relevant understanding, but not entirely coherently, leading to judgements that are supported by evidence occasionally. (AO3) • Some aspects of the enquiry process are supported by the use of geographical skills. Communicates fieldwork findings with some clarity, using relevant geographical terminology occasionally. (AO4)
Level 3	7–8	<ul style="list-style-type: none"> • Applies understanding to deconstruct information and provide logical connections between concepts throughout. A balanced, well-developed argument that synthesises relevant understanding coherently, leading to judgements that are supported by evidence throughout. (AO3) • All aspects of the enquiry process are supported by the use of geographical skills. Communicates enquiry-specific fieldwork findings with clarity and uses relevant geographical terminology consistently. (AO4)

Question number	Answer	Mark
5(a)(i)	<p>AO3 (1 mark)</p> <p>Award one mark for any of the following:</p> <ul style="list-style-type: none"> • Question 2/Q2/2 or 'What benefits does it bring?' (1) • Question 6/Q6/6 or 'What impact do you think the new farm shop has had on the area?' (1) . 	(1)

Question number	Answer	Mark
5(a)(ii)	<p>AO3 (2 marks)</p> <p>Award 1 mark for initial point, and a further mark for explanation, up to a maximum of 2 marks.</p> <ul style="list-style-type: none"> • Closed question allow opinions to be quantified (1) which make data analysis straightforward when creating graphs and charts (1). • Closed questions are usually quicker to respond to (1) so it might be possible to get more people to answer these (1). <p>Accept any other appropriate response.</p>	(2)

Question number	Answer	Mark
5(b)(i)	<p>AO4 (2 marks)</p> <p>Award 1 mark each correctly plotted point at 40m and 60m.</p> <p>Correct diagram shown below:</p>	(2)

Question number	Answer	Mark
5(b)(ii)	<p>AO4 (1 marks)</p> <p>Award 1 mark for: 200m (1) Accept 200.</p>	(2)

Question number	Answer	Mark
5(b)(iii)	<p>AO4 (1 mark)</p> <p>Award 1 mark for a suitable line drawn, similar to below:</p>  <p>Line of best fit needs to be within the first and last plots but angle and height can vary slightly from the example shown above.</p>	(1)

Question number	Answer	Mark
5(b)(iv)	<p>AO4 (2 marks)</p> <p>Award 1 mark for working and 1 mark for correct answer.</p> <ul style="list-style-type: none"> • $(52+60) / 2$ (1) • 56/56.0 (1) 	(2)

Question number	Answer	Mark

Question number	Indicative content
7 (h)	<p>AO2 (4 marks), AO3 (4 marks), AO4 (4 marks)</p> <p>Marking instructions</p> <p>Markers must apply the descriptors in line with the general marking guidance and the qualities outlined in the levels-based mark scheme below.</p> <p>Indicative content guidance</p> <p>The indicative content below is not prescriptive and candidates are not required to include all of it. Other relevant material not suggested below must also be credited. Relevant points may include:</p> <p>AO2</p> <ul style="list-style-type: none"> Climate change has both natural and human causes, but it is widely acknowledged that human activities have led to the enhanced greenhouse effect and climate change with global surface temperatures rising faster since 1970 than any other 50 year period in the past 2,000 years. It is predicted for temperatures to rise 1.5°C by 2040 in all scenarios. The 2021 IPCC report highlighted that climate change has the potential to be a catastrophe for the entire planet, but that working together could avoid a climate catastrophe. Raised awareness is often done better at local level – challenges to get the connect between international and local level. COP26 <p>AO3</p> <ul style="list-style-type: none"> Figure 7a shows how the scale of potential changes are global, although varied across different continents, suggesting the potential impacts of climate change will be varied too.

Question number	Indicative content	
	<ul style="list-style-type: none"> Climate change is primarily driven by human activities, often related to economic development, either as part of fuelling the economy or urbanisation. Given the ties with economic development, governments should take responsibility to address threats to these fragile environments, and should work together through international organisations to coordinate activities. The nature of the threats to fragile environments from climate change span across national borders so often requires co-operation with international organisations such as the World Bank or UN organisations, or with smaller scale NGOs who can tackle issues on the ground. Successful examples of projects to tackle deforestation and desertification (impacts of climate change) have relied on collaboration between international organisations, governments, companies and NGOs. For example, the Elion Resource Group have successfully restored areas of land experiencing desertification in the northern China. Such examples suggest that while international examples are important, it is important to have actions taking place at different scales. <p>AO4</p> <ul style="list-style-type: none"> Figure 7a shows how there is the potential for many areas of the world to have serious declines in crop yields by 2050 due to climate change. Figure 7a shows how the changes to crop yields will be uneven across the globe, significant declines in the global south, with some potential increases in the global north. Figure 7b shows three different strategies used as part of sustainable rainforest management. Figure 7b shows how a range of stakeholders can be involved in strategies to deal with sustainable rainforest management. Figure 7b shows how strategies to deal with can be at different scales from local/regional reforestation programmes to international agreements.

Relevant points may include:</p> <p>AO2</p> <ul style="list-style-type: none"> Globalisation and the global economy has been driven by a number of factors including trade, foreign investment, aid, labour, modern transport and information technology. Trade blocs have been established to facilitated trade relationships between groups of countries, such blocs have led to wider agreements which can also involve the movement of people (for example the European Union). Advances in technology such as telecommunications and the internet have facilitated rapid growth of global trade (but also contributed to a global shift). In 2019 global trade value exported throughout the world was around US\$19 trillion (up from US\$ 6.45 trillion in 2000). According to the United Nations there were 272 million international migrants in 2019 (an increase of 51 million since 2010). International migrants represent about 3.5% of the world

Question number	Indicative content	
	<p>population, and three out of every four international migrants are of working age (20-64 years).</p> <p>AO3</p> <ul style="list-style-type: none"> Global institutions such as the WTO, IMF have been instrumental in shaping trading and political relationships between countries. The WTO focuses on promoting free trade, and the IMF focuses on supporting a system of international payments. The World Bank has been involved in providing loans and development programmes to many countries. The movement of people has been an important component of driving the global economy, because many workers move for study and work. Many countries rely on skilled workers moving to support their economies. <p>AO4</p> <ul style="list-style-type: none"> Figure 8a shows how there is an uneven pattern of FDI across the globe. Europe and North America have a lot of countries with high levels of FDI, while Africa, Asia, and South America have a much higher variation in FDI levels. Figure 8a shows how there is an incomplete picture of international trade and economic activity by looking just at FDI as much of Africa does not have any available data. Figure 8b shows how TNC have the potential to have a positive impact through creation of large number of jobs across the world. Figure 8b shows how the headquarters of TNCs tend to be in developed countries (UK and USA). Figure 8b shows how TNCs have the potential to have impacts, through poor working conditions of workers and causing environmental damage.
