Fig. 3 - Infographic showing the impacts of and responses to the tsunami in Sulawesi, Indonesia

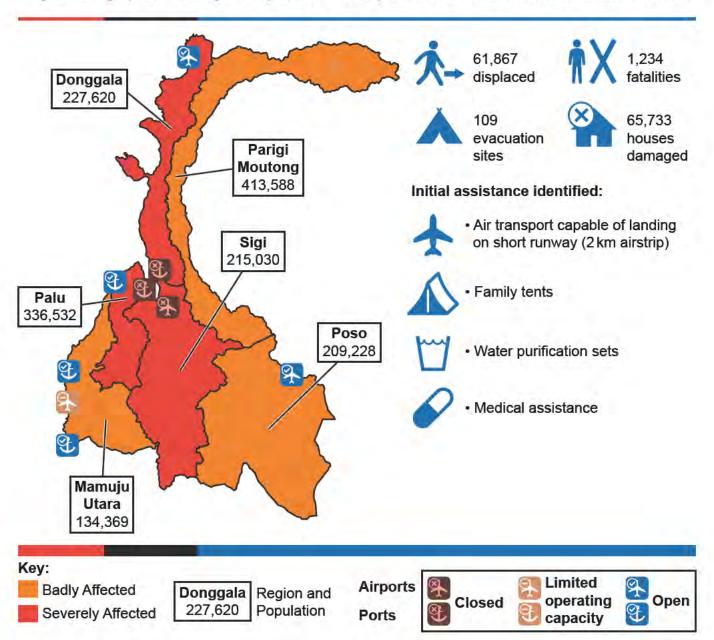

Fig. 4 - Map of Sulawesi, Indonesia, showing the location of and threat to coral reefs

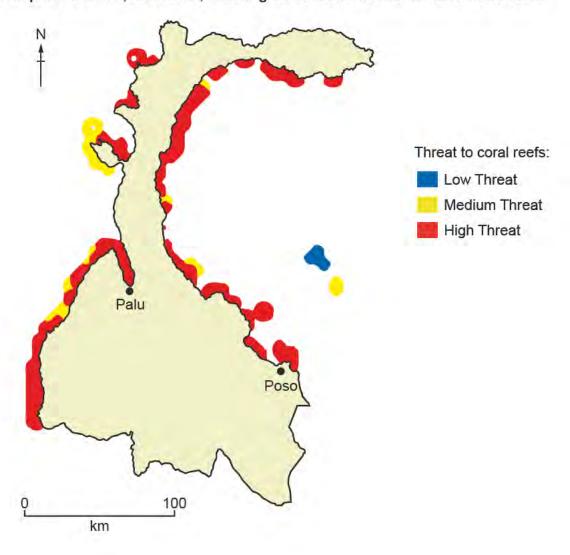

Fig. 5 – A factfile about uses of coral reefs in Sulawesi, Indonesia

Sulawesi is surrounded by narrow areas of shallow seas, separated from each other by areas of very deep ocean. This is the perfect environment for coral reefs to form and there are over 2000 km of reefs in the area. Some of the reefs around Sulawesi stretch for hundreds of kilometres without a break.

Northern Sulawesi is known as one of the best diving locations in the world and local people have set up dive resorts for tourists. The majority of dive resorts encourage divers to help to restore and protect the coral, however diving equipment can harm the coral if not used correctly.

The Crown of Thorns starfish is one threat to the coral reef as they eat the coral. In some parts of the seas around Sulawesi, there were up to 30 starfish per diving location.

In 1998, there were reports of widespread coral bleaching in Sulawesi caused by seas becoming warmer. The coral bleaching seems to have reduced, as there is more protection in the area, though this is still a high risk due to climate change.

Fishing is a major part of the economy in Sulawesi with many villages totally reliant on the fishing industry. The fuel from fishing boats and the use of nets that get caught on the coral can cause a lot of damage.

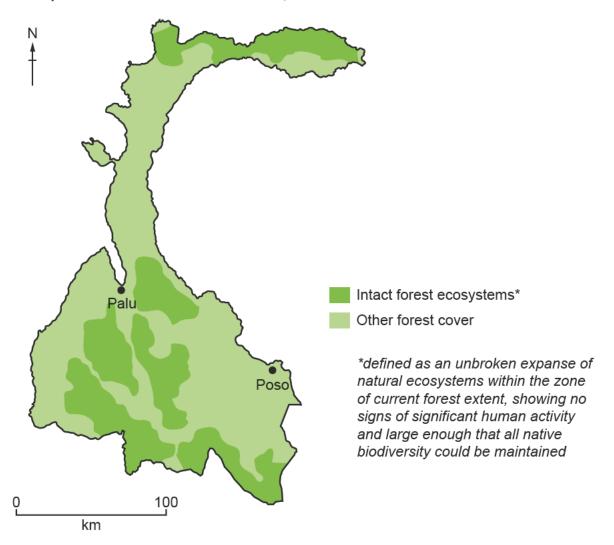

Fig. 6 – Key statistics tables for the Sulawesi rainforest and the economy of Indonesia

Table A – Sulawesi rainforest coverage in square kilometres (km²)		
Total Land Area	174849 km²	
Total Tree Coverage in 2000	147 074 km ²	
Total Tree Coverage in 2010	145 451 km ²	
Total Tree Coverage in 2018	136 120 km²	

Table B – Estimated potential economic value of the Sulawesi rainforest per square kilometre (km²)		
Logging	\$6250	
Farming	\$3570	
Palm Oil Production	\$35 000	
Ecotourism	\$5480	

Table C – Economy of Indonesia Gross Domestic Product (GDP)		
GDP in 2000	\$165 billion	
GDP in 2010	\$755 billion	
GDP in 2018	\$1042 billion
