GEOGRAPHY A – Component 3

RESOURCE FOLDER

This folder is for use with questions in **Component 3**.
This folder need not be handed in with your answer booklet.

Three strategies to make UK urban environments and communities more sustainable

Using local resources

Examples:

- Locally produced food within the urban environment
- Rainwater harvesting to produce drinkable water
- Encouraging the use of solar panels, wind turbines and other easily accessible renewable resources

Improving transport systems

Examples:

- Electric buses, trams and cars
- Cycle lanes and bike rental schemes e.g. Cycle to Work scheme
- Encouraging people to walk or share cars to school or work

Managing green spaces

Examples:

- Protecting green spaces to improve air quality
- Creating nature reserves on brownfield sites
- Teaching children about local ecosystems e.g. school grounds nature sites

Different urban communities in the UK may have other ways to implement these three strategies as well.
