ADDITIONAL MATERIALS

Resource Folder.

In addition to this paper you may use a calculator and a ruler if required.

INSTRUCTIONS TO CANDIDATES

Answer **all** of the questions in this examination paper.

Use black ink or black ball-point pen. Do not use gel pen. Do not use correction fluid.

Write your name, centre number and candidate number in the spaces at the top of this page.

Write your answers in the spaces provided in this booklet.

If additional space is required you should use the lined page(s) at the end of this booklet. The question number(s) should be clearly shown.

INFORMATION FOR CANDIDATES

The number of marks is given in brackets [] at the end of each question or part-question.

You are reminded that assessment will take into account your ability to spell, punctuate and use grammar and specialist terminology accurately in your answer to question 1(d).

MAY19C112U10101

Theme 1: Changing Places – Changing Economies*Answer all questions.*

1. Most towns and cities in the UK have distinctive zones. One of these is the zone of deprivation.

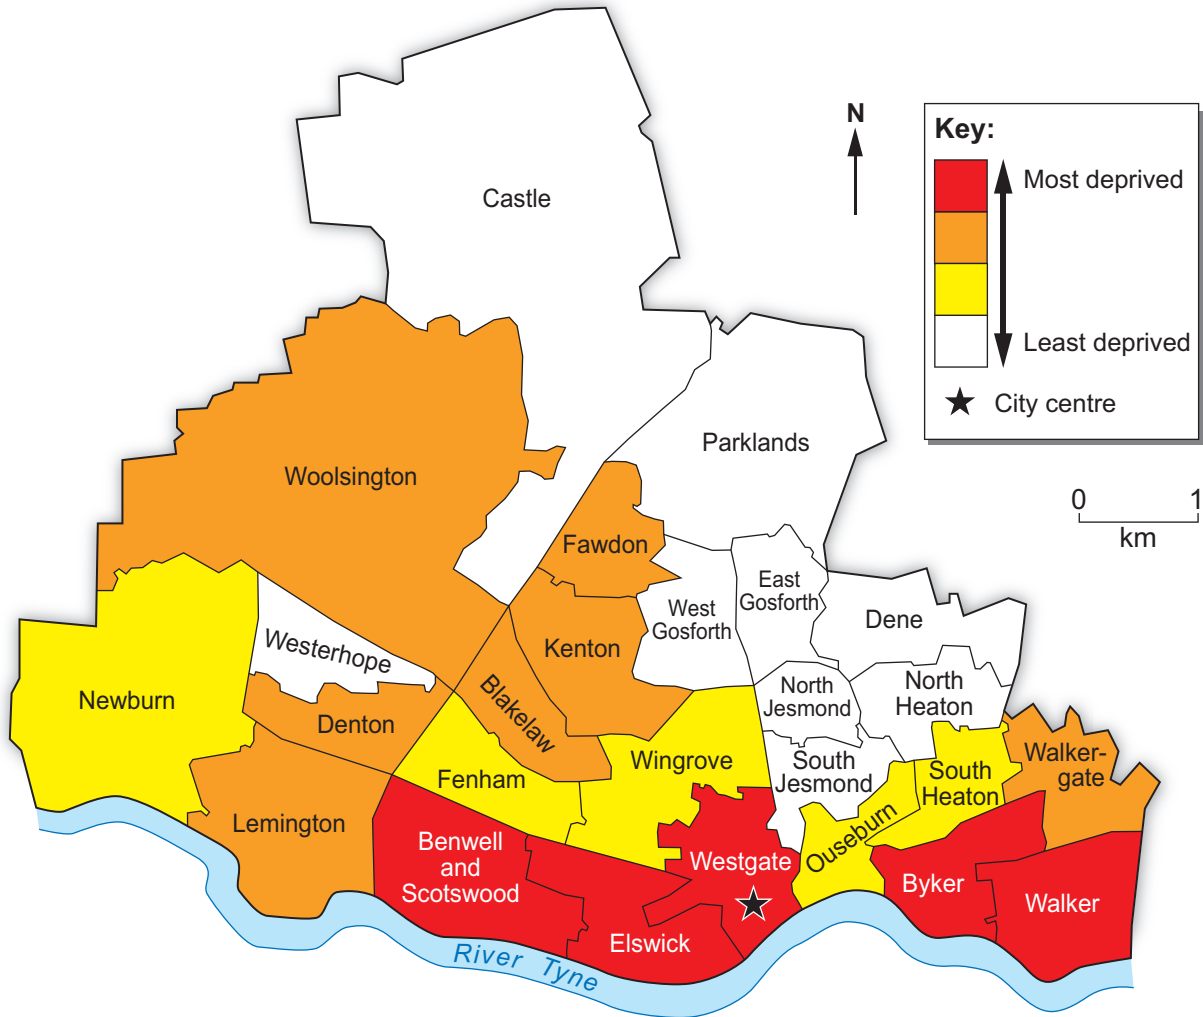

(a) (i) **Tick (✓) three** features in the list below which are indicators of deprivation. [3]

Feature	Tick (✓)
Low crime rate	
High level of car ownership	
High level of overcrowding	
Low level of employment	
High level of income	
Low level of good health	

(ii) Study **Figure 1.1** below.

Figure 1.1 Levels of deprivation in the city of Newcastle-upon-Tyne, NE England

Describe the pattern of deprivation shown on this map.

[4]

.....

.....

- (b) (i) **Tick (✓)** which of the following statements best describes the land use of the CBD (Central Business District). [1]

Land Use	Tick (✓)
Mainly small factories and warehouses	
Mainly shops, offices and restaurants	
Mainly retail parks and leisure centres	
Mainly new housing estates	

- (ii) Many cities have high volumes of traffic. Study **Figure 1.2** below.

Figure 1.2 The flow of traffic into and out of a CBD between 9.00am and 9.05am.

The amount of traffic flowing **out of** the CBD at Point **A** between 9.00am and 9.05am was 100 vehicles.

Which of the arrows in the table should be used to show the traffic at Point **A** on **Figure 1.2**? Tick (✓) the correct box. [1]

Tick (✓)

(iii) Complete the table below to show information for traffic going **into** the CBD: [3]

- names of roads in rank order of number of vehicles
- the number of vehicles on each of the roads
- the total number of vehicles going into the CBD.

Rank Order	Name of Road	Number of vehicles
Highest  Lowest	Western Avenue	125

	Southpark Drive
	50
		Total:

(iv) Large volumes of traffic going into the CBD has led to pedestrianised zones in some UK cities. Suggest **one** advantage and **one** disadvantage of creating pedestrianised zones in a city centre. [4]

Advantage

.....

.....

.....

Disadvantage

.....

.....

.....

- (c) (i) Give **one** reason why the population of cities in the UK is increasing. [2]

.....

.....

.....

.....

- (ii) Explain why improving transport systems can help to make cities more sustainable. [6]

**PLEASE DO NOT WRITE
ON THIS PAGE**

- (d) Study the information below. They show some features of urban and rural areas of the UK.

Figure 1.3 Changes in house prices 2007-2017

Figure 1.4 Urban and rural comparisons

Feature	Urban	Rural
% of total population	82%	18%
% of people not in work/retired	19%	24%
% of people with access to a doctor's surgery within 4km of their home.	100%	80%
% of people with access to superfast broadband connection	86%	30%

Figure 1.5 Changes to rural services

Volunteers run some rural services such as buses, post offices, libraries and shops to prevent them closing.

Theme 2: Changing Environments*Answer all questions.*

2. (a) Coastal areas are affected by many different physical processes. Complete the sentences below by adding the correct words from the box. [4]

hydraulic action	joints	weathering
headlands	attrition	saltation
deposition	cliffs	abrasion

Some rocks have vertical lines of weakness called

The breaking down of rock by the wind and rain or by plant roots

is called The force of waves compressing air into weakness

in the cliffs is called The process where rocks are picked up

by the waves and thrown against the cliffs is called

- (b) Study the map in the separate Resource Folder. The map shows part of the Isle of Wight.

- (i) What is the distance along the **Tennyson Trail footpath** from the Coastguard Cottages at 301848 to the viewpoint at 325853? [1]

..... kms.

- (ii) **Figure 2.1** below shows part of the area on the **map** in the **Resource Folder**. It was taken in grid square 3085.

In which direction was the photograph taken?
Tick (✓) the correct box below.

[1]

Direction	Tick (✓)
North-west	
North-east	
South-west	
South-east	

- (iii) Name the features marked **A**, **B** and **C** on **Figure 2.1**, using the map in the **Resource Folder**. [3]

Feature	Letter
White Cliffs	
Scratchell's Bay	
The Needles	
Alum Bay	
West High Down	
Totland Bay	

- (iv) The Needles are an example of the coastal landform 'stacks'. Describe how a stack is formed. You may draw diagrams in the space below to support your answer. [4]

.....

.....

.....

.....

.....

.....

.....

.....

- (c) **Figure 2.2** below shows the amount of potential erosion around Totland Bay in the Isle of Wight. (*Potential erosion is the amount of erosion that could occur with no management.*)

Figure 2.2 Potential erosion rates around Totland Bay

10 year time periods	Potential erosion in metres
2015-2025	19.41
2025-2035	13.24
2035-2045	14.11
2045-2055	15.23
2055-2065	16.10

- (i) The median value for potential erosion is 15.23 m. Give **one** limitation of using the median as a measure of potential erosion. [1]

.....

.....

- (ii) Calculate the mean of potential erosion rate between 2015 and 2065. Show your working below. [2]

Mean = metres

(iii) Explain **one** way in which human activity can increase coastal erosion. [2]

.....

.....

.....

.....

(iv) To reduce erosion rates some planners support the 'hold the line' method of coastal management. Explain why there are conflicting views on this method of coastal management. [6]

BLANK PAGE

**PLEASE DO NOT WRITE
ON THIS PAGE**

(d) Study **Figure 2.3** below.

Figure 2.3 Some areas of the world are at significant risk from rising sea levels and increased frequency of storms.

[8]

Theme 3: Environmental Challenges

Answer all questions.

3. (a) Study **Figure 3.1** which shows the climate of a hot semi-arid grassland area.

Figure 3.1 – Climate of an area of hot semi-arid grassland

- (i) Tick (✓) the **two** correct statements about the graph.

[2]

Statements	Tick (✓)
March is the wettest month	
June has the greatest range of temperature	
February is the hottest month	
The minimum temperature never drops below 20° C	
July and August have low rainfall and lower maximum temperatures	
There is more rain in November and December than there is in May and June.	

- (ii) Calculate the **range** of temperature in February. Show your working below.

[2]

Range = °C

- (iii) Complete the hot semi-arid grassland food chain below using the words in the box in the correct sequence.

[4]

lion grass cheetah zebra

(iv) Explain why vegetation can survive in the climate of hot semi-arid grasslands. [4]

.....

.....

.....

.....

.....

.....

.....

.....

(b) For a named ecosystem you have studied (other than hot semi-arid grassland) describe how the ecosystem has been managed.

Name of ecosystem [4]

.....

.....

.....

.....

.....

.....

.....

.....

- (c) Study **Figure 3.2** below, which shows how much of each continent is under threat from desertification.

Figure 3.2

- (i) Complete the sentences below using the information from **Figure 3.2**. [2]

The continent which already has the largest area
of extreme desert is

The continent with the largest percentage area
at high risk of desertification is

- (ii) Suggest **two** other appropriate techniques which could be used to represent this data. [2]

Technique 1

Technique 2

(iii) Explain why human activity can increase the process of desertification.

[4]

.....

.....

BLANK PAGE

**PLEASE DO NOT WRITE
ON THIS PAGE**

- (d) Study the photographs and map below, which show some strategies to reduce desertification.

Figure 3.3 Make land use more sustainable.

Figure 3.4 Use alternative modern farming techniques.

Figure 3.5 Encourage the growth of new urban settlements away from desert areas.

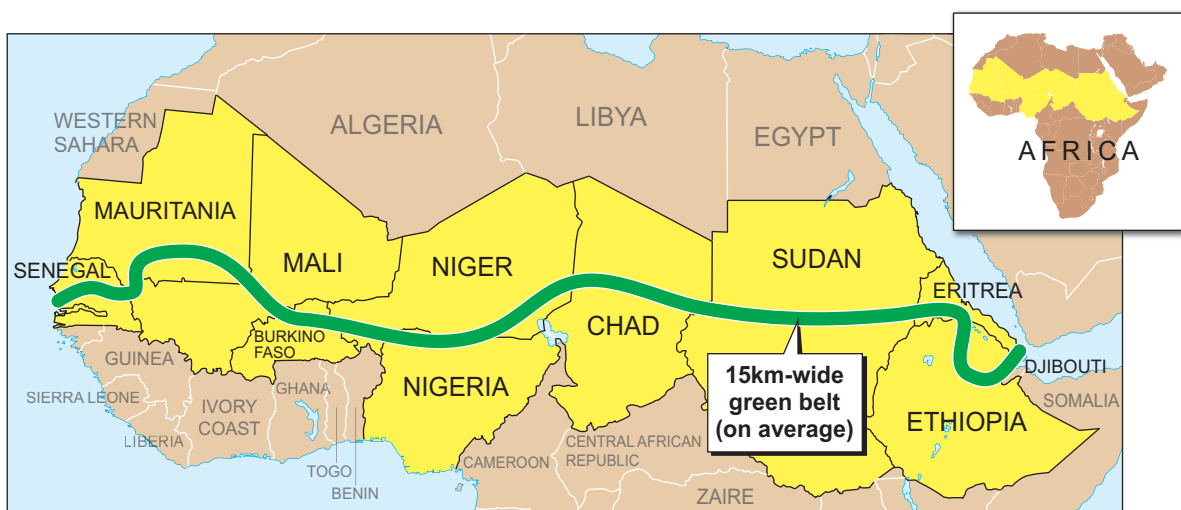

Figure 3.6 Support projects such as the Great Green Wall in Africa where 11 countries have planted lines of trees.
