

GCSE MARKING SCHEME

SUMMER 2018

GEOGRAPHY SPECIFICATION B COMPONENT 1 C112U10-1

INTRODUCTION

This marking scheme was used by WJEC for the 2018 examination. It was finalised after detailed discussion at examiners' conferences by all the examiners involved in the assessment. The conference was held shortly after the paper was taken so that reference could be made to the full range of candidates' responses, with photocopied scripts forming the basis of discussion. The aim of the conference was to ensure that the marking scheme was interpreted and applied in the same way by all examiners.

It is hoped that this information will be of assistance to centres but it is recognised at the same time that, without the benefit of participation in the examiners' conference, teachers may have different views on certain matters of detail or interpretation.

WJEC regrets that it cannot enter into any discussion or correspondence about this marking scheme.

GCSE GEOGRAPHY B COMPONENT 1

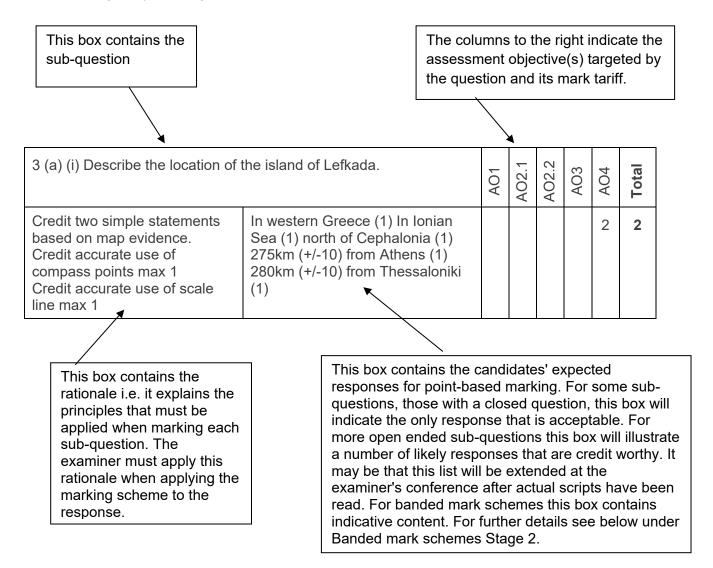

SUMMER 2018 – MARK SCHEME

Instructions for examiners of GCSE Geography when applying the marking scheme

1 Positive marking

It should be remembered that learners are writing under examination conditions and credit should be given for what the learner writes, rather than adopting the approach of penalising him/her for any omissions. It should be possible for a very good response to achieve full marks and a very poor one to achieve zero marks. Marks should not be deducted for a less than perfect answer if it satisfies the criteria of the mark scheme.

GCSE Geography marking schemes are presented in a common format as shown below:

2 Tick marking

Low tariff questions should be marked using a points-based system. Each credit worthy response should be ticked in red pen. The number of ticks must equal the mark awarded for the sub-question. The mark scheme should be applied precisely using the expected outcomes box as a guide to the responses that are acceptable. Do not use crosses to indicate answers that are incorrect. If the candidate has not attempted the question then the examiner should strike through the available dotted lines with a diagonal line.

3 Banded mark schemes

Banded mark schemes are divided so that each band has a relevant descriptor. The descriptor for the band provides a description of the performance level for that band. Each band contains marks. Examiners should first read and annotate a learner's answer to pick out the evidence that is being assessed in that question. **Do not use ticks** on the candidate's response. Once the annotation is complete, the mark scheme can be applied. This is done as a two stage process.

Stage 1 – Deciding on the band

When deciding on a band, the answer should be viewed holistically. Beginning at the lowest band, examiners should look at the learner's answer and check whether it matches the descriptor for that band. Examiners should look at the descriptor for that band and see if it matches the qualities shown in the learner's answer. If the descriptor at the lowest band is satisfied, examiners should move up to the next band and repeat this process for each band until the descriptor matches the answer.

If an answer covers different aspects of different bands within the mark scheme, a 'best fit' approach should be adopted to decide on the band and then the learner's response should be used to decide on the mark within the band. For instance if a response is mainly in band 2 but with a limited amount of band 3 content, the answer would be placed in band 2, but the mark awarded would be close to the top of band 2 as a result of the band 3 content.

Examiners should not seek to mark candidates down as a result of small omissions in minor areas of an answer.

Stage 2 – Deciding on the mark

Once the band has been decided, examiners can then assign a mark. During standardising (marking conference), detailed advice from the Principal Examiner on the qualities of each mark band will be given. Examiners will then receive examples of answers in each mark band that have been awarded a mark by the Principal Examiner. Examiners should mark the examples and compare their marks with those of the Principal Examiner.

When marking, examiners can use these examples to decide whether a learner's response is of a superior, inferior or comparable standard to the example. Examiners are reminded of the need to revisit the answer as they apply the mark scheme in order to confirm that the band and the mark allocated is appropriate to the response provided.

Indicative content is also provided for banded mark schemes. Indicative content is not exhaustive, and any other valid points must be credited. In order to reach the highest bands of the mark scheme a learner need not cover all of the points mentioned in the indicative content but must meet the requirements of the highest mark band. Where a response is not creditworthy, that is contains nothing of any significance to the mark scheme, or where no response has been provided, no marks should be awarded.

Theme 1, Question 1

	Q1 (a) Study Fig 1.1. (i) India is an example of a NIC. What does NIC stand for? Tick (✓) one of the definitions below.						AO4	Total
Credit this response			1					1
only.	Newly industrialised company							
	Newly industrialised country \checkmark							
	Non-industrialised country							

	e contains six statements abou e three correct statements.	t Fig 1.1. Only thr	ee	A01	AO2.1	A02.2	AO3	AO4	Total
Credit these responses only. One mark for each correct response.	Children aged 0-14 form the largest age groups in both India and the UK. India has more females than males in the 10-14 age group. The UK has more females than males aged 75 and over. The UK has a greater proportion of its population aged over 70 than India. There are 63 million people aged 0-4 in India. There are approximately 4 million people aged 0-4 in the UK.	Tick (✓) three						3	3

Q1 (b) (i) Calculate the different in 1981.	nce between male and female literacy	A01	A02.1	A02.2	AO3	A04	Total
Credit correct response only for one mark. Accept response placed in the table. No working out required.	29. (1)					1	1

Q1 (b) (ii) What has happene female literacy?	Q1 (b) (ii) What has happened to the difference between male and female literacy?		A02.1	A02.2	AO3	AO4	Total
Credit one valid statement. Allow use of figures.	Gone down / Reduced / By 11% (1)					1	1

Q1 (b) (iii) Give one reason why improving adult literacy rates would benefit countries like India.				A02.2	AO3	AO4	Total
This question targets the concept of levels of development. Credit one mark for a valid statement and up to one mark for its development. Do not allow a mark for defining adult literacy.	A high literacy rate means more workers can be employed in high technology jobs (1) which earn more money for the country (1)		2				2

Q1 (b) (iv) Give one e country's level of deve	economic indicator that is used to measure a elopment.	A01	AO2.1	A02.2	A03	A04	Total
Credit one valid statement with one mark.	Possible answers include : GNI (Gross National Income) GNP (Gross National Product) PPP (Purchasing Power Parity) GDP Inflation level % unemployment Economic structure of employment Do NOT allow HDI as it is not just economic.	1					1

Q1 (c) (i) De have studied		e the pattern of imports and	exports of one NIC you	A01	A02.1	A02.2	AO3	AO4	Total
from the low Band Ma 2 3 1 1	vest b ark 3-4 1-2	ark scheme. Work upwards and. Band descriptor Elaborated statements which demonstrate detailed knowledge of trade pattern. Clear reference should be made to figures/goods/country of imports and exports. Simple statements which demonstrate knowledge of imports or exports. Reference may be made to figures/goods/country of imports <u>or</u> exports. Reference may be made to figures/goods/country of imports <u>or</u> exports. Response may be more generic than specific. Award 0 marks if answer is incorrect or wholly irrelevant.	Must be a NIC – do not allow LIC. (Apply professional judgement. Use list on page 29 of the specification as a guide.) Named e.g. China imports services from the UK. China imported £1.2 billion of goods from the UK and exported £3.9 billion of goods. Should refer to specific named imports and exports between countries.	4					4

Q1 (c) (ii) Explai	n why the UK needs to import and e	xport goods.	A01	A02.1	A02.2	AO3	AO4	Total
This question tar	question targets AO2.1 the concept of interdependence.							6

After awarding a level and mark for the geographical response, apply the performance descriptors for spelling, punctuation and the accurate use of grammar (SPaG) and specialist terms that follow.

Band	Marks	Performance descriptions
High	4	 Learners spell and punctuate with consistent accuracy Learners use rules of grammar with effective control of meaning overall Learners use a wide range of specialist terms as appropriate
Intermediate	2 - 3	 Learners spell and punctuate with considerable accuracy Learners use rules of grammar with general control of meaning overall Learners use a good range of specialist terms as appropriate
Threshold	1	 Learners spell and punctuate with reasonable accuracy Learners use rules of grammar with some control of meaning and any errors do not significantly hinder meaning overall Learners use a limited range of specialist terms as appropriate
	0	 The learner writes nothing The learner's response does not relate to the question The learner's achievement in SPaG does not reach the threshold performance level, for example errors in spelling, punctuation and grammar severely hinder meaning
