COMPONENT 3 – MARKSCHEME

Instructions for examiners of GCSE Geography when applying the marking scheme

1 Positive marking

It should be remembered that learners are writing under examination conditions and credit should be given for what the learner writes, rather than adopting the approach of penalising him/her for any omissions. It should be possible for a very good response to achieve full marks and a very poor one to achieve zero marks. Marks should not be deducted for a less than perfect answer if it satisfies the criteria of the mark scheme.

GCSE Geography marking schemes are presented in a common format as shown below:

2 Tick marking

Low tariff questions should be marked using a points-based system. Each credit worthy response should be ticked in red pen. The number of ticks **must** equal the mark awarded for the sub-question. The mark scheme should be applied precisely using the expected outcomes box as a guide to the responses that are acceptable. Do **not** use crosses to indicate answers that are incorrect. If the candidate has not attempted the question then the examiner should strike through the available dotted lines with a diagonal line.

3 Banded mark schemes

Banded mark schemes are divided so that each band has a relevant descriptor. The descriptor for the band provides a description of the performance level for that band. Each band contains a range of marks. Examiners should first read and annotate a learner's answer to pick out the evidence that is being assessed in that question. **Do not use ticks** on the candidate's response. Once the annotation is complete, the mark scheme can be applied. This is done as a two stage process.

Stage 1 – Deciding on the band

When deciding on a band, the answer should be viewed holistically. Beginning at the lowest band, examiners should look at the learner's answer and check whether it matches the descriptor for that band. Examiners should look at the descriptor for that band and see if it matches the qualities shown in the learner's answer. If the descriptor at the lowest band is satisfied, examiners should move up to the next band and repeat this process for each band until the descriptor matches the answer.

If an answer covers different aspects of different bands within the mark scheme, a 'best fit' approach should be adopted to decide on the band and then the learner's response should be used to decide on the mark within the band. For instance if a response is mainly in band 2 but with a limited amount of band 3 content, the answer would be placed in band 2, but the mark awarded would be close to the top of band 2 as a result of the band 3 content.

Examiners should not seek to mark candidates down as a result of small omissions in minor areas of an answer.

Stage 2 – Deciding on the mark

Once the band has been decided, examiners can then assign a mark. During standardising (marking conference), detailed advice from the Principal Examiner on the qualities of each mark band will be given. Examiners will then receive examples of answers in each mark band that have been awarded a mark by the Principal Examiner. Examiners should mark the examples and compare their marks with those of the Principal Examiner.

When marking, examiners can use these examples to decide whether a learner's response is of a superior, inferior or comparable standard to the example. Examiners are reminded of the need to revisit the answer as they apply the mark scheme in order to confirm that the band and the mark allocated is appropriate to the response provided.

Indicative content is also provided for banded mark schemes. Indicative content is not exhaustive, and any other valid points must be credited. In order to reach the highest bands of the mark scheme a learner need not cover all of the points mentioned in the indicative content but must meet the requirements of the highest mark band. Where a response is not creditworthy, that is contains nothing of any significance to the mark scheme, or where no response has been provided, no marks should be awarded.

Part A: Investigating flows through fieldwork

(b) (ii) Explain why the population of cities in the UK is increasing.				A01	A02.1	A02.2	AO3	A04	Total			
							6					
This question assesses AO2.1 the concept of population change. Use the descriptors below, working upwards from the lowest band.			Responses should demonstrate understanding of a range of push factors that are responsible for population change in one major UK city.									
Band Mark Band Descriptor												
3	5-6	Thorough and elaborated understanding of reasons for population change. Some demonstrate depth of understanding through chains of reasoning.	 Migration Booming urban economies attract young adults to find work. Some jobs are better paid than in rural regions (eg London weighting allowance) and other jobs are advertised widely because of skill shortages (eg in health and education services). Some migrants are from within the UK, others are foreign migrants. Responses may focus on pull factors (such as 'bright lights') or push factors. Natural increase Youthful populations, attracted initially by 					er				
2	3-4	Elaborated understanding of some reasons for population change which demonstrates breadth of understanding.										
1	1-2	Simple, valid statements demonstrate basic understanding of the reasons for population change.										
	0	Award 0 marks if the answer is incorrect or wholly irrelevant.	booming urban economies are in the fertile age range and are likely to have young children which leads to further									
factors b Do not d	stion doe ut these ouble cre ed that w I.	growth of the url					ier					

(c) Explain why population change puts pressure on access to services in rural locations of the UK.				A01	A02.1	A02.2	AO3	A04	Total			
						6			6			
This question assesses AO2.2, the relationship between population change and access to services in rural places. Use the descriptors below, working upwards from the lowest band.			Responses should link population change to named services. Credit responses that refer to either population growth or loss (or both) in rural areas.									
Band	Mark	Descriptor	Population change is likely to be									
3	5-6	Elaborated statements which demonstrate a clear understanding of the links between population change and the consequential pressures on a wide range of services.	 based on population growth as the question asks candidates to explain the 'pressure' on the services. Examples will include pressure on the availability of schools (places / class sizes), health services (doctors / maternity services), roads (congestion / new build) and policing. More sophisticated responses may refer to socio-economic aspects of population change and / or demographics. Examples include the inward migration of younger people (maternity provision / school places) or older people (health care / community services). Credit responses which make the link between de-population and the closure of services (isolated rural villages losing post offices / bus services). 					he				
2	3-4	Elaborated statements which demonstrate an understanding of the link between population change and the consequential pressure on services.										
1	1-2	Simple, valid statements demonstrate a general understanding of how population change may impact on service provision.						refer to socio-economic aspec population change and / or		е		
	0	Award 0 marks if the answer is incorrect or wholly irrelevant.)				

(d) (i) Describe the location of Lincoln. Use distance and direction to support your answer.				A02.2	A03	A04	Total
Credit up to three valid statements, each with one mark. Max 1 if no use of distance or direction.	It is in Lincolnshire (1) in the west of the county (1) It is 45km (1) south west of Grimsby (1) It is 60km (1) west north west of Skegness (1)					3	3

 (d) (ii) Write a letter to Lincolnshire County Council. Explain why your chosen issue should become a priority. Justify your decision using information from pages 7 to 12 of the separate Resource Folder. Your ability to spell, punctuate and use grammar and specialist terms accurately will be assessed in your answer to this question. 	A01	A02.1	A02.2	AO3	AO4	SPaG	Total
Use the descriptors in the banded mark scheme below. Work upwards from the lowest to the highest band.				12		4	16

Band	Mark	Descriptor
4	10-12	 The candidate writes a comprehensive response that: reaches a substantiated decision that includes an effective justification provides consistently detailed analysis throughout that is substantiated by a range of evidence in the Resource Folder provides effective evaluation of the issue(s) applies wider geographical knowledge and understanding of the UK to effectively substantiate the chain of reasoning.
3	7-9	 The candidate writes a detailed response that: reaches a decision that is justified provides detailed analysis that is supported by evidence in the Resource Folder provides some evaluation of the issue(s) applies wider geographical knowledge and understanding of the UK to support reasoning.
2	4-6	 The candidate writes a response that: provides a decision that is simply justified provides some analysis that is supported by evidence in the Resource Folder makes limited evaluation of the issue(s) applies some limited geographical knowledge/understanding of the UK.
1	1-3	 The candidate writes a basic response that: provides a simple but unsubstantiated decision briefly explores some of the issues in one place
	0	Award 0 marks if the answer is incorrect or wholly irrelevant.

Once a mark (out of 12) has been awarded for the geographical content, apply the performance descriptors for spelling, punctuation and the accurate use of grammar and specialist terms that follow.

Band	Marks	Performance descriptions
High	4	 Learners spell and punctuate with consistent accuracy Learners use rules of grammar with effective control of meaning overall Learners use a wide range of specialist terms as appropriate
Intermediate	2 - 3	 Learners spell and punctuate with considerable accuracy Learners use rules of grammar with general control of meaning overall Learners use a good range of specialist terms as appropriate
Threshold	1	 Learners spell and punctuate with reasonable accuracy Learners use rules of grammar with some control of meaning and any errors do not significantly hinder meaning overall Learners use a limited range of specialist terms as appropriate
	0	 The learner writes nothing The learner's response does not relate to the question The learner's achievement in SPaG does not reach the threshold performance level, for example errors in spelling, punctuation and grammar severely hinder meaning
