**Extract A**

Ferdinand and Isabella were successful as long as they ruled an obedient society. Aristocratic co-operation was indispensable. The palaces of the rich men of the time showed their wealth and power; a combination that enabled them to resist interference. A dozen of the most powerful noble families controlled incomes greater than those of any bishopric. The monarchs sensed no conflict of interest with a class who were their natural allies in the government of the country and whose very status was because of traditions of service to the Crown. The monarchs were also skilful in handling their position as matchmakers in the aristocratic marriage market. 5

**Extract B**

The taming of the Castilian aristocracy was an outstanding achievement of the Catholic Kings: there were no noble revolts in the realm after 1516. Nobles were confirmed in their estates and private armies, but were given no extension of privileges. Instead, cities were taken back under royal control and new state officials were selected from the lesser gentry rather than from the aristocracy. The absence of any permanent capital or court made it impossible for the aristocracy to congregate together and to impose their will on the monarchy, as happened in other countries. The magic factor holding the varied personalities of the nobility together was Queen Isabella. 5
