MARK SCHEME

Maximum Mark: 50

Published

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge International will not enter into discussions about these mark schemes.

Cambridge International is publishing the mark schemes for the October/November 2021 series for most Cambridge IGCSE™, Cambridge International A and AS Level components and some Cambridge O Level components.

This document consists of **16** printed pages.

Generic Marking Principles

These general marking principles must be applied by all examiners when marking candidate answers. They should be applied alongside the specific content of the mark scheme or generic level descriptors for a question. Each question paper and mark scheme will also comply with these marking principles.

GENERIC MARKING PRINCIPLE 1:

Marks must be awarded in line with:

- the specific content of the mark scheme or the generic level descriptors for the question
- the specific skills defined in the mark scheme or in the generic level descriptors for the question
- the standard of response required by a candidate as exemplified by the standardisation scripts.

GENERIC MARKING PRINCIPLE 2:

Marks awarded are always **whole marks** (not half marks, or other fractions).

GENERIC MARKING PRINCIPLE 3:

Marks must be awarded **positively**:

- marks are awarded for correct/valid answers, as defined in the mark scheme. However, credit is given for valid answers which go beyond the scope of the syllabus and mark scheme, referring to your Team Leader as appropriate
- marks are awarded when candidates clearly demonstrate what they know and can do
- marks are not deducted for errors
- marks are not deducted for omissions
- answers should only be judged on the quality of spelling, punctuation and grammar when these features are specifically assessed by the question as indicated by the mark scheme. The meaning, however, should be unambiguous.

GENERIC MARKING PRINCIPLE 4:

Rules must be applied consistently, e.g. in situations where candidates have not followed instructions or in the application of generic level descriptors.

GENERIC MARKING PRINCIPLE 5:

Marks should be awarded using the full range of marks defined in the mark scheme for the question (however; the use of the full mark range may be limited according to the quality of the candidate responses seen).

GENERIC MARKING PRINCIPLE 6:

Marks awarded are based solely on the requirements as defined in the mark scheme. Marks should not be awarded with grade thresholds or grade descriptors in mind.

2	Study Source C. Why was this cartoon published in December 1919? Explain your answer using details of the source and your knowledge.	8
	Level 7 8 Explains purpose in context (using big message of the source) as a reason for publication – to criticise the US for not joining or to encourage the British government (politicians) to put pressure on the US to join or to persuade the US to join.	
	Level 6 7 Explains purpose (based on big message) of the source as a reason for publication.	
	Level 5 6 Explains big message of the source as a reason for publication. Big message – the League will fail because the US will not join. Must have both parts, must be fail or equivalent, not weak. Only one part is a sub-message.	
	Level 4 5 Explains only purpose (see Level 7).	
	Level 3 3–4 Explains the context or a sub-message as a reason for publication. Sub messages – the US will not join the League; Belgium, France, England and Italy were joining the League; the League was going to be weak; the League was Wilson’s idea; the US should join.	
	Level 2 2 Interprets the source or describes the context but not used as a reason for publication. Context – either: the Senate voted not to join the League in November 1919 (or recently) OR there was much opposition in the US against joining the League. The passing of the Treaty of Versailles or the League had been set up are not acceptable as context.

	<p>Level 3 3</p> <p>Answers based on undeveloped use of provenance – no valid use of what the sources claim e.g., Source D is bound to make E surprising because it is from a socialist while E is from a British minister; D will make E surprising because it was written in 1941 while E is from 1932</p>
