

MARK SCHEME for the May/June 2013 series

0470 HISTORY

0470/41

Paper 4 (Alternative to Coursework), maximum raw mark 40

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2013 series for most IGCSE, GCE Advanced Level and Advanced Subsidiary Level components and some Ordinary Level components.

Level 1 – Identifies work e.g. Great engineer, working with railways, ships and bridges. [1–2]

Level 2 – Describes work. Award an extra mark for each valid aspect described in additional detail e.g. Great Western Railway, London to Bristol originally, designed tunnels (Box Tunnel) and bridges for it; shipping – Great Western, Great Eastern, Great Britain etc.; bridges e.g. Clifton Suspension Bridge etc. [2–4]

(iii) Level 0 – No evidence submitted or response does not address the question. [0]

Level 1 – Single reason. One for the reason, one for the explanation. [1–2]

Level 2 – Multiple reasons. One for each reason, one for each reason explained e.g. Some did not like the smoke, noise and dirt; farmers felt that the trains would make cows dry up and horses uncontrollable; some thought people's flesh would be torn off at speed; land owners did not want the view spoiled or the countryside; others withheld permission to cross their land to drive up the price of land; some feared loss of jobs in coach industry and canals; some just did not like change etc. [2–6]

(iv) Level 0 – No evidence submitted or response does not address the question. [0]

Level 1 – Simple assertion, e.g. Trains go faster. [1]

Level 2 – Explanation of end of importance OR not an end of importance of canals, single factor given e.g.

End of importance – Railways could transport goods more cheaply; railway companies bought up canal companies and ran them down ; railway companies charged very low rates to get rid of canal rivalry, only to raise charges when competition was gone; railways could often get to places that canals could not so were more attractive to business etc.

Not an end of importance – Many canal companies continued to prosper; they were better for transporting heavy goods where time was not the important factor e.g. stone, coal, ore etc. [2]

Level 3 – Explanation of end of importance OR not an end of importance with multiple factors. Allow single factors with multiple reasons.

OR

Undeveloped suggestions on BOTH sides of the argument (annotate BBB – Balanced but Brief). [3–5]

Level 4 – Answers that offer a balanced argument.

BOTH sides of end of importance AND no end of importance must be addressed. [6–8]

Depth Study H: The Impact of Western Imperialism in the Nineteenth Century

(a) (i) Level 0 – No evidence submitted or response does not address the question. [0]

Level 1 – Repeats material stated in the source, no inference made. [1–2]

Level 2 – Makes valid inference(s), unsupported from the source e.g. The Congo Basin is undeveloped and unproductive; it has not been improved as Europeans have not been there long etc. [3–4]

Level 3 – Supports valid inferences with reference to the source e.g. The Congo Basin is undeveloped and wild as Europeans have not yet been able to make it productive with seeds so that the locals can reap the harvest; so far Europe had ignored the area etc. [5–6]

(ii) Level 0 – No evidence submitted or response does not address the question. [0]

Level 1 – Agrees OR disagrees, unsupported from the sources. [1–2]

Level 2 – Agrees OR disagrees, supported from the sources e.g.

Yes – The London and Leeds newspapers think that colonisation will bring openings for British business from textiles, crockery and guns etc.; praise for King Leopold for his enterprise; optimistic for the future etc.

No – Missionary has visited a village where misery and abandonment is rife; it would appear that local tribes people are being executed for no reason etc. [3–5]

Level 3 – Agrees AND disagrees, supported from the source. Addresses the issue of 'How far?' [6–7]

(iii) Level 0 – No evidence submitted or response does not address the question. [0]

Level 1 – Useful/not useful – Choice made on the basis that one is more detailed/gives more information but does not specify what information. [1]

Level 2 – Useful/not useful – A is from an explorer of the Congo Basin, B is from a recent book, and C is from a missionary so they could all be biased/unreliable. [2]

Level 3 – Choice made on the nature or amount of information given. Must specify what information. [3–5]

Level 4 – Choice made on grounds of reliability.

Discussion of utility must be made on valid evaluation of source(s) in context. Include at this Level answers which cross reference between A, B and C to show reliability. 6 marks for one source, 7 marks for more than one source. [6–7]

(b) (i) Level 0 – No evidence submitted or response does not address the question. [0]

Level 1 – One mark for each valid explorer to maximum of two e.g. Livingstone, Speke, Burton. [1–2]

(ii) Level 0 – No evidence submitted or response does not address the question. [0]

Level 1 – Identifies Conference e.g. A meeting to carve up Africa amicably without war. [1–2]

Level 2 – Describes Conference. Award an extra mark for each aspect described in additional detail e.g. A meeting of European powers to define aspects of African imperialism and influence without going to war – NB areas that were as yet not colonised; to consider the future of the Congo Basin; other areas discussed, slavery, slave trade, navigation rights of coast and rivers etc. [2–4]

(iii) Level 0 – No evidence submitted or response does not address the question. [0]

Level 1 – Single reason. One for the reason, one for the explanation. [1–2]

Level 2 – Multiple reasons. One for each reason, one for each reason explained e.g. Countries wished to become overseas imperial powers to establish prestige and status; some had only just become nations – Italy, Germany; a belief that colonies would be good for trade offering natural resources, cheap labour and ready markets; some were envious of existing imperial powers etc. [2–6]

(iv) Level 0 – No evidence submitted or response does not address the question. [0]

Level 1 – Simple assertions, e.g. Yes, they treated them badly. [1]

Level 2 – Explanation of exploitation OR non-exploitation, single factor given e.g.

Exploitation – Europeans tried to extract raw materials and produce cheaply with little regard for the welfare of natives – either workers or owners of lands; particularly bad treatment in Congo; very little evidence of altruistic commercial exploitation etc.

Non-exploitation – Europeans brought trade and infrastructure which helped countries develop; treating natives badly was not the main reason for exploitation; missionaries brought Christianity and education etc. [2]

Level 3 – Explanation of exploitation OR non-exploitation with multiple factors. Allow single factors with multiple reasons.

OR

Undeveloped suggestions on BOTH sides of the argument (annotate BBB – Balanced but Brief). [3–5]

Level 4 – Answers that offer a balanced argument.

BOTH sides of exploitation and non-exploitation must be addressed. [6–8]
