Paper 4 Alternative to Coursework

May/June 2020**MARK SCHEME**Maximum Mark: 40

Published

Students did not sit exam papers in the June 2020 series due to the Covid-19 global pandemic.

This mark scheme is published to support teachers and students and should be read together with the question paper. It shows the requirements of the exam. The answer column of the mark scheme shows the proposed basis on which Examiners would award marks for this exam. Where appropriate, this column also provides the most likely acceptable alternative responses expected from students. Examiners usually review the mark scheme after they have seen student responses and update the mark scheme if appropriate. In the June series, Examiners were unable to consider the acceptability of alternative responses, as there were no student responses to consider.

Mark schemes should usually be read together with the Principal Examiner Report for Teachers. However, because students did not sit exam papers, there is no Principal Examiner Report for Teachers for the June 2020 series.

Cambridge International will not enter into discussions about these mark schemes.

Cambridge International is publishing the mark schemes for the June 2020 series for most Cambridge IGCSE™ and Cambridge International A & AS Level components, and some Cambridge O Level components.

This document consists of **12** printed pages.

Generic Marking Principles

These general marking principles must be applied by all examiners when marking candidate answers. They should be applied alongside the specific content of the mark scheme or generic level descriptors for a question. Each question paper and mark scheme will also comply with these marking principles.

GENERIC MARKING PRINCIPLE 1:

Marks must be awarded in line with:

- the specific content of the mark scheme or the generic level descriptors for the question
- the specific skills defined in the mark scheme or in the generic level descriptors for the question
- the standard of response required by a candidate as exemplified by the standardisation scripts.

GENERIC MARKING PRINCIPLE 2:

Marks awarded are always **whole marks** (not half marks, or other fractions).

GENERIC MARKING PRINCIPLE 3:

Marks must be awarded **positively**:

- marks are awarded for correct/valid answers, as defined in the mark scheme. However, credit is given for valid answers which go beyond the scope of the syllabus and mark scheme, referring to your Team Leader as appropriate
- marks are awarded when candidates clearly demonstrate what they know and can do
- marks are not deducted for errors
- marks are not deducted for omissions
- answers should only be judged on the quality of spelling, punctuation and grammar when these features are specifically assessed by the question as indicated by the mark scheme. The meaning, however, should be unambiguous.

GENERIC MARKING PRINCIPLE 4:

Rules must be applied consistently e.g. in situations where candidates have not followed instructions or in the application of generic level descriptors.

GENERIC MARKING PRINCIPLE 5:

Marks should be awarded using the full range of marks defined in the mark scheme for the question (however; the use of the full mark range may be limited according to the quality of the candidate responses seen).

GENERIC MARKING PRINCIPLE 6:

Marks awarded are based solely on the requirements as defined in the mark scheme. Marks should not be awarded with grade thresholds or grade descriptors in mind.

Assessment Objectives 1 and 2**Level 5**

[33–40]

Candidates:

- Select and deploy a range of relevant and accurate contextual knowledge to effectively support their answers.
- Select, organise and deploy effectively and relevantly a wide range of information to support their conclusions.
- Demonstrate a good understanding of the key features, reasons, results and changes of societies, events, people and situations relevant to the question. They demonstrate an awareness of the importance of the broad context and of interrelationships of the issues of the question.
- Produce well-developed, well-reasoned and well-supported conclusions.
- Write with precision and succinctness, showing structure, balance and focus.

Level 4

[25–32]

Candidates:

- Deploy mostly relevant and accurate contextual knowledge to support parts of their answers.
- Select a range of relevant information which is generally well-organised and deployed appropriately.
- Demonstrate a reasonable understanding of the significance of the key features, reasons, results and changes of societies, events, people and situations relevant to the question with awareness of the broad context. They have some understanding of interrelationships of the issues in the question.
- Can produce developed, reasoned and supported conclusions.
- Write with precision and succinctness, showing structure, balance and focus.

Level 3

[17–24]

Candidates:

- Demonstrate and select some relevant contextual knowledge and deploy it appropriately to support parts of their answers.
- Select and organise mostly relevant information, much of it deployed appropriately with a structured approach, either chronological or thematic.
- Demonstrate some understanding of the key features, reasons, results and changes of the societies, events, people and situations relevant to the question with some awareness of the broad context.
- Produce structured descriptions and explanations.
- Support conclusions although they are not always well-substantiated.
- Write with some precision and succinctness.

Level 2

[9–16]

Candidates:

- Demonstrate some, but limited contextual knowledge.
- Select and organise some relevant information. This is only deployed relevantly on a few occasions.
- Identify and describe key features, reasons, results and changes of the societies, events, people and situations relevant to the question, but little awareness of the broad context. There is some structure in the descriptions.
- Attempt conclusions but these are asserted, undeveloped and unsupported.
- Present work that lacks precision and succinctness.
- Present a recognisable essay structure, but the question is only partially addressed.

Level 1

[1–8]

Candidates:

- Demonstrate little relevant contextual knowledge.
- Demonstrate limited ability to select and organise information.
- Describe a few key features, reasons, results, and changes of societies, events, people and situations relevant to the question. The work contains some relevant material but this is not deployed appropriately, and there are no effective links or comparisons.
- Write relatively little or it is of some length but the content is not focused on the task.
- Answer showing little understanding of the question.

Level 0

[0]

Candidates:

- Submit no evidence or do not address the question.

Information Suggestions

The information listed below attempts to indicate some of the detail and issues that candidates may wish to address in their answers. This list does not claim to be exclusive or exhaustive. Marks should be awarded on the quality of detail used and quality of argument deployed as defined in the generic mark scheme.

Question	Answer	Marks
1	<p>How important were conditions in the trenches as a reason for the high number of casualties in the First World War? Explain your answer.</p> <p>YES – Soldiers endured constant artillery bombardments; danger of sniper fire; poor hygiene and sanitation – soldiers often did not wash for weeks and had limited toilet facilities and fresh water – led to diseases; dangers of frost bite and trench foot due to damp conditions led to amputations; rats and lice made life uncomfortable and helped spread disease and infection; harsh weather including freezing winters, flooding and high temperatures led to many ailments; psychological problems such as ‘shellshock’; gas weapons fired into trenches to cause panic; large numbers of troops helped disease spread quickly etc.</p> <p>NO – More important – new technology and weapons led to higher casualties than the trenches – artillery responsible for the highest number of casualties (75%); machine guns could fire 6000 rounds per minute; barbed wire held up soldiers as they became entangled during offensives and made them easy prey for the machine guns; major offensives such as Verdun and Somme – 60 000 allied casualties on the first day of the Somme offensive; barbed wire; lack of effective tactics by commanders on both sides – relied on 19th century strategies at first; war of attrition – both sides aimed to wear the enemy down etc.</p>	40
