Instructions to Candidates

In the boxes above, write your centre number, candidate number, your surname, initials and signature. Check that you have the correct question paper. Answer ALL the questions. You must write your answer for each question in the space following the question.

Information for Candidates

A booklet 'Mathematical Formulae and Statistical Tables' is provided. Full marks may be obtained for answers to ALL questions. The marks for individual questions and the parts of questions are shown in round brackets: e.g. (2). There are 11 questions in this question paper. The total mark for this paper is 75. There are 28 pages in this question paper. Any blank pages are indicated.

Advice to Candidates

You must ensure that your answers to parts of questions are clearly labelled. You should show sufficient working to make your methods clear to the Examiner. Answers without working may not gain full credit.

Turn over

1. Simplify

(a) $(3\sqrt{7})^2$

(1)

(b) $(8+\sqrt{5})(2-\sqrt{5})$

(3)

Q1

(Total 4 marks)

2. Given that $32\sqrt{2} = 2^a$, find the value of a .

(3)

Q2

(Total 3 marks)

8.

**Figure 1**

The points A and B have coordinates $(6, 7)$ and $(8, 2)$ respectively.

The line l passes through the point A and is perpendicular to the line AB , as shown in Figure 1.

(a) Find an equation for l in the form $ax + by + c = 0$, where a , b and c are integers. (4)

Given that l intersects the y -axis at the point C , find

(b) the coordinates of C , (2)

(c) the area of $\triangle OCB$, where O is the origin. (2)

10. (a) Factorise completely $x^3 - 6x^2 + 9x$ (3)

(b) Sketch the curve with equation

$$y = x^3 - 6x^2 + 9x$$

showing the coordinates of the points at which the curve meets the x -axis. (4)

Using your answer to part (b), or otherwise,

(c) sketch, on a separate diagram, the curve with equation

$$y = (x - 2)^3 - 6(x - 2)^2 + 9(x - 2)$$

showing the coordinates of the points at which the curve meets the x -axis. (2)
