

Wednesday 23 January 2013 – Morning

AS GCE MATHEMATICS (MEI)

4755/01 Further Concepts for Advanced Mathematics (FP1)

QUESTION PAPER

Candidates answer on the Printed Answer Book.

OCR supplied materials:

- Printed Answer Book 4755/01
- MEI Examination Formulae and Tables (MF2)

Other materials required:

- Scientific or graphical calculator

Duration: 1 hour 30 minutes

INSTRUCTIONS TO CANDIDATES

These instructions are the same on the Printed Answer Book and the Question Paper.

- The Question Paper will be found in the centre of the Printed Answer Book.
- Write your name, centre number and candidate number in the spaces provided on the Printed Answer Book. Please write clearly and in capital letters.
- **Write your answer to each question in the space provided in the Printed Answer Book.** Additional paper may be used if necessary but you must clearly show your candidate number, centre number and question number(s).
- Use black ink. HB pencil may be used for graphs and diagrams only.
- Read each question carefully. Make sure you know what you have to do before starting your answer.
- Answer **all** the questions.
- Do **not** write in the bar codes.
- You are permitted to use a scientific or graphical calculator in this paper.
- Final answers should be given to a degree of accuracy appropriate to the context.

INFORMATION FOR CANDIDATES

This information is the same on the Printed Answer Book and the Question Paper.

- The number of marks is given in brackets [] at the end of each question or part question on the Question Paper.
- You are advised that an answer may receive **no marks** unless you show sufficient detail of the working to indicate that a correct method is being used.
- The total number of marks for this paper is **72**.
- The Printed Answer Book consists of **16** pages. The Question Paper consists of **4** pages. Any blank pages are indicated.

INSTRUCTION TO EXAMS OFFICER/INVIGILATOR

- Do not send this Question Paper for marking; it should be retained in the centre or recycled. Please contact OCR Copyright should you wish to re-use this document.

This paper has been pre modified for carrier language

Section A (36 marks)

- 1 Transformation A is represented by matrix $\mathbf{A} = \begin{pmatrix} 0 & 1 \\ 1 & 0 \end{pmatrix}$ and transformation B is represented by matrix $\mathbf{B} = \begin{pmatrix} 2 & 0 \\ 0 & 3 \end{pmatrix}$.
- (i) Describe transformations A and B. [3]
- (ii) Find the matrix for the composite transformation A followed by B. [2]
- 2 Given that $z = a + bj$, find $\operatorname{Re}\left(\frac{z}{z^*}\right)$ and $\operatorname{Im}\left(\frac{z}{z^*}\right)$. [4]
- 3 You are given that $z = 2 + j$ is a root of the cubic equation $2z^3 + pz^2 + 22z - 15 = 0$, where p is real. Find the other roots and the value of p . [6]
- 4 (i) Show that $x^2 - x + 2 > 0$ for all real x . [2]
- (ii) Solve the inequality $\frac{2x}{x^2 - x + 2} > x$. [5]
- 5 You are given that $\frac{3}{(5 + 3x)(2 + 3x)} \equiv \frac{1}{2 + 3x} - \frac{1}{5 + 3x}$.
- (i) Use this result to find $\sum_{r=1}^{100} \frac{1}{(5 + 3r)(2 + 3r)}$, giving your answer as an exact fraction. [5]
- (ii) Write down the limit to which $\sum_{r=1}^n \frac{1}{(5 + 3r)(2 + 3r)}$ converges as n tends to infinity. [1]
- 6 Prove by induction that $1^2 - 2^2 + 3^2 - 4^2 + \dots + (-1)^{n-1} n^2 = (-1)^{n-1} \frac{n(n+1)}{2}$. [8]

Section B (36 marks)

- 7 Fig. 7 shows a sketch of $y = \frac{x-4}{(x-5)(x-8)}$.

Fig. 7

- (i) Write down the equations of the three asymptotes and the coordinates of the points where the curve crosses the axes. Hence write down the solution of the inequality $\frac{x-4}{(x-5)(x-8)} > 0$. [6]
- (ii) The equation $\frac{x-4}{(x-5)(x-8)} = k$ has no real solutions. Show that $-1 < k < -\frac{1}{9}$. Relate this result to the graph of $y = \frac{x-4}{(x-5)(x-8)}$. [7]
- 8 (i) Indicate on an Argand diagram the set of points z for which $|z - (-8 + 15j)| < 10$. [4]
- (ii) Using the diagram, show that $7 < |z| < 27$. [3]
- (iii) Mark on your Argand diagram the point, P , at which $|z - (-8 + 15j)| = 10$ and $\arg z$ takes its maximum value. Find the modulus and argument of z at P . [4]

9 You are given that $\mathbf{A} = \begin{pmatrix} 8 & -7 & -12 \\ -10 & 5 & 15 \\ -9 & 6 & 6 \end{pmatrix}$ and $\mathbf{A}^{-1} = k \begin{pmatrix} 4 & 2 & 3 \\ 5 & 4 & 0 \\ 1 & -1 & 2 \end{pmatrix}$.

(i) Find the exact value of k . [2]

(ii) Using your answer to part (i), solve the following simultaneous equations.

$$\begin{aligned} 8x - 7y - 12z &= 14 \\ -10x + 5y + 15z &= -25 \\ -9x + 6y + 6z &= 3 \end{aligned} \quad [4]$$

You are also given that $\mathbf{B} = \begin{pmatrix} -7 & 5 & 15 \\ a & -8 & -21 \\ 2 & -1 & -3 \end{pmatrix}$ and $\mathbf{B}^{-1} = \frac{1}{3} \begin{pmatrix} 1 & 0 & 5 \\ -4 & -3 & 1 \\ 2 & 1 & b \end{pmatrix}$.

(iii) Find the values of a and b . [2]

(iv) Write down an expression for $(\mathbf{AB})^{-1}$ in terms of \mathbf{A}^{-1} and \mathbf{B}^{-1} . Hence find $(\mathbf{AB})^{-1}$. [4]

Copyright Information

OCR is committed to seeking permission to reproduce all third-party content that it uses in its assessment materials. OCR has attempted to identify and contact all copyright holders whose work is used in this paper. To avoid the issue of disclosure of answer-related information to candidates, all copyright acknowledgements are reproduced in the OCR Copyright Acknowledgements Booklet. This is produced for each series of examinations and is freely available to download from our public website (www.ocr.org.uk) after the live examination series.
