# A-level

## FURTHER MATHEMATICS

### Paper 2

Friday 6 June 2025

Afternoon

Time allowed: 2 hours

#### Materials

- You must have the AQA Formulae and statistical tables booklet for A-level Mathematics and A-level Further Mathematics.
- You should have a graphical or scientific calculator that meets the requirements of the specification.

#### Instructions

- Use black ink or black ball-point pen. Pencil should only be used for drawing.
- Fill in the boxes at the top of this page.
- Answer **all** questions.
- You must answer each question in the space provided for that question. If you require extra space for your answer(s), use the lined pages at the end of this book. Write the question number against your answer(s).
- Do **not** write outside the box around each page or on blank pages.
- Show all necessary working; otherwise marks for method may be lost.
- Do all rough work in this book. Cross through any work that you do not want to be marked.

#### Information

- The marks for questions are shown in brackets.
- The maximum mark for this paper is 100.

#### Advice

- Unless stated otherwise, you may quote formulae, without proof, from the booklet.
- You do not necessarily need to use all the space provided.

Answer **all** questions in the spaces provided.

- 1** The vectors  $\begin{bmatrix} a \\ b \end{bmatrix}$  and  $\begin{bmatrix} c \\ 1 \end{bmatrix}$  are perpendicular.

Which **one** of the following statements must be true?

Tick (✓) **one** box.

[1 mark]

$a = bc$

☐

$b = ac$

☐

$a = -bc$

☐

$b = -ac$

☐

- 2** The quadrilateral  $Q_1$  has an area of  $5 \text{ cm}^2$

The matrix  $\begin{bmatrix} 4 & -1 \\ 2 & 1 \end{bmatrix}$  represents the transformation T

The transformation T acts on  $Q_1$  to give the quadrilateral  $Q_2$

Find the area of  $Q_2$

Circle your answer.

[1 mark]

$5 \text{ cm}^2$

$10 \text{ cm}^2$

$30 \text{ cm}^2$

$180 \text{ cm}^2$

3 Find  $\frac{d}{dx}(\sin^{-1}x - 2\cos^{-1}x)$

Circle your answer.

[1 mark]

$$\frac{-3}{\sqrt{1-x^2}}$$

$$\frac{-1}{\sqrt{1-x^2}}$$

$$\frac{1}{\sqrt{1-x^2}}$$

$$\frac{3}{\sqrt{1-x^2}}$$

4 The function  $f$  is defined by  $f(x) = 16 - x^2$  ( $x \in \mathbb{R}$ )

On which of the following intervals is the mean value of  $f$  the greatest?

Tick (✓) **one** box.

[1 mark]

$$0 \leq x \leq 1$$

☐

$$0 \leq x \leq 2$$

☐

$$0 \leq x \leq 3$$

☐

$$0 \leq x \leq 4$$

☐

8 The function  $f$  is defined by

$$f(x) = x^3 + x^2 - 12x \quad (x \in \mathbb{R})$$

**Figure 1** shows the graph of  $y = f(x)$

**Figure 1**

- 8 (a)** The graph of  $y = f(x)$  is transformed by a stretch, scale factor 2, parallel to the  $x$ -axis with the  $y$ -axis fixed, to give the graph of  $y = g(x)$

On **Figure 1**, sketch the graph of  $y = g(x)$ , showing the values of  $x$  where the graph crosses the  $x$ -axis.

**[3 marks]**

---

**Turn over for the next question**

**Turn over ►**

- 9 (a)** It is given that, for the complex number  $z$ ,

$$\left| \frac{z}{z+1} \right| = 1$$

Find  $\operatorname{Re}(z)$

**[3 marks]**

---

---

---

---

---

---

---

---

---

---

- 9 (b)** Show that the only solutions of the equation

$$\left( \frac{w}{w+1} \right)^3 = 1$$

are  $w = \frac{e^{\frac{2\pi i}{3}}}{1 - e^{\frac{2\pi i}{3}}}$  and  $w = \frac{e^{-\frac{2\pi i}{3}}}{1 - e^{-\frac{2\pi i}{3}}}$

**[4 marks]**

---

---

---

---

---

---

---

---

**10 (c)** The graph of  $y = f(x)$  has one stationary point.

Without using calculus, find the coordinates of this stationary point.

**[3 marks]**

---

---

---

---

---

---

---

---

---

---

**10 (d)** Sketch the graph of  $y = f(x)$  on the axes below.

**[4 marks]**

**Turn over ►**

**13** The matrix  $\mathbf{M}$  is defined by  $\mathbf{M} = \begin{bmatrix} 1 & -\sqrt{3} \\ \sqrt{3} & 1 \end{bmatrix}$

**13 (a)** The matrix  $\mathbf{M}$  represents an anticlockwise rotation about the origin through an angle  $\theta$ , where  $0 \leq \theta \leq 2\pi$ , followed by an enlargement, scale factor  $r$ , with centre at the origin where  $r$  is a positive integer.

Find the value of  $r$  and the value of  $\theta$

**[3 marks]**

---

---

---

---

---

---

---

---

---

---

**13 (b)** It is given that  $\begin{bmatrix} u \\ v \end{bmatrix} = \mathbf{M} \begin{bmatrix} x \\ y \end{bmatrix}$

Using the value of  $r$  and the value of  $\theta$  which you obtained in part **(a)**, verify that

$$r e^{i\theta} (x + iy) = u + iv$$

**[3 marks]**

---

---

---

---

**14** A children's play area in a park contains a paddling pool.

The outline of the paddling pool is modelled by the polar curve

$$r = 6 + 2\cos(2\theta)$$

where  $r$  is measured in metres.

**Figure 2** shows the outline of the paddling pool.

**Figure 2**

There is a solid concrete island inside the paddling pool.

The boundary of the island is modelled by the polar curve

$$r = 2 + \cos \theta$$

where  $r$  is measured in metres.

**14 (a)** Sketch the boundary of the island on **Figure 2**

**[2 marks]**

---

---

---

---

---

---

16

The diagram shows a design for a table top.

The table top is modelled as being bounded by the lines  $x = 0.5$  and  $x = 1.5$ , and the curves defined by  $y^2 = \frac{0.27}{2x - x^2}$ , where  $x$  and  $y$  are measured in metres.

Find the area of the table top according to this model.

Give your answer in the form  $\frac{\pi\sqrt{p}}{q}$  square metres, where  $p$  and  $q$  are integers.

Fully justify your answer.

- 17** A sample of biological material is placed in a freezer, and the freezer is then turned on.

The initial temperature of the sample is  $38^{\circ}\text{C}$

The temperature  $u^{\circ}\text{C}$  of the freezer, at time  $t$  minutes after it is turned on, is modelled by

$$u = 18 - 2t$$

The temperature  $y^{\circ}\text{C}$  of the sample is modelled as decreasing at a rate which is proportional to the difference between the temperature of the sample and the temperature of the freezer.

Initially, the temperature of the sample is decreasing at a rate of  $0.8^{\circ}\text{C}$  per minute.

- 17(a)** Show that  $y$  satisfies the differential equation

$$\frac{dy}{dt} + 0.04y = 0.72 - 0.08t$$

**[3 marks]**

---

---

---

---

---

---

---

---

---

---

- 17 (b)** Find an expression for  $y$  in terms of  $t$

**[7 marks]**

---

---

---

---

---

**17 (c)** Find the time at which the freezer is 28 °C colder than the sample.

Give your answer in minutes and seconds.

**[4 marks]**
