Paper 5 Probability & Statistics 1

October/November 2024

1 hour 15 minutes

You must answer on the question paper.

You will need: List of formulae (MF19)

INSTRUCTIONS

- Answer **all** questions.
- Use a black or dark blue pen. You may use an HB pencil for any diagrams or graphs.
- Write your name, centre number and candidate number in the boxes at the top of the page.
- Write your answer to each question in the space provided.
- Do **not** use an erasable pen or correction fluid.
- Do **not** write on any bar codes.
- If additional space is needed, you should use the lined page at the end of this booklet; the question number or numbers must be clearly shown.
- You should use a calculator where appropriate.
- You must show all necessary working clearly; no marks will be given for unsupported answers from a calculator.
- Give non-exact numerical answers correct to 3 significant figures, or 1 decimal place for angles in degrees, unless a different level of accuracy is specified in the question.

INFORMATION

- The total mark for this paper is 50.
- The number of marks for each question or part question is shown in brackets [].

This document has **12** pages. Any blank pages are indicated.

* 0000800000002 *

1 30% of the residents of Wimfield own an electric car. Three residents are chosen at random.

- (a) Find the probability that either all three own an electric car or none of them owns an electric car. [2]

This image shows a blank sheet of white paper with ten horizontal dashed lines, typical of primary-ruled notebook paper. The lines are evenly spaced and extend across the width of the page. There is no handwriting or other markings on the paper.

A random sample of 125 of the residents of Wimfield is selected.

- (b) Use a suitable approximation to find the probability that more than 45 of these residents own an electric car. [5]

- 3 In Molimba, the heights, in cm, of adult males are normally distributed with mean 176 cm and standard deviation 4.8 cm.

- (a) Find the probability that a randomly chosen adult male in Molimba has a height greater than 170 cm. [3]

.....

.....

.....

.....

.....

.....

.....

.....

.....

60% of adult males in Molimba have a height between 170 cm and k cm, where k is greater than 170.

- (b) Find the value of k , giving your answer correct to 1 decimal place. [4]

- 4 On a certain day, the heights of 150 sunflower plants grown by children at a local school are measured, correct to the nearest cm. These heights are summarised in the following table.

Height (cm)	10–19	20–29	30–39	40–44	45–49	50–54	55–59
Frequency	10	18	32	42	28	14	6

- (a) Draw a cumulative frequency graph to illustrate the data. [4]

- (b) Use your graph to estimate the 30th percentile of the heights of the sunflower plants. [2]

.....

.....

- (c) Calculate estimates for the mean and the standard deviation of the heights of the 150 sunflower plants. [5]

[illegible]

- 5 A factory produces chocolates. 30% of the chocolates are wrapped in gold foil, 25% are wrapped in red foil and the remainder are unwrapped.

Indigo chooses 8 chocolates at random from the production line.

- (a) Find the probability that she obtains no more than 2 chocolates that are wrapped in red foil. [3]

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

Jake chooses chocolates one at a time at random from the production line.

- (b) Find the probability that the first time he obtains a chocolate that is wrapped in red foil is before the 7th choice. [2]

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

Keifa chooses chocolates one at a time at random from the production line.

- (c) Find the probability that the second chocolate chosen is the first one wrapped in gold foil given that the fifth chocolate chosen is the first unwrapped chocolate. [5]

This image shows a full page of white paper with horizontal dotted lines. The lines are evenly spaced and run across the width of the page, providing a guide for handwriting practice. There are no margins, text, or other markings on the page.

- (c) Find the number of different arrangements of the 9 letters in the word HAPPINESS in which the two Ps are together and there are exactly two letters between the two Ss. [4]

This image shows a blank sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

The 9 letters in the word HAPPINESS are divided at random into a group of 5 and a group of 4.

- (d) Find the probability that both Ps are in one group and both Ss are in the other group. [3]
