**Wednesday 9 October 2019**

Morning (Time: 1 hour 30 minutes)

Paper Reference **WMA11/01**

**Mathematics**

**International Advanced Subsidiary/Advanced Level  
Pure Mathematics P1**

**You must have:**

Mathematical Formulae and Statistical Tables (Lilac), calculator

Total Marks

**Candidates may use any calculator permitted by Pearson regulations. Calculators must not have the facility for symbolic algebra manipulation, differentiation and integration, or have retrievable mathematical formulae stored in them.**

### Instructions

- Use **black** ink or ball-point pen.
- If pencil is used for diagrams/sketches/graphs it must be dark (HB or B).
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Answer **all** questions and ensure that your answers to parts of questions are clearly labelled.
- Answer the questions in the spaces provided  
– *there may be more space than you need.*
- You should show sufficient working to make your methods clear. Answers without working may not gain full credit.
- Inexact answers should be given to three significant figures unless otherwise stated.

### Information

- A booklet 'Mathematical Formulae and Statistical Tables' is provided.
- There are 11 questions in this question paper. The total mark for this paper is 75.
- The marks for **each** question are shown in brackets  
– *use this as a guide as to how much time to spend on each question.*

### Advice

- Read each question carefully before you start to answer it.
- Try to answer every question.
- Check your answers if you have time at the end.
- If you change your mind about an answer, cross it out and put your new answer and any working underneath.

1/1/1

  
**Pearson**

3. In this question you must show all stages of your working.  
Solutions relying on calculator technology are not acceptable.

Figure 2

Figure 2 shows a sketch of the curve  $C$  with equation  $y = x^2 - 5x + 13$

The point  $M$  is the minimum point of  $C$ .

The straight line  $l$  passes through the origin  $O$  and intersects  $C$  at the points  $M$  and  $N$  as shown.

Find, showing your working,

- (a) the coordinates of  $M$ , (3)

- (b) the coordinates of  $N$ . (5)

Figure 3

Figure 3 shows the curve  $C$  and the line  $l$ . The finite region  $R$ , shown shaded in Figure 3, is bounded by  $C$ ,  $l$  and the  $y$ -axis.

- (c) Use inequalities to define the region  $R$ . (2)

10.

Figure 6

Figure 6 shows a sketch of part of the curve with equation  $y = f(x)$ , where

$$f(x) = (2x + 5)(x - 3)^2$$

- (a) Deduce the values of  $x$  for which  $f(x) \leq 0$  (2)

The curve crosses the  $y$ -axis at the point  $P$ , as shown.

- (b) Expand  $f(x)$  to the form

$$ax^3 + bx^2 + cx + d$$

where  $a$ ,  $b$ ,  $c$  and  $d$  are integers to be found.

(3)

- (c) Hence, or otherwise, find

- (i) the coordinates of  $P$ ,
- (ii) the gradient of the curve at  $P$ . (2)

The curve with equation  $y = f(x)$  is translated two units in the positive  $x$  direction to a curve with equation  $y = g(x)$ .

- (d) (i) Find  $g(x)$ , giving your answer in a simplified factorised form.
- (ii) Hence state the  $y$  intercept of the curve with equation  $y = g(x)$ . (3)
