

# Mark Scheme (Results)

October 2020

Pearson Edexcel International A Level in Statistics S2 (WST02/01)

### **Edexcel and BTEC Qualifications**

Edexcel and BTEC qualifications are awarded by Pearson, the UK's largest awarding body. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information visit our qualifications websites at <u>www.edexcel.com</u> or <u>www.btec.co.uk</u>. Alternatively, you can get in touch with us using the details on our contact us page at <u>www.edexcel.com/contactus</u>.

#### Pearson: helping people progress, everywhere

Pearson aspires to be the world's leading learning company. Our aim is to help everyone progress in their lives through education. We believe in every kind of learning, for all kinds of people, wherever they are in the world. We've been involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for our commitment to high standards and raising achievement through innovation in education. Find out more about how we can help you and your students at: <a href="https://www.pearson.com/uk">www.pearson.com/uk</a>

# **General Marking Guidance**

- All candidates must receive the same treatment. Examiners must mark the first candidate in exactly the same way as they mark the last.
- Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.
- Examiners should mark according to the mark scheme not according to their perception of where the grade boundaries may lie.
- There is no ceiling on achievement. All marks on the mark scheme should be used appropriately.
- All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.
- Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification may be limited.
- Crossed out work should be marked UNLESS the candidate has replaced it with an alternative response.

## EDEXCEL IAL MATHEMATICS

### **General Instructions for Marking**

- 1. The total number of marks for the paper is 75.
- 2. The Edexcel Mathematics mark schemes use the following types of marks:
- M marks: method marks are awarded for 'knowing a method and attempting to apply it', unless otherwise indicated.
- A marks: Accuracy marks can only be awarded if the relevant method (M) marks have been earned.
- **B** marks are unconditional accuracy marks (independent of M marks)
- Marks should not be subdivided.
- 3. Abbreviations

These are some of the traditional marking abbreviations that will appear in the mark schemes.

- bod benefit of doubt
- ft follow through
- the symbol will be used for correct ft
- cao correct answer only
- cso correct solution only. There must be no errors in this part of the question to obtain this mark
- isw ignore subsequent working
- awrt answers which round to
- SC: special case
- oe or equivalent (and appropriate)
- dep dependent
- indep independent
- dp decimal places
- sf significant figures
- **\*** The answer is printed on the paper
- The second mark is dependent on gaining the first mark
- 4. All A marks are 'correct answer only' (cao.), unless shown, for example, as A1 ft to indicate that previous wrong working is to be followed through. After a misread however, the subsequent A marks affected are treated as A ft, but manifestly absurd answers should never be awarded A marks.
- 5. For misreading which does not alter the character of a question or materially simplify it, deduct two from any A or B marks gained, in that part of the question affected.
- 6. Ignore wrong working or incorrect statements following a correct answer.

Question Number		Scheme	Marks
1 (a)	$\int_{1}^{2} k \left(\frac{1}{2}x\right)^{2}$	$^{3}-3x^{2}+ax+1$ )dx[=1]	M1
	$k\left[\frac{1}{8}x^4-\right]$	$x^{3} + \frac{1}{2}ax^{2} + x \Big]_{1}^{2} [=1]$	A1
	k(2-8+	$-2a+2$ ) $-k\left(\frac{1}{8}-1+\frac{1}{2}a+1\right)=1$ or $k(2a-4)-k\left(\frac{1}{8}+\frac{1}{2}a\right)=1$	dM1
	$-\frac{33}{8}k + \frac{33}{8}k + 3$	$\frac{3}{2}ka = 1$ : $k(12a - 33) = 8*$	A1 *
			(4)
(b)		$k\left(\frac{3}{2}x^2 - 6x + a\right)$	M1
	$\frac{3}{2}x^2 - 6$	$5x + 5 = 0$ or $\frac{4}{9}x^2 - \frac{16}{9}x + \frac{40}{27} = 0$	dM1
	$x = \frac{6 \pm \sqrt{2}}{2}$	$\frac{\sqrt{6^2 - 4 \times 1.5 \times 5}}{3}$	M1
	$x = 2 - \frac{1}{2}$	$\frac{\sqrt{6}}{3}$ oe or 1.183 awrt 1.18	A1
			(4)
		Notes	Total 8
1(a)	M1	Attempting to integrate $f(x)$ , (at least one term $x^n \rightarrow x^{n+1}$ ). Ignore limits. No Need to a	equate to 1
	A1	Fully correct integration. Allow not simplified. Ignore limits and accept any letters. A No Need to equate to 1	Allow $+ C$
	dM1	Dep on 1 <sup>st</sup> M1. Subst in correct limits, subtracting results and equate to 1 Allow if the <i>C</i> the use of $F(2) = 1$ and $F(1) = 0$ to form 2 equations and solve to eliminate -	+ C
	A1*	Answer is given. Correct solution only. At least one correct line of working required $k(2a-4)-k(\frac{1}{8}+\frac{1}{2}a)=1$ and the final given answer.	between
(b)	M1	Attempting to differentiate $f(x)$ , (at least one term $x^n \to x^{n-1}$ ). Condone missing k or i value for k	ncorrect
	dM1	Dependent on first Method mark being awarded. Putting their differential (or multiple May be implied by awrt 1.18 or awrt 2.82	
	M1	Correct method for solving their 3 term quadratic equation. May be implied by awrt	1.18 or
		awrt 2.82 Minimum for method if final answer is incorrect is of the form $\frac{6\pm\sqrt{6}}{3}$	
	A1	Allow equivalent exact answer. awrt 1.18 Must eliminate the 2.816 or clearly indi of the 2 solutions is their answer	cate which
