GCE AS/A LEVEL

2305U10-1

MONDAY, 12 MAY 2025 – AFTERNOON

**FURTHER MATHEMATICS – AS unit 1
FURTHER PURE MATHEMATICS A**

1 hour 30 minutes

ADDITIONAL MATERIALS

In addition to this examination paper, you will need:

- a Formula Booklet;
- a calculator.

INSTRUCTIONS TO CANDIDATES

Use black ink or black ball-point pen. Do not use gel pen or correction fluid.

You may use a pencil for graphs and diagrams only.

Write your name, centre number and candidate number in the spaces at the top of this page.

Answer **all** questions.

Write your answers in the spaces provided in this booklet. If you run out of space, use the additional page(s) at the back of the booklet, taking care to number the question(s) correctly.

INFORMATION FOR CANDIDATES

The maximum mark for this paper is 70.

The number of marks is given in brackets at the end of each question or part-question.

Sufficient working must be shown to demonstrate the **mathematical** method employed.

Answers without working may not gain full credit.

Unless the degree of accuracy is stated in the question, answers should be rounded appropriately.

You are reminded of the necessity for good English and orderly presentation in your answers.

For Examiner's use only		
Question	Maximum Mark	Mark Awarded
1	13	
2	14	
3	10	
4	5	
5	11	
6	6	
7	11	
Total	70	

JUN252305U10101

Reminder: Sufficient working must be shown to demonstrate the **mathematical** method employed.

1. The function f is defined by $f(x) = x^3 - 8x^2 + 25x - 26$.

(a) Show that $f(3 - 2i) = 0$. You must show all your working.

This image shows a full page of white paper with horizontal dotted lines. The lines are evenly spaced and run across the width of the page, providing a guide for handwriting practice. There are no margins, text, or other markings on the page.

2. Three points, A , B , C , are such that $A(3, 2, 5)$, $B(4, 0, 1)$, and $C(-3, 2, 0)$.
The line L_1 passes through the points A and B , and the line L_2 passes through the points A and C .

- (a) Show that the line L_1 has the vector equation $\mathbf{r} = 3\mathbf{i} + 2\mathbf{j} + 5\mathbf{k} + \lambda(\mathbf{i} - 2\mathbf{j} - 4\mathbf{k})$ and find a vector equation for the line L_2 . [3]

- (ii) Find the distance from the point C to the plane $2x - 3y + z = 13$. [2]

3. (a) Given that $A_r = \frac{5}{r-1} - \frac{4}{r} - \frac{1}{r+1}$ for $r \geq 2$, find an expression for $\sum_{r=2}^n A_r$, in the form $\frac{a}{2} + \frac{b}{n} + \frac{c}{n+1}$, where a, b, c are integers to be found. [5]

Examiner
only

[5]

[illegible]

4. The complex number z is given by $z = 7 - 24i$. By writing $\sqrt{z} = a + ib$, where a, b are real, find the two values of $\sqrt{z}$. [5]
