

GCE A LEVEL MARKING SCHEME

SUMMER 2019

**A LEVEL (NEW)
FURTHER MATHEMATICS
UNIT 6 FURTHER MECHANICS B
1305U60-1**

INTRODUCTION

This marking scheme was used by WJEC for the 2019 examination. It was finalised after detailed discussion at examiners' conferences by all the examiners involved in the assessment. The conference was held shortly after the paper was taken so that reference could be made to the full range of candidates' responses, with photocopied scripts forming the basis of discussion. The aim of the conference was to ensure that the marking scheme was interpreted and applied in the same way by all examiners.

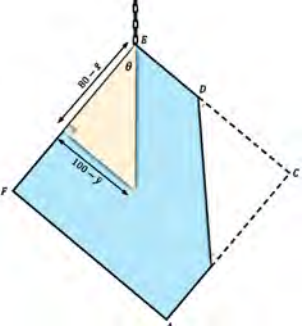

It is hoped that this information will be of assistance to centres but it is recognised at the same time that, without the benefit of participation in the examiners' conference, teachers may have different views on certain matters of detail or interpretation.

WJEC regrets that it cannot enter into any discussion or correspondence about this marking scheme.

GCE FURTHER MATHEMATICS
A2 UNIT 6 FURTHER MECHANICS B
SUMMER 2019 MARK SCHEME

Q1	Solution	Mark	Notes
(a)	<p>(i) $980 = 80 + 0 \cdot 1v^2$ $v^2 = 9000$ $v = 30\sqrt{10} = 94 \cdot 868 \dots$ (ms^{-1})</p> <p>(ii) Apply N2L, $980 - (80 + 0 \cdot 1v^2) = 360a$</p> $360v \frac{dv}{dx} = 900 - 0 \cdot 1v^2$ $3600v \frac{dv}{dx} = 9000 - v^2$	<p>M1</p> <p>A1</p> <p>M1</p> <p>A1</p> <p>A1</p> <p>[5]</p>	<p>At max. speed, $a = 0$</p> <p>cao</p> <p>Dim. correct, Fully correct equation (or $980\,000 - 80\,000 - 100v^2 = 360\,000a$)</p> <p>Convincing</p>
(b)	$3600 \int \frac{v}{9000 - v^2} dv = \int dx$ $-\frac{3600}{2} \ln 9000 - v^2 = x \quad (+C)$ <p>When $x = 0, v = 0$</p> $-\frac{3600}{2} \ln 9000 = C$ $x = 1800 \ln 9000 - 1800 \ln 9000 - v^2 $ $\frac{x}{1800} = \ln \left \frac{9000}{9000 - v^2} \right $ $\frac{9000}{9000 - v^2} = e^{\frac{x}{1800}}$ $9000 - v^2 = 9000e^{-\frac{x}{1800}}$ $v^2 = 9000 \left(1 - e^{-\frac{x}{1800}} \right)$	<p>M1</p> <p>A1</p> <p>A1</p> <p>m1</p> <p>A1</p> <p>m1</p> <p>A1</p> <p>[7]</p>	<p>Separate variables including attempt to integrate</p> <p>$\ln 9000 - v^2$</p> <p>Everything correct</p> <p>Use of initial conditions</p> <p>cao</p> <p>inversion</p> <p>oe, cao</p>
(c)	<p>When $v = 85,$</p> $x = 1800 \ln \left \frac{9000}{9000 - (85)^2} \right $ <p>$x = 2922.1634 \dots$</p> <p>$x = 2923 \text{ m}$ or $x = 2 \cdot 923 \text{ km}$</p>	<p>M1</p> <p>A1</p> <p>[2]</p>	<p>Used in expression for v^2 or x</p> <p>Accept use of inequalities.</p> <p>cao</p>

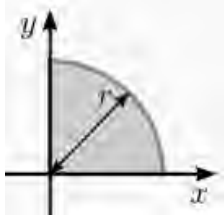

(d)	Appropriate explanation, e.g. <ul style="list-style-type: none">• When $v = 30\sqrt{10}$ (or $v^2 = 9000$) we get division by zero in expression for x• $v = 30\sqrt{10}$ is a limiting value	E1 [1]
