Paper 5 Probability & Statistics 1

For examination from 2020

SPECIMEN PAPER

1 hour 15 minutes

You must answer on the question paper.

You will need: List of formulae (MF19)

INSTRUCTIONS

- Answer **all** questions.
- Use a black or dark blue pen. You may use an HB pencil for any diagrams or graphs.
- Write your name, centre number and candidate number in the boxes at the top of the page.
- Write your answer to each question in the space provided.
- Do **not** use an erasable pen or correction fluid.
- Do **not** write on any bar codes.
- If additional space is needed, you should use the lined page at the end of this booklet; the question number or numbers must be clearly shown.
- You should use a calculator where appropriate.
- You must show all necessary working clearly; no marks will be given for unsupported answers from a calculator.
- Give non-exact numerical answers correct to 3 significant figures, or 1 decimal place for angles in degrees, unless a different level of accuracy is specified in the question.

INFORMATION

- The total mark for this paper is 50.
- The number of marks for each question or part question is shown in brackets [].

This document has **14** pages. Blank pages are indicated.

1 The following back to back stem-and leaf diagram shows the annual salaries of a group of 9 females and 9 males.

Females			Males	
4	5200	0	3	1
9	988764000	1	0 07	3
8	87533100	2	004566	6
6	642100	3	0 02335677	9
6	754000	4	0112556889	10
4	9500	5	3457789	7
2	50	6	046	3

Key 2 0 3 means 2 0 3 females and 6 0 3 males.

(a) Find the mean and the quartiles of the females' salaries. [2]

. . .
 . . .
 . . .

You are given that the mean salary of the males is \$ 0 the lower quartile is \$ 0 and the upper quartile is \$ 50

(b) Draw a pair of back to back stem-and leaf diagrams in a suitable diagram to represent the data. [3]

3

2 A summary of the speed, x kilometres per hour, of 2 cars passing a certain point on the following information

$$\sum(x - 5) = 3 \text{ and } \sum(x - 5)^2 = 8$$

Find the variance of the speed and the efficient value of $\sum x^2$. [4]

3 A club sold 6 paperback and 2 hardback books to Mrs Hunt. She chooses 4 of these books at random to take with her on holiday. The random variable X represents the number of paperback books she chooses.

(a) Show that the probability that she chooses exactly 4 paperback books is $\frac{3}{14}$. [2]

(b) Draw up the probability distribution table for X . [3]

4 A petrol station finds that its daily sales, in litres, are normally distributed with mean 9 and standard deviation 0.

(a) Find the maximum number of days in a year (365 days) that the daily sales can be expected to exceed 9 litres. [4]

The daily sales at another petrol station are X litres, where X is normally distributed with mean m and standard deviation σ . It is given that $P(X > 9) = 0.05$.

(b) Find the value of m . [3]

5 A fair six sided die, with its faces marked 1, 2, 3, 4, 5 and 6, is thrown 100 times.

(a) Use an appropriate method of estimation to estimate the probability that a 3 is obtained fewer than 15 times. [4]

6. A group of friends travels to the airport to meet their parents, and each car park for 45 seconds.

(a) The friends divide themselves into two groups of 4 and a group of 2 for tax. The group of 4 pay the same tax.

Find the number of different ways in which his car can be parked. [3]

Each taxi can take 1 passenger in the front and 3 passengers in the back (see diagram). Mark seats in the front of taxi P and mark seats in the back of taxi P as to be occupied.

(b) Find the number of different seating arrangements that are possible for the friends. [4]

7 Bag A contains 4 balls marked red 2, 4, 5, 8. Bag B contains 5 balls marked red 1, 3, 6, 8, 8. Bag C contains 7 balls marked red 1, 2, 2, 2, 2, 2, 2. A ball is selected at random from each bag.

- Event X is 'exactly two of the selected balls have the same number'.
- Event Y is 'the ball selected from bag A has number 4'.

(a) Find $P(X)$. [5]
