Summer 2013

GCE Statistics 3 (6691/01)

Edexcel and BTEC Qualifications

Edexcel and BTEC qualifications come from Pearson, the world's leading learning company. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information, please visit our website at www.edexcel.com.

Our website subject pages hold useful resources, support material and live feeds from our subject advisors giving you access to a portal of information. If you have any subject specific questions about this specification that require the help of a subject specialist, you may find our Ask The Expert email service helpful.

Pearson: helping people progress, everywhere

Our aim is to help everyone progress in their lives through education. We believe in every kind of learning, for all kinds of people, wherever they are in the world. We've been involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for our commitment to high standards and raising achievement through innovation in education. Find out more about how we can help you and your students at: www.pearson.com/uk

General Marking Guidance

- All candidates must receive the same treatment. Examiners must mark the first candidate in exactly the same way as they mark the last.
- Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.
- Examiners should mark according to the mark scheme not according to their perception of where the grade boundaries may lie.
- There is no ceiling on achievement. All marks on the mark scheme should be used appropriately.
- All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.
- Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification may be limited.
- Crossed out work should be marked UNLESS the candidate has replaced it with an alternative response.

EDEXCEL GCE MATHEMATICS

General Instructions for Marking

1. The total number of marks for the paper is 75.
2. The Edexcel Mathematics mark schemes use the following types of marks:
 - **M** marks: method marks are awarded for 'knowing a method and attempting to apply it', unless otherwise indicated.
 - **A** marks: accuracy marks can only be awarded if the relevant method (M) marks have been earned.
 - **B** marks are unconditional accuracy marks (independent of M marks)
 - Marks should not be subdivided.
3. Abbreviations

These are some of the traditional marking abbreviations that will appear in the mark schemes:

- bod – benefit of doubt
 - ft – follow through
 - the symbol \surd will be used for correct ft
 - cao – correct answer only
 - cso - correct solution only. There must be no errors in this part of the question to obtain this mark
 - isw – ignore subsequent working
 - awrt – answers which round to
 - SC: special case
 - oe – or equivalent (and appropriate)
 - dep – dependent
 - indep – independent
 - dp decimal places
 - sf significant figures
 - * The answer is printed on the paper
 - \square The second mark is dependent on gaining the first mark
4. All A marks are 'correct answer only' (cao.), unless shown, for example, as A1 ft to indicate that previous wrong working is to be followed through. After a misread however, the subsequent A marks affected are treated as A ft, but manifestly absurd answers should never be awarded A marks.
 5. For misreading which does not alter the character of a question or materially simplify it, deduct two from any A or B marks gained, in that part of the question affected.
 6. If a candidate makes more than one attempt at any question:
 - If all but one attempt is crossed out, mark the attempt which is NOT crossed out.
 - If either all attempts are crossed out or none are crossed out, mark all the attempts and score the highest single attempt.
 7. Ignore wrong working or incorrect statements following a correct answer.
 8. In some instances, the mark distributions (e.g. M1, B1 and A1) printed on the candidate's response may differ from the final mark scheme.

Question Number	Scheme				Marks																																				
<p>1.</p> <p>H_0 : Cholesterol level is independent of intake of saturated fats(no association) H_1 : Cholesterol level is not independent of intake of saturated fats (association)</p> <table border="1" data-bbox="284 506 1134 801"> <thead> <tr> <th>O</th> <th>E</th> <th>$\frac{(O-E)^2}{E}$</th> <th>$\frac{O^2}{E}$</th> </tr> </thead> <tbody> <tr> <td>12</td> <td>7.6</td> <td>2.547... or $\frac{242}{95}$</td> <td>18.947... or $\frac{360}{19}$</td> </tr> <tr> <td>8</td> <td>12.4</td> <td>1.56129... or $\frac{242}{155}$</td> <td>5.161... or $\frac{160}{31}$</td> </tr> <tr> <td>26</td> <td>30.4</td> <td>0.6368... or $\frac{121}{190}$</td> <td>22.236... or $\frac{845}{38}$</td> </tr> <tr> <td>54</td> <td>49.6</td> <td>0.3903... or $\frac{121}{310}$</td> <td>58.790... or $\frac{3645}{62}$</td> </tr> </tbody> </table> <p>$\sum \frac{(O-E)^2}{E} = 5.1358234..$ or $\frac{1.2^2}{7.6} + \frac{8^2}{12.4} + \frac{26^2}{30.4} + \frac{54^2}{49.6} - 100 = 5.14$ (awrt 5.14)</p> <p>$\nu = (2-1)(2-1) = 1$</p> <p>$\chi_1^2(0.05) = 3.841$</p> <p>$5.14 > 3.841$ so sufficient evidence to reject H_0 [Condone “accept H_1”]</p> <p>Association between cholesterol level and saturated fat intake</p>	O	E	$\frac{(O-E)^2}{E}$	$\frac{O^2}{E}$	12	7.6	2.547... or $\frac{242}{95}$	18.947... or $\frac{360}{19}$	8	12.4	1.56129... or $\frac{242}{155}$	5.161... or $\frac{160}{31}$	26	30.4	0.6368... or $\frac{121}{190}$	22.236... or $\frac{845}{38}$	54	49.6	0.3903... or $\frac{121}{310}$	58.790... or $\frac{3645}{62}$	<table border="1"> <thead> <tr> <th>Cholesterol Level</th> <th>High</th> <th>Low</th> <th></th> </tr> </thead> <tbody> <tr> <td>High</td> <td>7.6</td> <td>12.4</td> <td>20</td> </tr> <tr> <td>Low</td> <td>30.4</td> <td>49.6</td> <td>80</td> </tr> <tr> <td></td> <td>38</td> <td>62</td> <td>100</td> </tr> </tbody> </table>	Cholesterol Level	High	Low		High	7.6	12.4	20	Low	30.4	49.6	80		38	62	100				<p>M1A1</p> <p>(2)</p>

Notes																																									
<p>Minimum working use part marks: E_i (2), Hyp (1), 5.14 (3), 3.841 (2), Conclusion (2)</p> <p>1st M1 for some use of $\frac{\text{Row Total} \times \text{Col.Total}}{\text{Grand Total}}$. May be implied by correct E_i</p> <p>1st A1 for all expected frequencies correct. Allow M1A0 for E_i rounded to integers</p> <p>1st B1 for both hypotheses. Must mention “cholesterol” and “fats” at least once Use of “relationship” or “correlation” or “connection” is B0</p> <p>2nd dM1 for at least 2 correct terms (as in 3rd or 4th column) or correct expressions with their E_i Dependent on 1st M1 Accept 2sf accuracy for the M mark</p> <p>2nd A1 for all correct terms. May be implied by a correct ans.(2 dp or better) Allow truncation eg 2.54... 3rd A1 for awrt 5.14</p> <p>2nd B1 for correct degrees of freedom (may be implied by a cv of 3.841)</p> <p>3rd M1 for a correct statement linking their test statistic and their cv(cv could be 2.705 or > 3.5) Contradictory statements score M0 e.g. “significant, do not reject H_0”</p> <p>4th A1 for a correct comment in context - must mention “cholesterol” and “fats” condone “relationship” or “connection” here but not “correlation”. e.g. “There is evidence of a relationship between cholesterol level and fat intake” No follow through. If e.g hypotheses are the wrong way round A0 here.</p>																																									

Question Number	Scheme									Marks
2(a)	Uni	A	B	C	D	E	F	G		M1A1A1
	Staff-Stu	2	4	3	5	7	1	6		
	Satisfaction	3	2	6	4	5	1	7		
	[d]	-1	2	-3	1	2	0	-1		
	d^2	1	4	9	1	4	0	1	20	
	$r_s = 1 - \frac{6 \times 20}{7(49-1)} = 0.642857\dots \quad \left(\text{accept } \frac{9}{14} \right) \quad \text{(awrt } \mathbf{0.643} \text{)}$									dM1A1 (5)
(b)	<p>$H_0: \rho = 0$ $H_1: \rho \neq 0$ ($\rho > 0$) Critical value is ± 0.7857 (± 0.7143 for a one tailed test) $0.643 < cv$ so insufficient evidence to reject H_0 There is insufficient evidence to suggest a (positive) correlation between staff-student ratio and satisfaction.</p>									B1 B1 B1ft (3) Total 8
Notes										
(a)	<p>1st M1 for an attempt to rank the staff-students ratio <u>or</u> satisfaction (at least 4 correct) 1st A1 for correct rankings for both (one or both may be reversed) 2nd A1 for $\sum d^2 = 20$ or correct d^2 row (NB $\sum d^2 = 92$ for one set of reversed ranks) 2nd dM1 for use of the correct formula, follow through their $\sum d^2$ (Dependent on 1st M1) If answer is not correct, a correct expression is required. 3rd A1 If $\sum d^2 = 20$ for awrt 0.643 <u>or</u> if $\sum d^2 = 92$ for awrt -0.643 (accept $\pm \frac{9}{14}$)</p>									
(b)	<p>1st B1 for both hypotheses in terms of ρ, one tail H_1 must be compatible with their ranking Hypotheses just in words e.g. “no correlation” score B0 2nd B1 for cv of 0.7857 <u>or</u> 0.7143 for one-tailed test (accept \pm) Their cv must be compatible with their H_1 which may be in words If hypotheses are the wrong way around this must be B0 but 3rd B1 is possible. 3rd B1ft for a correct contextualised comment. Must mention “ratio” or “no. of students per member of staff” <u>and</u> “satisfaction” Follow through their r_s and their cv (provided it is $cv < 1$) Don’t insist on the word “positive” for a one-tailed test Use of “association” is B0 Independent of 1st B1 so if $r_s > cv$ must say there is sufficient evidence of(o.e.) and if $r_s < cv$ must say insufficient evidence of ... (o.e.) regardless of their hypotheses Contradictory statements score B0 (This mark is just testing interpretation of comparison of their r_s and their cv)</p>									

Question Number	Scheme	Marks
<p>3(a)i e.g.</p> <p>3(a)ii e.g.</p> <p>3(b)</p> <p>3(c)</p>	<p>Quota Sampling: Advantages: Fieldwork can be done quickly, <u>or</u> administering the test is easy, <u>or</u> costs are kept to a minimum (cheap), <u>or</u> gives estimates for each course. <u>or</u> OK for large populations <u>or</u> sampling frame not required (o.e.) Disadvantages: Non-random process <u>or</u> not possible to estimate the sampling errors, <u>or</u> non response not recorded, <u>or</u> interviewer can introduce bias in sample choice. (o.e.)</p> <p>Stratified Sampling: Advantages: Can give accurate estimates as it is a random process, <u>or</u> gives estimates for each course <u>or</u> representative of [BUT not “proportional” to] the whole population. (o.e.) Disadvantages: Sampling frame required, <u>or</u> strata may not be clear as some students overlap courses <u>or</u> not suitable for large populations. (o.e.)</p> <p>Total enrolments=1000 (may be implied by calculations) Leisure and Sport=$\frac{420}{1000} \times 100 = 42$ Information Technology=$\frac{337}{1000} \times 100 = 33.7 = 34$ Health and Social Care=$\frac{200}{1000} \times 100 = 20$ Media Studies=$\frac{43}{1000} \times 100 = 4.3 = 4$</p> <p>The college’s information system would be used to identify each student and which course they are enrolled on. i.e. idea of sampling frame or list for each course. Use of random numbers to select required number of students from each course</p>	<p>B1</p> <p>B1</p> <p>B1</p> <p>M1</p> <p>A1</p> <p>B1</p> <p>B1</p> <p>(2)</p> <p>(3)</p> <p>(2)</p> <p>Total 7</p>
Notes		
<p>(a)</p> <p>(b)</p> <p>(c)</p>	<p style="text-align: center;">Do not penalise for lack of context in part (a)</p> <p>1st B1 for an advantage and a disadvantage for quota sampling (must be 1st or labelled (i)) 2nd B1 for an advantage and a disadvantage for stratified sampling (2nd or labelled (ii)) Do not allow opposite pairs e.g. “quicker/easier” for quota sampling and “takes a long time/more difficult” for stratified <u>or</u> quota “easy to use” but strat. “hard for large populations” Do not allow same reason for both e.g. “gives estimates for each course”</p> <p>M1 for one correct calculation, ft their “1000” A1 for 42, 34, 20 and 4 only</p> <p>1st B1 for some mention of a suitable <u>sampling frame</u>. Need not give the specific term but a suitable source of <u>list</u> is required for all students <u>in each course</u>. 2nd B1 for mentioning use of <u>random numbers</u> or some random selection process <u>for each course</u>. If they are describing systematic sampling score B0 here</p>

	Notes	
<p>(a)</p> <p>1st & 2nd B1 for hypotheses. Accept μ_1, μ_2 or μ_A, μ_B etc if there is some indication of which is which e.g. $A \sim N(\mu_A, 0.5)$</p> <p>1st M1 for an attempt at se. Condone switching 0.5 and 0.75</p> <p>1st A1 for a correct expression for denominator of test statistic or 0.138... or $\sqrt{0.0190\dots}$</p> <p>2nd A1 for a correct numerator of test statistic (must have the - 1)</p> <p>3rd A1 for awrt 3.62 [Allow - 3.62 from numerator of $5.5 - 7 - - 1$ and compatible H_1]</p> <p>3rd B1 for ± 1.6449 seen <u>or</u> probability of 0.0002 (tables) or 0.000145...(calc) [allow 0.0001]</p> <p>2nd dM1 dep. on 1st M1 for a correct statement based on their normal cv and their test statistic</p> <p>2nd A1 for correct comment in context. Must mention “yield” <u>and</u> “varieties” or “old” and “new” <u>and</u> “1” If second B mark is B0 award A0 here</p> <p>ALT Pooled estimate: If they calculate $s_p = \sqrt{0.41845\dots} = 0.64688\dots$ allow 1st M1, 1st A1 for expression (or awrt 0.114) and 2nd A1 if numerator correct but A0 for test statistic (4.39)</p> <p>(b)</p> <p>1st B1 for mention of <u>mean</u> (yield) and <u>normal</u> (distribution) 2nd B1 for mention of <u>sample</u> (size) being <u>large</u> in <u>this case</u></p>		

Question Number	Scheme	Marks
7 (a)	$\hat{\mu} = \bar{x} = \frac{33.29}{8} = 4.16125 \quad (\text{awrt } \mathbf{4.16})$ $\hat{\sigma}^2 = s^2 = \frac{4.12^2 + 5.12^2 + \dots - 8 \times \bar{x}^2}{7}$ $\hat{\sigma}^2 = s^2 = \frac{141.4035 - 138.528013}{7} = 0.41078\dots \quad (\text{awrt } \mathbf{0.411})$	B1 M1 A1 (3)
(b)	$\sum x = 33.29 + 32 \times 4.55 = 178.89, \quad (\text{awrt } \mathbf{179})$ $\sum x^2 = "141.4035" + 31 \times 0.25 + 32 \times 4.55^2 (= 811.6335) \quad (\text{awrt } \mathbf{812})$	B1 M1A1
	$\text{Combined sample: } s^2 = \frac{811.6335 - \frac{178.89^2}{40}}{39} = 0.29724865\dots \quad (\text{awrt } \mathbf{0.297})$	M1A1
	$\frac{s}{\sqrt{n}} = \frac{\sqrt{0.297\dots}}{\sqrt{40}} = 0.0862 \quad (\text{awrt } \mathbf{0.0862})$	M1A1 (7)
(c)	$\bar{x} \pm 1.96 \frac{\sigma}{\sqrt{n}} = \frac{178.89}{40} \pm 1.96 \frac{0.67}{\sqrt{40}}$ $= (4.2646\dots, 4.67988\dots) \quad \text{awrt } (\mathbf{4.26}[\text{or } 4.265], \mathbf{4.68})$	M1B1 A1 (3)
	Notes	Total 13
(a)	<p>M1 for an attempt at s^2: correct denom, clear attempt at $\sum x^2$ and ft their \bar{x} Ans only 2/2</p>	
(b)	<p>B1 for correct sum or mean or fully correct expression (accept mean = awrt 4.47) May be in (c) 1st M1 for their $141.4035 + 31 \times 0.25 + 32 \times 4.55^2$ or "141.4035" + 7.75 + 662.48 (accept 3sf) Beware: $32(0.25 + 4.55^2) + "141.4035"$ = awrt 812 but scores M0A0. 1st A1 for a fully correct expression (all to 3sf or better) or answer only = awrt 812 2nd M1 for a correct expression using their values 3rd M1 dependent on using a changed s^2 (not their 0.411 or 0.25) for $\frac{\sqrt{"0.297"}}{\sqrt{40}}$ This s^2 must be based on a <u>combination</u> of their 0.411 and 0.25 e.g. 0.661</p>	
(c)	<p>M1 for $\bar{x} \pm z \times \frac{\sigma}{\sqrt{n}}$ for any $z (> 1.5)$ and ft their \bar{x} based on combining their 4.16 and 4.55, do not award for simply using 4.55 or their 4.16. Condone $\sigma = \sqrt{\text{their } 0.297}$ or their (b) B1 for $z = 1.96$ used in an attempt at a CI, may for example miss \sqrt{n} A1 for both limits awrt 3sf. Allow lower limit of 4.265</p>
