43601H Unit 1: Higher
Mark scheme

4360
November 2016

Version/Stage: 1.0 Final

Mark schemes are prepared by the Lead Assessment Writer and considered, together with the relevant questions, by a panel of subject teachers. This mark scheme includes any amendments made at the standardisation events which all associates participate in and is the scheme which was used by them in this examination. The standardisation process ensures that the mark scheme covers the students' responses to questions and that every associate understands and applies it in the same correct way. As preparation for standardisation each associate analyses a number of students' scripts: alternative answers not already covered by the mark scheme are discussed and legislated for. If, after the standardisation process, associates encounter unusual answers which have not been raised they are required to refer these to the Lead Assessment Writer.

It must be stressed that a mark scheme is a working document, in many cases further developed and expanded on the basis of students' reactions to a particular paper. Assumptions about future mark schemes on the basis of one year's document should be avoided; whilst the guiding principles of assessment remain constant, details will change, depending on the content of a particular examination paper.

Further copies of this Mark Scheme are available from aqa.org.uk

## Glossary for Mark Schemes

GCSE examinations are marked in such a way as to award positive achievement wherever possible. Thus, for GCSE Mathematics papers, marks are awarded under various categories.

If a student uses a method which is not explicitly covered by the mark scheme the same principles of marking should be applied. Credit should be given to any valid methods. Examiners should seek advice from their senior examiner if in any doubt.

M Method marks are awarded for a correct method which could lead to a correct answer.

A

B Marks awarded independent of method.
ft Follow through marks. Marks awarded for correct working following a mistake in an earlier step.

SC Special case. Marks awarded for a common misinterpretation which has some mathematical worth.

M dep $\quad$ A method mark dependent on a previous method mark being awarded.

B dep A mark that can only be awarded if a previous independent mark has been awarded.

Oe
Or equivalent. Accept answers that are equivalent. e.g. accept 0.5 as well as $\frac{1}{2}$
$[\boldsymbol{a}, \boldsymbol{b}] \quad$ Accept values between $a$ and $b$ inclusive.
[a,b) Accept values $a \leq$ value $<b$
$3.14 \ldots \quad$ Accept answers which begin 3.14 e.g. 3.14, 3.142, 3.1416

Q Marks awarded for quality of written communication

Use of brackets It is not necessary to see the bracketed work to award the marks.

Examiners should consistently apply the following principles

## Diagrams

Diagrams that have working on them should be treated like normal responses. If a diagram has been written on but the correct response is within the answer space, the work within the answer space should be marked. Working on diagrams that contradicts work within the answer space is not to be considered as choice but as working, and is not, therefore, penalised.

## Responses which appear to come from incorrect methods

Whenever there is doubt as to whether a candidate has used an incorrect method to obtain an answer, as a general principle, the benefit of doubt must be given to the candidate. In cases where there is no doubt that the answer has come from incorrect working then the candidate should be penalised.

## Questions which ask candidates to show working

Instructions on marking will be given but usually marks are not awarded to candidates who show no working.

## Questions which do not ask candidates to show working

As a general principle, a correct response is awarded full marks.

## Misread or miscopy

Candidates often copy values from a question incorrectly. If the examiner thinks that the candidate has made a genuine misread, then only the accuracy marks ( $A$ or $B$ marks), up to a maximum of 2 marks are penalised. The method marks can still be awarded.

## Further work

Once the correct answer has been seen, further working may be ignored unless it goes on to contradict the correct answer.

## Choice

When a choice of answers and/or methods is given, mark each attempt. If both methods are valid then M marks can be awarded but any incorrect answer or method would result in marks being lost.

## Work not replaced

Erased or crossed out work that is still legible should be marked.

## Work replaced

Erased or crossed out work that has been replaced is not awarded marks.

## Premature approximation

Rounding off too early can lead to inaccuracy in the final answer. This should be penalised by 1 mark unless instructed otherwise.

## Continental notation

Accept a comma used instead of a decimal point (for example, in measurements or currency), provided that
it is clear to the examiner that the candidate intended it to be a decimal point.

| $\mathbf{Q}$ | Answer | Mark | Comments |
| :--- | :---: | :---: | :---: |

| 1(a) | Appropriate key B1 |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  | Stem 4, 5, 6, 7 | B1 | or 7, 6, 5, 4 |  |
|  | Leaves correct and ordered $\begin{array}{llll} 0 & 7 & & \\ 1 & 2 & 5 & 6 \\ 0 & 1 & 3 & 4 \\ 2 & 5 & & \\ \hline \end{array}$ | B1 | Must match the order of their stem if present eg if 7, 6, 5, 4 leaves should be```5 2 943 1 0 6521 70``` |  |
|  | Appropriate alignment of leaves | Q1ft | ft their single digit leaves <br> Strand (ii) <br> Logical organised working so row lengths show the distribution |  |
|  | Additional Guidance |  |  |  |
|  | For the Q mark: <br> - Leaves may be unordered and/or incorrect (but need at least 11) <br> - Leaves must be single digit <br> - Lengths of rows need to correspond to their number of leaves ie row with most leaves should be longest etc |  |  |  |
|  | The Q mark is independent so B0B0B0Q1ft is possible |  |  |  |
|  | Ignore lines/ commas between numbers which may be working for (b) |  |  |  |
|  | If not crossed out and replaced, mark the stem-and-leaf on the grid |  |  |  |

| 3(a) | $\frac{1}{10}$ | B1 |  |
| :---: | :---: | :---: | :---: |

| $\mathbf{Q}$ | Answer | Mark | Comments |
| :---: | :---: | :---: | :---: |

| 5 | $\frac{1}{5} \times 45$ or 9 or $\frac{1}{5} \times 2.75$ or 0.55 or $\frac{4}{5}$ seen | M1 | oe |  |
| :---: | :---: | :---: | :---: | :---: |
|  | 45 - their 9 or $\frac{4}{5} \times 45$ or 36 or $\frac{4}{5} \times 3.20$ or 2.56 | M1dep | oe |  |
|  | $\frac{1}{5} \times 45 \times 2.75$ or 24.75 <br> or $\frac{4}{5} \times 45 \times 3.20 \text { or } 115.2(0)$ | M1 | Allow $\frac{1}{5} \times 45 \times 3.20$ or $28.8(0)$ and $\frac{4}{5} \times 45 \times 2.75$ or 99 |  |
|  | 139.95 | A1 | SC3 127.8(0) |  |
|  | Additional Guidance |  |  |  |
|  | $9 \times(3.20+2.75)$ |  |  | M1 M0 M0 |
|  | 24.75 |  |  | M1 M0 M1 |
|  | 115.2(0) |  |  | M1 M1 M1 |

| 6(a) | 90, 200, 355, 400 | B1 | Must be in part (a) |
| :---: | :---: | :---: | :---: |

| $\mathbf{Q}$ | Answer | Mark | Comments |
| :--- | :---: | :---: | :---: |

| 6(b) | Plotted at UCBs ( $\pm 1 / 2$ square) | M1 | Plotted at 30,50, 65, 80, 100 Allow one error or omission Increasing non-linear function |  |
| :---: | :---: | :---: | :---: | :---: |
|  | Heights correct ( $\pm 11 / 2$ square) | M1 | 50 , ft their 90 , their 200 , their 355 , their 400 Allow one error or omission Increasing non-linear function |  |
|  | Smooth curve or polygon through points ( $\pm 1 / 2$ square) | A1ft | ft M0 M1 or M1 M0 and all five of their points within class boundaries Increasing non-linear function |  |
|  | Additional Guidance |  |  |  |
|  | Condone any attempt to join the graph to the axis before the first point |  |  |  |
|  | If only bars drawn, may gain the heights mark |  |  | M0 M1 A0 |
|  | If bars and cumulative frequency graph drawn, mark the cumulative frequency graph |  |  |  |
|  | Plotted within class boundaries eg using midpoints and joined |  |  | M0 M1 A1ft |

| 7 | $7.6 \times 5$ or 38 | M1 | Five numbers 6.5, $x, y, z, 9.9$ where $x+y+z=21.6$ implies M1 M1dep |  |
| :---: | :---: | :---: | :---: | :---: |
|  | their 38-6.5-9.9 or 21.6 | M1dep |  |  |
|  | their $21.6 \div 3$ or 7.2 or $7.4 \times 3 \text { or } 22.2$ | M1 |  |  |
|  | 7.2 and Beth or 21.6 and 22.2 and Beth | A1 |  |  |
|  |  | ditional | uidance |  |
|  | If an incorrect difference bet ignore it and treat it as furthe | mean sco | s or totals is worked out then |  |
|  | 7.2 and no decision or 7.2 | osen |  | M3 A0 |
|  | 21.6 seen |  |  | M1 M1dep |

| Q Answer | Mark | Comments |
| :---: | :---: | :---: | :---: |

| 8 | 0.25 or 0.75 seen or 123 | M1 | oe Allow 123.75 or 124 from $n+1=165$ |
| :---: | :--- | :---: | :--- |
|  | 41 | A1 | Allow 41.25 or 41 from $n+1=165$ |
|  | Additional Guidance |  |  |
|  | Recognition that upper quartile represents a quarter may be on diagram |  |  |
|  | $0.25 \times 164=41$, more than $72=40$ | M1 A0 |  |

| 8(b) | Alternative method 1 |  |  |
| :---: | :---: | :---: | :---: |
|  | $190-\frac{164}{2}$ or 108 or 190 - their $41 \times 2$ | M1 | oe <br> ft their answer to (a) but not 82 |
|  | 216 | A1ft | ft $2 \times(190-$ their $41 \times 2)$ only but not 82 |
|  | Alternative method 2 |  |  |
|  | $190 \times 2$ or 380 | M1 |  |
|  | 216 | A1 |  |

| or $\frac{340}{1500} \times 75$ or $\frac{260}{1500} \times 75$ |  |  |
| or $25(.1)$ or 19.9 or 20 or 17 or 13 |  |  |
| $\frac{502+398}{1500} \times 75$ or $\frac{900}{1500} \times 75$ and |  |  |
| $\frac{340+260}{1500} \times 75$ or $\frac{600}{1500} \times 75$ <br> or 45 and 30 <br> or $\frac{502}{1500} \times 75$ and $\frac{398}{1500} \times 75$ and <br> $\frac{340}{1500} \times 75$ and $\frac{260}{1500} \times 75$ <br> or $25(.1)$ and 19.9 or 20 <br> and 17 and 13 |  | oe |
| 15 | $45: 30$ is M2 |  |

| Q Answer | Mark | Comments |
| :---: | :---: | :---: | :---: |

Question 10 continues on the next page

| 11(a) | Alternative method 1 |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  | $\begin{aligned} & 0.9 \times 30 \text { or } 27 \text { or } \\ & 1.5 \times 10 \text { or } 15 \text { or } \\ & 0.6 \times 30 \text { or } 18 \end{aligned}$ | M1 |  |  |
|  | $0.9 \times 30+1.5 \times 10+0.6 \times 30(=60)$ | A1 | Must show full method |  |
|  | Alternative method 2 |  |  |  |
|  | (Square $=$ ) $0.25 \times 10$ or 2.5 or <br> (Small square $=$ ) $0.05 \times 2$ or 0.1 | M1 |  |  |
|  | $\begin{aligned} & 0.25 \times 10 \times 24(=60) \text { or } \\ & 0.05 \times 2 \times 600(=60) \end{aligned}$ | A1 | Must show full method |  |
|  | Additional Guidance |  |  |  |
|  | Only $27+15+18=60$ |  |  | M1 A0 |
|  | Addition may be implied by vertical column and total |  |  |  |

| $\mathbf{Q}$ | Answer | Mark | Comments |
| :---: | :---: | :---: | :---: |

| 11(b) | Midpoints seen or implied $15,35,55$ | B1 | Must be seen or used in part (b) Condone one error |  |
| :---: | :---: | :---: | :---: | :---: |
|  | their $27 \times 15$ or 405 or their $15 \times 35$ or 525 or their $18 \times 55$ or 990 or 1920 | M1 | ft their frequencies from (a) and their midpoints |  |
|  | ```(their 405 + their 525 + their 990)\div60 or their 1920\div60``` | M1dep | Condone bracket error |  |
|  | 32 | A1 |  |  |
|  | Additional Guidance |  |  |  |
|  | Consistent use of UCBs for midpoints can score both method marks eg $(27 \times 30+15 \times 40+18 \times 70) \div 60$ |  |  | $\begin{aligned} & \text { B0 M1 } \\ & \text { M1 A0 } \end{aligned}$ |
|  | NB Reference to the median or working for the median$27+3 \div 15 \times 10=32$ |  |  | $\begin{aligned} & \text { BO MO } \\ & \text { MO AO } \end{aligned}$ |

| $\mathbf{1 1 ( c )}$ | $\frac{12}{\text { their } 18}$ or $\frac{\text { their } 18-12}{\text { their } 18}$ | M1 | oe <br> ft their 18 from (a) |
| :--- | :--- | :--- | :--- |
|  | 50 | A1 | SC1 13(.33) <br> Accept [50,51.67] |

| Q Answer | Mark | Comments |
| :---: | :---: | :---: | :---: |

| $\mathbf{1 2 ( a )}$ | $\frac{10}{100}$ and $\frac{9}{99}$ or $\frac{n}{100} \times \frac{n-1}{99}$ | M1 | oe 0.1 and $0.0909 \ldots$ or $\frac{1}{10}$ and $\frac{1}{11}$ |  |
| :--- | :--- | :--- | :--- | :--- |
|  | $\frac{90}{9900}$ or $\frac{1}{110}$ or 0.009... | A1 | oe |  |
|  | Additional Guidance |  |  | M1 A0 |
|  | $\frac{10}{100}+\frac{9}{99}=\frac{21}{110}$ |  |  |  |
|  | Ignore any incorrect cancelling or change of form once correct answer seen |  |  |  |

| $\mathbf{Q}$ | Answer | Mark | Comments |
| :---: | :---: | :---: | :---: |

## Alternative method 1

| $\frac{12}{100} \times \frac{88}{99}$ or $\frac{88}{100} \times \frac{12}{99}$ | M1 | oe |
| :--- | :--- | :--- |
| or $\frac{1056}{9900}$ or $\frac{8}{75}$ or $0.1066 \ldots$ |  |  |
| $\frac{12}{100} \times \frac{88}{99}+\frac{88}{100} \times \frac{12}{99}$ | M1dep | oe |
| $\frac{2112}{9900}$ or $\frac{16}{75}$ or $0.213 \ldots$ | A 1 | oe |

## Alternative method 2

12(b)

| $\frac{12}{100} \times \frac{78}{99}$ and $\frac{12}{100} \times \frac{10}{99}$ |  |  |
| :--- | :--- | :--- |
| or $\frac{78}{100} \times \frac{12}{99}$ and $\frac{10}{100} \times \frac{12}{99}$ | M1 | oe |
| or $\frac{936}{9900}$ and $\frac{120}{9900}$ |  |  |
| or $\frac{26}{275}$ and $\frac{2}{165}$ | M1dep | oe |
| $\frac{12}{100} \times \frac{78}{99}+\frac{12}{100} \times \frac{10}{99}+\frac{78}{100} \times$ |  |  |
| $\frac{12}{99}+\frac{12}{100} \times \frac{1}{99}$ | A1 | oe |
| $\frac{2112}{9900}$ or $\frac{16}{75}$ or $0.213 \ldots$ |  |  |
