CANDIDATE NAME					
CENTRE NUMBER			CANDIDATE NUMBER		

MATHEMATICS 0980/22

Paper 2 (Extended) May/June 2021

1 hour 30 minutes

You must answer on the question paper.

You will need: Geometrical instruments

INSTRUCTIONS

- Answer all questions.
- Use a black or dark blue pen. You may use an HB pencil for any diagrams or graphs.
- Write your name, centre number and candidate number in the boxes at the top of the page.
- Write your answer to each question in the space provided.
- Do not use an erasable pen or correction fluid.
- Do not write on any bar codes.
- You should use a calculator where appropriate.
- You may use tracing paper.
- You must show all necessary working clearly.
- Give non-exact numerical answers correct to 3 significant figures, or 1 decimal place for angles in degrees, unless a different level of accuracy is specified in the question.
- For π , use either your calculator value or 3.142.

INFORMATION

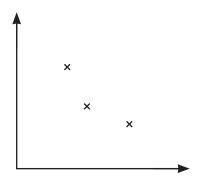

- The total mark for this paper is 70.
- The number of marks for each question or part question is shown in brackets [].

This document has 16 pages. Any blank pages are indicated.

The probability that	Jane wins	a gam	ne is $\frac{7}{1}$	$\frac{7}{0}$.									
(a) Find the probab	oility that J	Jane do	oes no	ot win t	the gai	ne.

.....[1]

5 (a) Henrik draws this scatter diagram.

Put a ring around the **one** correct statement about this scatter diagram.

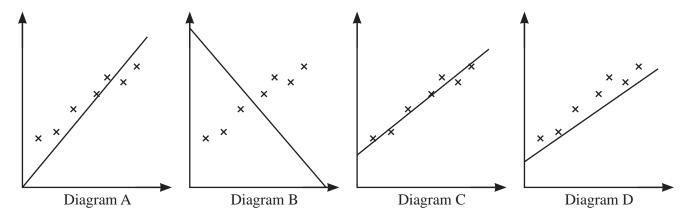

It shows no correlation.

It is not possible to tell if there is correlation as there are not enough points. It shows negative correlation.

It shows positive correlation.

[1]

(b) Each of the four scatter diagrams shows the same set of data. A line has been drawn on each diagram.

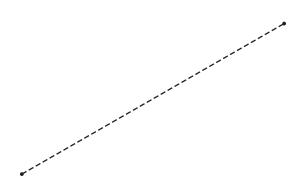

Complete the statement.

The line in Diagram is the most appropriate line of best fit. [1]

6 A rhombus has side length 6.5 cm.
The rhombus can be constructed by drawing two triangles.

Using a ruler and compasses only, construct the rhombus. Leave in your construction arcs.

One diagonal of the rhombus has been drawn for you.

[2]

7 (a) Complete these statements.

The reciprocal of 0.2 is

(b) $\frac{7}{5}$ 0.6 $\sqrt{7}$ 8 $\sqrt{9}$

From this list, write down an irrational number.

.....[1]

$$a = \frac{b^2}{5c}$$

Find b when a = 5.625 and c = 2.

$$b = \dots$$
 [2]

9 Without using a calculator, work out $\frac{2}{3} \div 1\frac{3}{7}$.

You must show all your working and give your answer as a fraction in its simplest form.

10 (a) Write 0.00654 in standard form.

(b) The number 1.467×10^{102} is written as an ordinary number.

Write down the number of zeros that follow the digit 7.

11 Write $0.\dot{0}\dot{4}$ as a fraction in its simplest form.

.....[1]

12 (a) $\mathscr{E} = \{\text{integers greater than 2}\}$

 $A = \{\text{prime numbers}\}\$

 $B = \{ \text{odd numbers} \}$

 $C = \{ \text{square numbers} \}$

(i) Describe the type of numbers in the set $B' \cap C$.

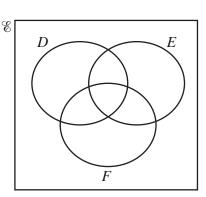

(ii) Complete the set labels on the Venn diagram.

[1]

(b)

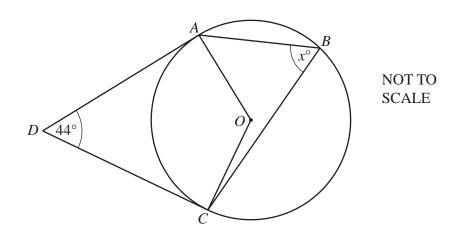

Shade the region $D' \cup (E \cap F)'$.

[1]

7

13

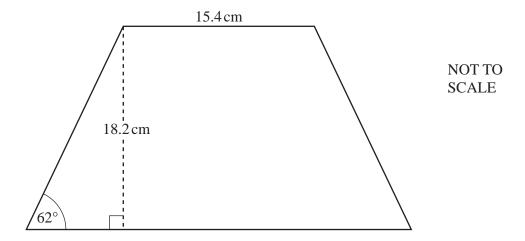

A, B and C are points on a circle, centre O. DA and DC are tangents. Angle $ADC = 44^{\circ}$.

Work out the value of x.

$$x = \dots [3]$$

14

The diagram shows a trapezium.

The trapezium has one line of symmetry.

Work out the area of the trapezium.

		2	[4]
 	 	. cm	141

15 Complete the table showing information about the congruence of pairs of triangles. The first two rows have been completed for you.

All diagrams are not to scale.

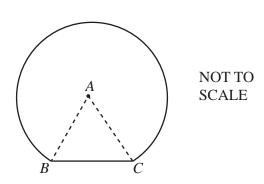

Pair of triangles	Congruent or not congruent	Congruence criterion
60° 25° 6cm 60°	Congruent	ASA
3.4 cm 4 cm 3 cm 3.4 cm	Not congruent	None
6.5 cm 6.5 cm 7 cm 6.5 cm		
4.5 cm 5 cm 4 cm 4.5 cm		
5.2 cm 5.2 cm 65°		

16	A is	the point $(5, 7)$ and B is the point $(9, -1)$.	
	(a)	Find the length AB.	
	(b)	Find the equation of the line <i>AB</i> .	[3]
17	Fino	d the gradient of the line that is perpendicular to the line $3y = 4x - 5$.	[3]
			[2]

18
$$f(x) = x^2 - 25$$
 $g(x) = x + 4$
Solve $fg(x+1) = gf(x)$.

$$x =$$
 [4]

19 (a)

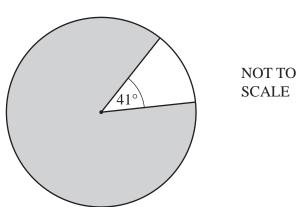

The diagram shows a shape made from an equilateral triangle ABC and a sector of a circle. Points B and C lie on the circle, centre A.

The side length of the equilateral triangle is 12.4cm.

Work out the perimeter of the shape.

......cm [3]

(b)

The diagram shows two sectors of a circle.

The major sector is shaded.

The area of the major sector is $74.5\,\mathrm{cm}^2$.

Calculate the radius of the circle.

.....cm [3]

20					
	(.	(x-2)(2x+5)(x+3)			
					[3]
21	The force of attraction, F distance, d cm, between the		o magnets is inve	ersely proportional	to the square of the
	When $d = 1.5$, $F = 48$.				
	(a) Find an expression for	or F in terms of d .			
			F	=	[2]
	(b) When the distance be	etween the two magne	ts is doubled the	new force is n time	es the original force.
	Work out the value o	f <i>n</i> .			

22	Simplify.	
		$2x^2 - 5x - 12$
		$3r^2 - 12r$

[2

23 Find all the solutions of $4\sin x = 3$ for $0^{\circ} \le x \le 360^{\circ}$.

24 Solve.

$$\frac{1}{x+1} + \frac{9}{x+9} = 1$$

$$x =$$
...... or $x =$ [5]
