# Mark Scheme (Results) 

Summer 2013

GCSE Mathematics (Linear) 1MA0 Higher (Calculator) Paper 2H

## Edexcel and BTEC Qualifications

Edexcel and BTEC qualifications come from Pearson, the world's leading learning company. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information visit our qualifications websites at www.edexcel.com or www.btec.co.uk for our BTEC qualifications.
Alternatively, you can get in touch with us using the details on our contact us page at www.edexcel.com/contactus.

If you have any subject specific questions about this specification that require the help of a subject specialist, you can speak directly to the subject team at Pearson.
Their contact details can be found on this link: www.edexcel.com/teachingservices.

You can also use our online Ask the Expert service at www.edexcel.com/ask. You will need an Edexcel username and password to access this service.

## Pearson: helping people progress, everywhere

Our aim is to help everyone progress in their lives through education. We believe in every kind of learning, for all kinds of people, wherever they are in the world. We've been involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for our commitment to high standards and raising achievement through innovation in education. Find out more about how we can help you and your students at: www.pearson.com/uk

## NOTES ON MARKI NG PRI NCI PLES

1 All candidates must receive the same treatment. Examiners must mark the first candidate in exactly the same way as they mark the last.

Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.

All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e if the answer matches the mark scheme. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.

Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification may be limited.

Crossed out work should be marked UNLESS the candidate has replaced it with an alternative response.
6 Mark schemes will indicate within the table where, and which strands of QWC, are being assessed. The strands are as follows:
i) ensure that text is legible and that spelling, punctuation and grammar are accurate so that meaning is clear Comprehension and meaning is clear by using correct notation and labeling conventions.
ii) select and use a form and style of writing appropriate to purpose and to complex subject matter Reasoning, explanation or argument is correct and appropriately structured to convey mathematical reasoning.
iii) organise information clearly and coherently, using specialist vocabulary when appropriate.

The mathematical methods and processes used are coherently and clearly organised and the appropriate mathematical vocabulary used.

## With working

If there is a wrong answer indicated on the answer line always check the working in the body of the script (and on any diagrams), and award any marks appropriate from the mark scheme.
If working is crossed out and still legible, then it should be given any appropriate marks, as long as it has not been replaced by alternative work.
If it is clear from the working that the "correct" answer has been obtained from incorrect working, award 0 marks. Send the response to review, and discuss each of these situations with your Team Leader.
If there is no answer on the answer line then check the working for an obvious answer.
Any case of suspected misread loses $A$ (and $B$ ) marks on that part, but can gain the $M$ marks. Discuss each of these situations with your Team Leader.
If there is a choice of methods shown, then no marks should be awarded, unless the answer on the answer line makes clear the method that has been used.

Follow through marks
Follow through marks which involve a single stage calculation can be awarded without working since you can check the answer yourself, but if ambiguous do not award.
Follow through marks which involve more than one stage of calculation can only be awarded on sight of the relevant working, even if it appears obvious that there is only one way you could get the answer given.

9 I gnoring subsequent work
It is appropriate to ignore subsequent work when the additional work does not change the answer in a way that is inappropriate for the question: e.g. incorrect canceling of a fraction that would otherwise be correct
It is not appropriate to ignore subsequent work when the additional work essentially makes the answer incorrect e.g. algebra.
Transcription errors occur when candidates present a correct answer in working, and write it incorrectly on the answer line; mark the correct answer.

## Probability

Probability answers must be given a fractions, percentages or decimals. If a candidate gives a decimal equivalent to a probability, this should be written to at least 2 decimal places (unless tenths)
Incorrect notation should lose the accuracy marks, but be awarded any implied method marks
If a probability answer is given on the answer line using both incorrect and correct notation, award the marks.
If a probability fraction is given then cancelled incorrectly, ignore the incorrectly cancelled answer.

## Linear equations

Full marks can be gained if the solution alone is given on the answer line, or otherwise unambiguously indicated in working (without contradiction elsewhere). Where the correct solution only is shown substituted, but not identified as the solution, the accuracy mark is lost but any method marks can be awarded.

## Parts of questions

Unless allowed by the mark scheme, the marks allocated to one part of the question CANNOT be awarded in another.

## Range of answers

Unless otherwise stated, when an answer is given as a range (e.g 3.5-4.2) then this is inclusive of the end points (e.g 3.5, 4.2) and includes all numbers within the range (e.g 4, 4.1)

## Guidance on the use of codes within this mark scheme

```
M1 - method mark
A1 - accuracy mark
B1 - Working mark
C1 - communication mark
QWC - quality of written communication
oe - or equivalent
cao - correct answer only
ft - follow through
sc - special case
dep - dependent (on a previous mark or conclusion)
indep - independent
isw - ignore subsequent working
```

| :---: | :---: | :---: | :---: | :---: | :---: |
| Question |  | Working | Answer | Mark | Notes |
| 3 | (a) |  | Points plotted at $(1,8200)$ and $(3.5,5000)$ | 1 | B1 for points accurately plotted $\pm 1 / 2$ square tolerance |
|  | (b) |  | 'the older the car the lower the value' 'the greater the value the newer the car' | 1 | B1 for an acceptable relationship eg. 'the older the car the lower the value' (accept 'negative correlation' but not just 'negative') |
|  | (c) |  | 5200 to 6600 | 2 | M1 for a single line segment with negative gradient that could be used as a line of best fit or a vertical line from 2.5 or a point at $(2.5, y)$ where $y$ is from 5200 to 6600 A1 for given answer in the range $5200-6600$ |
| 4 |  |  | 126 | 3 | M1 for 1-0.05-0.32 (= 0.63) |
|  |  |  |  |  | M1 for ' 0.63 ' $\times 200$ |
|  |  |  |  |  | A1 cao |
|  |  |  |  |  | OR |
|  |  |  |  |  | M1 for $0.05 \times 200(=10)$ or $0.32 \times 200(=64)$ or $0.37 \times$ |
|  |  |  |  |  | M1 for 200 - ' 10 ' - ' 64 ' |
|  |  |  |  |  | A1 cao |
|  |  |  |  |  | OR |
|  |  |  |  |  | M1 for 100-5-32 (= 63) |
|  |  |  |  |  | $\text { M1 for } \frac{" 63 "}{100} \times 200$ |
|  |  |  |  |  | M1 $100 \times 200$ |
|  |  |  |  |  | A1 cao |
|  |  |  |  |  | SC: B2 for $\frac{126}{200}$ as the answer. |

| PAPER: 1 |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Question |  | Working | Answer | Mark | Notes |
| 5 | (a) |  | Response boxes overlap and are not exhaustive | 2 | B2 for TWO aspects from: No time frame given Non-exhaustive responses Response boxes over-lapping (B1 for ONE correct aspect) |
|  | (b) |  | How many magazines do you buy each month? $0-4 \quad 5-8$ over 8 | 2 | B1 for a question with a time frame B1 for at least 3 correctly labelled response boxes (nonoverlapping, need not be exhaustive) or for a set of response boxes that are exhaustive (could be overlapping) <br> [Do not allow inequalities in response boxes] |
|  | (c) |  | One reason | 1 | B1 for ONE reason <br> Eg. All the same age, may all be males, may all like same types of magazines, sample too small, biased |
| 6 |  |  | 4.8 | 4 | M1 for $60 \times 60$ (=3600) <br> M1 for $15000 \div 20(=750)$ or $20 \div 15000(=0.00133$..) or <br> " $3600 " \div 15000(=0.24)$ or $15000 \div 3600$ " ( $=4.16$..) <br> M1 for " 3600 " $\div(15000 \div 20)$ or " 3600 " $\times 20 \div 15000$ oe A1 cao |

| PAPER: 1MA0_2H |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  | estion | Working | Answer | Mark | Notes |
| 8 |  |  | 10752 | 4 | M1 for splitting the pentagon (or show the recognition of the "absent" triangle) and using a correct method to find the area of one shape <br> M1 for a complete and correct method to find the total area M1 (dep on at least one prev M1) for multiplying their total area by 2.56 (where total area is a calculation involving at least two areas) <br> A1 cao |
| 9 |  |  | 55 | 4 | M1 for a correct method to find a different angle using $35^{\circ}$ M1 for setting up a complete process to calculate angle $x$ A1 cao <br> B1 states one of the following reasons relating to their chosen method: <br> Alternate angles are equal; Corresponding angles are equal; Allied angles / Co-interior angles add up to 180 ; the exterior angle of a triangle is equal to the sum of the interior opposite angles. |

| PAPER: 1MA0_2H |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Question | Working |  | Answer | Mark | Notes |
| 10 |  |  | 4.7 | 4 | B2 for a trial $4.6 \leq x \leq 4.7$ evaluated correctly <br> (B1 for a trial evaluated correctly for $4 \leq x \leq 5$ ) <br> B1 for a different trial evaluated correctly for $4.65 \leq x$ < 4.7 <br> B1 (dep on at least one previous B1) for 4.7 <br> [Note: Trials should be evaluated to at least accuracy shown in table, truncated or rounded] <br> No working scores 0 marks |
|  | $x$ | $x^{3}+2 x$ |  |  |  |
|  | 4 | 72 |  |  |  |
|  | 4.1 | 77.(121) |  |  |  |

| :---: | :---: | :---: | :---: | :---: | :---: |
| Question |  | Working | Answer | Mark | Notes |
| 20 |  | $\begin{aligned} & \cos y=2.25 \div 6 \\ & y=\cos ^{-1}(2.25 \div 6) \end{aligned}$ <br> OR <br> $6 \cos 75=1.55 \ldots$ | The ladder is not safe because $y$ is not near to 75 | 3 | M1 for $\cos y=2.25 \div 6$ oe <br> M1 for $\cos ^{-1}(2.25 \div 6)$ <br> C1 for sight of 67-68 and a statement eg this angle is NOT (near to) $75^{\circ}$ and so the ladder is not steep enough and so not safe. <br> OR <br> M1 for $\cos 75=x \div 6$ <br> M1 for $6 \cos 75$ <br> C1 for sight of 1.55(29...) and a statement eg that 2.25 NOT (near to) 1.55 and so the ladder is not steep enough and so not safe. |
| 21 |  |  | 48 or 49 | 2 | $\begin{aligned} & \text { M1 for } \frac{460}{460+320+165} \times 100(=48.67 \ldots .) \text { or } \frac{460}{9.5} \text { or } \\ & \frac{460}{9.45} \\ & \text { A1 for } 48 \text { or } 49 \end{aligned}$ |
| 22 |  |  | 1.33 | 3 | M1 for $3.4=\frac{k}{5^{2}}$ oe or $3.4 \times 5^{2} \quad(=85)$ M1 for ' $3.4 \times 5^{2}$ ' $\div 8^{2}$ <br> A1 for answer in range 1.32 to 1.33 or $\frac{85}{64}$ |
| 23 |  | $\begin{aligned} & \text { d: } \mathrm{UB}=54.5 \text { (or } 54.499 \text { ), } \mathrm{LB}= \\ & 53.5 \\ & C: \mathrm{UB}=170.5 \text { (or } 170.499 \text { ), } \mathrm{LB} \\ & =169.5 \\ & 170.5 \div 53.5 \\ & 169.5 \div 54.5 \end{aligned}$ | $\begin{gathered} \hline 3.19 \\ 3.11 . \end{gathered}$ | 4 | B1 for any one correct bound quoted <br> M1 for $170.5 \div 53.5$ or $169.5 \div 54.5$ <br> A1 for UB = answer in range 3.18 to 3.19 from correct working <br> A1 for $\mathrm{LB}=3.11$.. from correct working |

| PAPER: 1MA0_2H Question |  |  |  |  | Notes |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | Working | Answer | Mark |  |
| 24 | (a) |  | 18.2 | 2 | M1 for $1 / 2 \times 6 \times 7 \times \sin 60$ <br> A1 for answer in range 18.1 to 18.2 |
|  | (b) |  | 6.56 | 3 | M1 for $6^{2}+7^{2}-2 \times 6 \times 7 \times \cos 60$ M1 for correct order of operation eg $36+49-42(=43)$ <br> A1 for answer in range 6.55 to 6.56 |
| 25 |  |  | $\begin{gathered} x=2.87, y= \\ -0.87 \\ \text { and } \\ x=-0.87, y= \\ 2.87 \end{gathered}$ | 6 | M1 for $x^{2}+(2-x)^{2}=9$ <br> M1 for $4-4 x+x^{2}$ <br> A1 for $2 x^{2}-4 x-5=0$ oe 3 term simplified quadratic <br> M1 for a correct method to solve their quadratic <br> Eg $\quad x=\frac{4 \pm \sqrt{ }(16-4 \times 2 \times-5)}{4}$ <br> A1 for $x=2.87, y=-0.87$ or better <br> A1 for $x=-0.87, y=2.87$ or better <br> Award marks for equivalent algebraic expressions. <br> Apply the same scheme as above for $y$ first. |

## Modifications to the mark scheme for Modified Large Print (MLP) papers.

Only mark scheme amendments are shown where the enlargement or modification of the paper requires a change in the mark scheme.
The following tolerances should be accepted on marking MLP papers, unless otherwise stated below:
Angles: $\pm 5^{\circ}$
Measurements of length: $\pm 5 \mathrm{~mm}$

| PAPER: 1MA0_2H |  |  |  |
| :---: | :---: | :---: | :---: |
| Question |  | Modification | Notes |
| 1 |  | Model as well as diagram provided | Standard mark scheme |
| 3 | (a) | $y$-axis 2 cm for 1000 . $x$-axis 2 cm for $1 / 2$ <br> Table: 8200 changed to 8000 | Points plotted at (1,8000) and (3.5,5000 |
| 8 |  | Braille diagram labelled $\begin{array}{lll} \text { A } & & B \\ \text { E } & & \\ & \text { D } & \text { C } \end{array}$ | Standard mark scheme |
| 12 | (a) | MLP only: $x$ changed to $y$. | Standard mark scheme |
| 13 |  | Crosses at A and B changed to a filled-in circle. Braille: $A B$ is joined with a line. | Standard mark scheme |

## PAPER: 1MA0_2H

| Question |  | Modification | Table: wording added "There are four spaces to fill." <br> $x$-axis 2 cm for $1 / 2 . y$-axis 2 cm for 1. Labelling remains same <br> as on standard paper. |
| :---: | :--- | :--- | :--- |
| 15 |  | Both box plots put on one page and labelled 'Girls' and <br> 'Boys' <br> Girls: LQ changed to 15, UQ changed to 40 <br> Boys: figures changed to 5 20 $\underline{35} 40$ <br> 2 cm grids. | Standard mark scheme |
| 20 |  | 'horizontal ground' and 'vertical wall’ labelled. | Standard mark scheme |
| 24 | Braille: Information about measurements given | Standard mark scheme |  |
