

# Mark Scheme (Results)

# November 2020

Pearson Edexcel International GCSE Mathematics A (4MA1) Paper 1HR

## **Edexcel and BTEC Qualifications**

Edexcel and BTEC qualifications are awarded by Pearson, the UK's largest awarding body. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information visit our qualifications websites at <u>www.edexcel.com</u> or <u>www.btec.co.uk</u>. Alternatively, you can get in touch with us using the details on our contact us page at <u>www.edexcel.com/contactus</u>.

## Pearson: helping people progress, everywhere

Pearson aspires to be the world's leading learning company. Our aim is to help everyone progress in their lives through education. We believe in every kind of learning, for all kinds of people, wherever they are in the world. We've been involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for our commitment to high standards and raising achievement through innovation in education. Find out more about how we can help you and your students at: <u>www.pearson.com/uk</u>

November 2020 Publications Code 4MA1\_1HR\_2011\_MS All the material in this publication is copyright © Pearson Education Ltd 2020 **General Marking Guidance** 

- All candidates must receive the same treatment. Examiners must mark the first candidate in exactly the same way as they mark the last.
- Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.
- Examiners should mark according to the mark scheme not according to their perception of where the grade boundaries may lie.
- There is no ceiling on achievement. All marks on the mark scheme should be used appropriately.
- All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme.

Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.

- Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification may be limited.
- When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the team leader must be consulted.
- Crossed out work should be marked UNLESS the candidate has replaced it with an alternative response.

#### • Types of mark

- M marks: method marks
- A marks: accuracy marks
- B marks: unconditional accuracy marks (independent of M marks)

#### • Abbreviations

- o cao correct answer only
- o ft follow through
- o isw ignore subsequent working
- o SC special case
- oe or equivalent (and appropriate)
- o dep dependent
- o indep independent
- o awrt answer which rounds to
- o eeoo each error or omission

#### • No working

If no working is shown then correct answers normally score full marks If no working is shown then incorrect (even though nearly correct) answers score no marks.

#### • With working

If there is a wrong answer indicated on the answer line always check the working in the body of the script (and on any diagrams), and award any marks appropriate from the mark scheme.

If it is clear from the working that the "correct" answer has been obtained from incorrect working, award 0 marks.

If a candidate misreads a number from the question. Eg. Uses 252 instead of 255; method marks may be awarded provided the question has not been simplified. Examiners should send any instance of a suspected misread to review. If there is a choice of methods shown, mark the method that leads to the answer on the answer line; where no answer is given on the answer line, award the lowest mark from the methods shown.

If there is no answer on the answer line then check the working for an obvious answer.

#### • Ignoring subsequent work

It is appropriate to ignore subsequent work when the additional work does not change the answer in a way that is inappropriate for the question: eg. Incorrect cancelling of a fraction that would otherwise be correct.

It is not appropriate to ignore subsequent work when the additional work essentially makes the answer incorrect eg algebra.

Transcription errors occur when candidates present a correct answer in working, and write it incorrectly on the answer line; mark the correct answer.

#### • Parts of questions

Unless allowed by the mark scheme, the marks allocated to one part of the question CANNOT be awarded to another.

| International G | International GCSE Maths A (4MA1) November 2020 – Paper 1HR Mark scheme  |        |      |   |  |  |  |  |  |
|-----------------|--|--------|------|---|--|--|--|--|--|
| -               | Apart from Questions 1, 3c, 12, 13b, 19, 23 where the mark scheme states otherwise, the correct answer, unless clearly obtained by an incorrect method, should be taken to imply a correct method.   |        |      |   |  |  |  |  |  |
| Q               | Working  | Answer | Mark | Notes   |  |  |  |  |  |
| 1               | e.g. $\frac{15}{4}$  |        | 3    | M1 for $3\frac{3}{4}$ expressed as an improper fraction   |  |  |  |  |  |
|                 | e.g. $\frac{15^5}{4} \times \frac{7}{9^3}$ OR $\frac{105}{36}$ oe  |        |      | M1 correct cancelling or multiplication of<br>numerators and denominators without<br>cancelling   |  |  |  |  |  |
|                 | e.g. $\frac{15^5}{4} \times \frac{7}{9^3} = \frac{35}{12} = 2\frac{11}{12}$<br>or $\frac{15}{4} \times \frac{7}{9} = \frac{105}{36} = \frac{35}{12} = 2\frac{11}{12}$<br>or $\frac{15}{4} \times \frac{7}{9} = \frac{105}{36} = 2\frac{33}{36} = 2\frac{11}{12}$ | shown  |      | A1 dep on M2, for conclusion to $2\frac{11}{12}$ from<br>correct working – either sight of the result of<br>the multiplication e.g. $\frac{105}{36}$ oe must be seen<br><b>or</b> correct cancelling prior to the<br>multiplication to $\frac{35}{12}$<br>NB: use of decimals scores no marks |  |  |  |  |  |
|                 |  |        |      | Total 3 marks   |  |  |  |  |  |

| 2 |                  | 2 | M1 | Arcs on <i>BC</i> , <i>AB</i> and arcs from |
|---|------------------|---|----|---|
|   |                  |   |    | these points meeting <b>or</b> for          |
|   |                  |   |    | bisector without arcs                       |
|   | Correct bisector |   | A1 | must see correct arcs                       |
|   |                  |   |    | Total 2 marks                               |

| 3 | (a) |  | $h^9$ | 1 | B1 |  |
|---|-----|--|-------|---|----|--|
|   | (b) | $(-5)^2 - 4 \times -5$ oe e.g. $25 + 20$   |       | 2 | M1 | for a correct substitution   |
|   |     |  | 45    |   | A1 |  |
|   | (c) | $5x-3 = 4(2x+3)$ oe or $\frac{5x}{4} - \frac{3}{4} = 2x+3$ oe  |       | 3 | M1 | for correctly removing the denominator, condone missing brackets   |
|   |     | e.g. $5x - 8x = 12 + 3$ or $-3x = 12 + 3$<br>or $8x - 5x = -12 - 3$ or $3x = -12 - 3$<br>or $-\frac{3}{4} - 3 = 2x - \frac{5x}{4}$ or $-\frac{15}{4} = \frac{3x}{4}$ |       |   | M1 | for a correct rearrangement with terms in x<br>on one side and numbers on the other,<br>allow correct rearrangement of their equation<br>in the form $ax + b = cx + d$ |
|   |     |  | -5    |   | A1 | dep on at least M1<br>SCB2 for an answer of<br>x = -2 coming from $5x - 3 = 8x + 3or x = 5 coming from 5x - 3 = 2x + 12$   |
|   |     |  |       |   |    | Total 6 marks  |

| 4 | (a) |  | $30 < t \le 40$ | 1 | B1 |   |
|---|-----|--|-----------------|---|----|---|
|   | (b) | e.g. 5 × 4 + 15 × 10 + 25 × 15 + 35 × 25 + 45 × 6 (= 1690)<br>or 20 + 150 + 375 + 875 + 270 (= 1690) |                 | 4 | M2 | For correct products using<br>midpoints (allowing one error)<br>with intention to add.  |
|   |     |  |                 |   |    | If not M2 then award M1 for<br>products using frequency and a<br>consistent value within the range<br>(allowing one error) with intention<br>to add or correct products using<br>midpoint without addition. |
|   |     | "1690" ÷ 60  |                 |   | M1 | dep on M1   |
|   |     |  | 28.2            |   | A1 | accept 28.1 – 28.2  |
|   |     |  |                 |   |    | Total 5 marks   |

| 5 (a) | $8265 - 7500 (= 765)$ or $\frac{8265}{7500} (= 1.102)$ |      | 3 | M1 8265 – 7500 could be embedded<br>in another calculation.                   |
|-------|--|------|---|---|
|       | $\frac{"765"}{7500}$ ×100 oe or "1.102" × 100 – 100 oe |      |   | M1  |
|       |  | 10.2 |   | A1 oe   |
| (b)   | e.g. $31.5(0) \div (1 - 0.3)$                          |      | 3 | M2 for a complete method<br>e.g. $31.5(0) \div (1 - 0.3)$                     |
|       |  |      |   | (M1) for $31.5(0) \div (100 - 30) (= 0.45)$<br>or e.g. $(1 - 0.3)x = 31.5(0)$ |
|       |  | 45   |   | A1  |
|       |  |      |   | Total 6 marks   |

| 6 | e.g. $a = (-3 + 47) \div 2 (= 22)$             |                     | 2 | M1 | for a correct method to find either |
|---|--|---------------------|---|----|-------------------------------------|
|   | or $\frac{11+b}{2} = -19$ (b = -38 - 11 = -49) |                     |   |    | coordinate or one coordinate        |
|   | $\frac{1}{2}$ 2 30 11 15)                      |                     |   |    | correct.                            |
|   | or method to add 25 to $-3$                    |                     |   |    | Look for correct method on their    |
|   | or method to subtract 25 from 47               |                     |   |    | diagram, if used.                   |
|   | or method to subtract 30 from -19              |                     |   |    |                                     |
|   | or method to subtract 60 from 11               |                     |   |    |                                     |
|   |  | $a = 22, \ b = -49$ |   | A1 | both correct                        |
|   |  |                     |   |    | Total 2 marks                       |

| 7 | Use of 2 hrs 42 mins = $2.7$ hrs <b>or</b> 162 mins   |    | 4 | B1 |  |
|---|---|----|---|----|--|
|   | e.g. 90 × 2.7 (= 243) or e.g. $\frac{90}{60} \times 162(= 243)$<br>or e.g. $\frac{S}{90} = \frac{2.7}{3}$ |    |   | M1 | for use of $D = S \times T$ (accept use of<br>their time e.g. $90 \times 2.42$ )<br><b>or</b> for setting up an equation using<br>proportion |
|   | e.g. "243" ÷ 3 or $(S =)$ 90× $\frac{2.7}{3}$   |    |   | M1 | (dep on M1) for their $D \div 3$<br>or for solving their equation  |
|   |   | 81 |   | A1 |  |
|   |   |    |   |    | Total 4 marks  |
