Paper 1 (Non-Calculator)	Foundation Tier					
	Foundation Tier Paper Reference 1MA1/1F					

Instructions

- Use black ink or ball-point pen.
- Fill in the boxes at the top of this page with your name, centre number and candidate number.
- Answer all questions.
- Answer the questions in the spaces provided - there may be more space than you need.
- You must show all your working.
- Diagrams are NOT accurately drawn, unless otherwise indicated.
- Calculators may not be used.

Information

- The total mark for this paper is 80
- The marks for each question are shown in brackets - use this as a guide as to how much time to spend on each question.

Advice

- Read each question carefully before you start to answer it.
- Keep an eye on the time.
- Try to answer every question.
- Check your answers if you have time at the end.

P48527A ©2018 Pearson Education Ltd.

Answer ALL questions.

Write your answers in the spaces provided.

You must write down all the stages in your working.

1 Write 6324 correct to the nearest thousand.

6000

(Total for Question 1 is 1 mark)

(a) Write the following numbers in order of size. Start with the smallest number.

$$-6$$

$$-5$$
 0

12

$$-6, -5, 0, 6, 12$$

(b) Write the following numbers in order of size. Start with the smallest number.

0.78

0.87

0.708

(Total for Question 2 is 2 marks)

3 Write 20% as a fraction.
$$20\% = \frac{20}{100} = \frac{1}{5}$$
.

(Total for Question 3 is 1 mark)

4 Here is a list of four fractions.

$$\frac{4}{16}$$

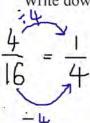

$$\frac{2}{8}$$

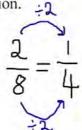

$$\frac{15}{60}$$

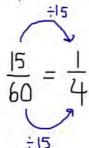

$$\frac{3}{9}$$

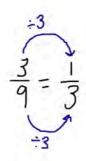

One of these fractions is **not** equivalent to $\frac{1}{4}$

Write down this fraction.

39

(Total for Question 4 is 1 mark)

5 Write down the first even multiple of 7

14 is the first even multiple of 7

(Total for Question 5 is 1 mark)

6 (a) Simplify $3 \times 4t$

12t

(1)

(b) Simplify 8a - 3a + 2a

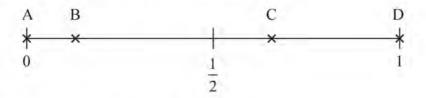

7a

(1)

(Total for Question 6 is 2 marks)

Here is a probability scale.

It shows the probability of each of the events A, B, C and D.

(a) Write down the letter of the event that is certain.

(1)

(b) Write down the letter of the event that is unlikely.

(1)

(3)

There are 12 counters in a bag.

3 of the counters are red.

1 of the counters is blue.

2 of the counters are yellow.

The rest of the counters are green.

Caitlin takes at random a counter from the bag.

(c) Show that the probability that this counter is yellow or green is $\frac{2}{3}$ no. yellow counters = 2 no. green counters = 12-3-1-2 = 6 total no. counters = 12

p(yellow or green) =
$$\frac{p(\text{yellow})}{12} + \frac{p(\text{green})}{12}$$

$$= \frac{2}{12} + \frac{6}{12}$$

$$= \frac{8}{12} = \frac{2}{3}.$$
 (Total for Ouestion 7)

(Total for Question 7 is 5 marks)

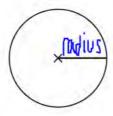

8 3 kg of meat costs £54 Nina buys 2 kg of the meat.

Work out how much Nina pays.

£ 36

(Total for Question 8 is 2 marks)

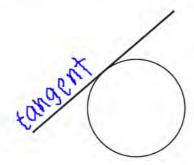

9 The centre of this circle is marked with a cross (×).

(a) Write down the mathematical name of the straight line shown in the circle.

radius

(b) Write down the mathematical name of the straight line that is touching the circle.

tangent

(Total for Question 9 is 2 marks)

10 Tim and three friends go on holiday together for a week.

The 4 friends will share the costs of the holiday equally.

Here are the costs of the holiday.

£1280 for 4 return plane tickets £640 for the villa £220 for hire of a car for the week

Work out how much Tim has to pay for his share of the costs.

plane tickets = £1280 villa = £640 rar hire = £220

total cost of holiday = 1280 640 + 220 2140

total cost of holiday = £2,140
4 people -> each person pays 2140 = £535
Tim pays £535.

, 535

(Total for Question 10 is 3 marks)

statement incorrect

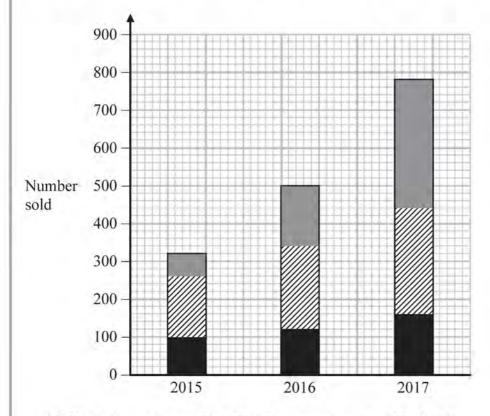

11 Write down an example to show that each of the following	ng two statements is not correct.
(a) The factors of an even number are always even. Example: 6	
factors of 6: (1) 6 2 (3)	
Cland 3 are odd Statement incorrect	<u>(1)</u>
(b) All the digits in odd numbers are odd.	
Example: 23 ligits of 23: 2 3	
C 2 is even	23

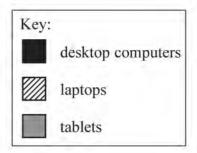

(1)

(Total for Question 11 is 2 marks)

12 A shop sells desktop computers, laptops and tablets.

The composite bar chart shows information about sales over the last three years.

(a) Write down the number of desktop computers sold in 2015

100

(b) Work out the total number of laptops sold in the 3 years.

total no. laptops sold
$$2015$$
: no. sold = $260 - 100 = 160$
 2015 : no. sold = $340 - 120 = 220$
 2017 : no. sold = $440 - 160 = 280$
 2017 : no. sold = $440 - 160 = 280$

660

(c) State the item that had the greatest increase in sales over the 3 years. Give a reason for your answer.

Tablets had the greatest increase in sales. No sold in 2015 = 320 - 260 = 60

No. sold in 2017 = 780 - 440 = 340

Increase in sales = 360-60 = 280

Alternative answer:

(Z)

Tablets. Burs get proportionally larger over time (most in 2017 and least in 2015).

Alex says,

"In 2017, more tablets were sold than desktop computers. This means the shop makes more profit from the sale of tablets than from the sale of desktop computers."

(d) Is Alex correct? You must justify your answer.

Alex is incorrect. We don't know the prices of the items or how much profit the shop.

Makes from the sale of each item.

(I

(Total for Question 12 is 7 marks)

13 A piece of wire is 240 cm long.

Peter cuts two 45 cm lengths off the wire.

He then cuts the rest of the wire into as many 40 cm lengths as possible.

Work out how many 40 cm lengths of wire Peter cuts.

$$\frac{150}{40} = \frac{15}{4} = 3\frac{3}{4} = 3.75$$

Peter cuts 3 40cm lengths.

7

(Total for Question 13 is 3 marks)

14 Gavin, Harry and Isabel each earn the same monthly salary.

Each month,

Gavin saves 28% of his salary and spends the rest of his salary Harry spends $\frac{3}{4}$ of his salary and saves the rest of his salary the amount of salary Isabel saves: the amount of salary she spends = 3:7

Work out who saves the most of their salary each month.

You must show how you get your answer.

Harry: spends
$$\frac{3}{4}$$
 so saves $\frac{1}{4}$ $\frac{1}{4}$ of £1000 = $\frac{1}{4} \times 1000$ = £250

$$\frac{10}{3}$$
 of \$1000 = $\frac{1000}{100} \times 3 = 100 \times 3 = 300

SObel saves the most.

(Total for Question 14 is 4 marks)

15 Work out 15% of 160 grams.
$$\frac{15}{100} \times \frac{160}{100} = \frac{15}{100} \times \frac{160}{100} = \frac{15}{100} \times \frac{160}{100} = \frac{15}{100} \times \frac{160}{100} = \frac{15}{100} \times \frac{15}{10$$

Alternative:

15%, of 100 grams = 10% + 5% of 16 lg rams
$$10\% = \frac{160}{10} = 16 \text{g rams} \qquad 5\% = \frac{1}{2} \text{ of } 10\% = \frac{16}{2} = 8 \text{g rams} \qquad 24 \text{g ram}$$

$$15\% = 16 + 8 = 24 \text{ g rams} \qquad (Total for Question 15 is 2 marks)$$

16
$$P = 4x + 3y$$

$$x = 5$$
$$v = -2$$

(a) Work out the value of P.

P = ||L.

(b) Expand 4e(e+2)

4e1+8e

(c) Solve
$$3(m-4) = 21$$

m = (2)

(Total for Question 16 is 6 marks)

- 17 There are some chocolates in a box.
 - $\frac{1}{4}$ of the chocolates contain nuts.

The rest of the chocolates do not contain nuts.

Write down the ratio of the number of chocolates that contain nuts to the number of chocolates that do not contain nuts.

Give your answer in the form 1:n

$$\frac{1}{4}$$
 contain nuts $\rightarrow \frac{3}{4}$ do not contain nuts $1-\frac{1}{4}=\frac{4}{4}-\frac{1}{4}=\frac{3}{4}$

ratio of contains nuts: do not contain nuts

1:3

(Total for Question 17 is 2 marks)

```
18 A = \{\text{multiples of 5 between 14 and 26}\}\
```

 $B = \{ \text{odd numbers between 14 and 26} \}$

(a) List the members of $A \cup B$

8 = { odd numbers between 14 and 263 = 15, 17, 19, 21, 23, 25

AVB 3 numbers in A or 8 or both

15, 17, 19, 20, 21, 23, 25

15, 17, 19, 20, 21, 23, 25

(2)

(b) Describe the members of $A \cap B$

ANB: odd multiples of 5 between 14 and 26 intersection (and)

15,25

15, 25

(1)

(Total for Question 18 is 3 marks)

- **19** (a) Work out $2\frac{1}{7} + 1\frac{1}{4}$
- 1. Convert mixed numbers to improper fractions
- 2. find common denominator

$$\times 4 \left(\begin{array}{c} \frac{15}{7} + \frac{5}{4} \\ \frac{60}{28} + \frac{35}{28} \end{array} \right) \times 2 = \frac{95}{28}$$

(2)

(b) Work out $1\frac{1}{5} \div \frac{3}{4}$

Give your answer as a mixed number in its simplest form.

- 1. Convert to mixed number to improper traction
- 2. flip record graction and multiply 3. Convert to mixed number

a.
$$\frac{6}{5} = \frac{3}{4} = \frac{6}{5} \times \frac{4}{3}$$
 cancel common factors: $\frac{2}{5} \times \frac{4}{8} = \frac{2}{5} \times 4 = \frac{8}{5}$

$$\frac{3}{5} = \frac{3}{5}$$

(2)

(Total for Question 19 is 4 marks)

20 In a village

the number of houses and the number of flats are in the ratio 7:4 the number of flats and the number of bungalows are in the ratio 8:5

There are 50 bungalows in the village.

How many houses are there in the village?

flats: bungalows

houses: flats

140 houses

140

(Total for Question 20 is 3 marks)

21 Renee buys 5 kg of sweets to sell. She pays £10 for the sweets.

Renee puts all the sweets into bags. She puts 250 g of sweets into each bag. She sells each bag of sweets for 65p.

Renee sells all the bags of sweets.

Work out her percentage profit.

30

(Total for Question 21 is 4 marks)

22 A cycle race across America is 3069.25 miles in length.

Juan knows his average speed for his previous races is 15.12 miles per hour. For the next race across America he will cycle for 8 hours per day.

(a) Estimate how many days Juan will take to complete the race.

mus per day =
$$8 \times 15 = 120$$

Number of days = $3000 \div 120 = 25$ 125

25

Juan trains for the race.

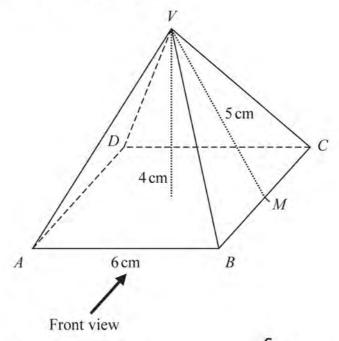

The average speed he can cycle at increases. It is now 16.27 miles per hour.

(b) How does this affect your answer to part (a)?

Less days -> speed = distance if speed increases but distance stays same, time taken time decreases. Juan will ayou more miles per day so race will take less days.

(Total for Question 22 is 4 marks)

23 Here is a solid square-based pyramid, VABCD.

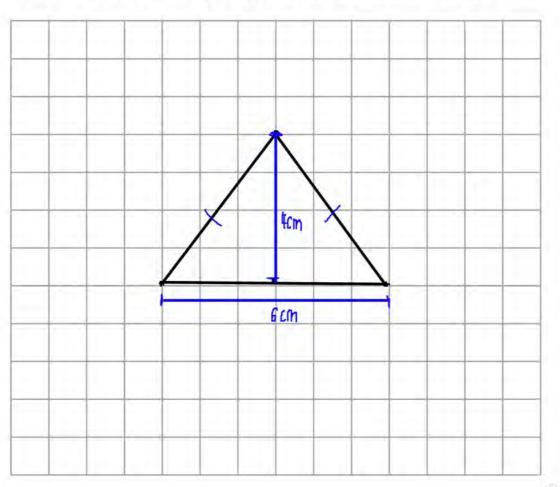

The base of the pyramid is a square of side 6 cm. The height of the pyramid is 4 cm.

M is the midpoint of BC and VM = 5 cm.

(a) Draw an accurate front elevation of the pyramid from the direction of the arrow.

(2)

(b) Work out the total surface area of the pyramid.

area of base =
$$6 \times 6 = 36 \text{ cm}^2$$

area of triangle = $\frac{1}{2} \times 6 \times 5 = 15$

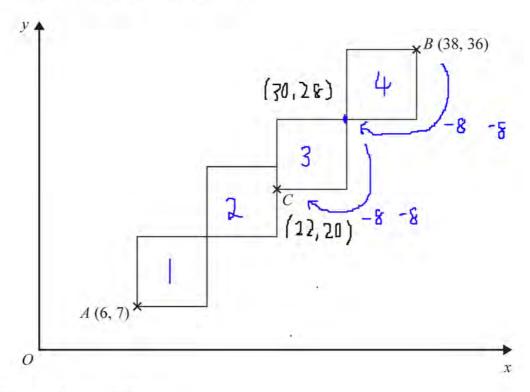

4 triangular faces: total area = 4x15 = 60 cm²
total surface area of pyramid = 36+60 = 96 cm²

(Total for Question 23 is 6 marks)

24 A pattern is made from four identical squares.

The sides of the squares are parallel to the axes.

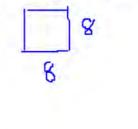

Point A has coordinates (6, 7)

Point B has coordinates (38, 36)

Point C is marked on the diagram.

Work out the coordinates of C.

5 guare

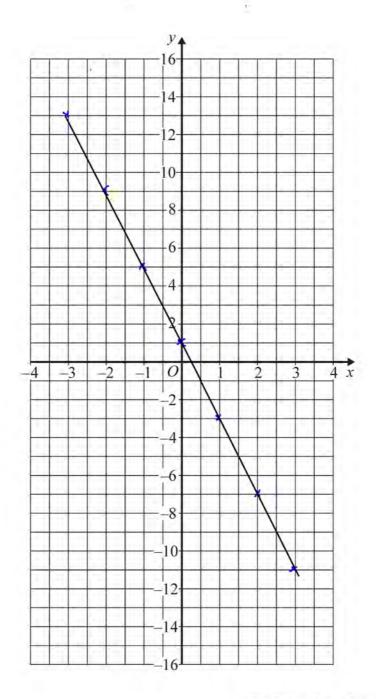

, ३२ , २०

25 On the grid below, draw the graph of y = 1 - 4x for values of x from -3 to 3

1	-3	-1	-1	0	1	1	3	
Ч	-3 3	9	5	1	-3	-7	- }	

- 1. Create table of values
- a. Plot points
- 3. Join points with straight line

(Total for Question 25 is 3 marks)

$$\mathbf{26} \quad \mathbf{a} = \begin{pmatrix} 5 \\ 2 \end{pmatrix} \qquad \qquad \mathbf{b} = \begin{pmatrix} -1 \\ 7 \end{pmatrix}$$

Work out $2\mathbf{a} + \mathbf{b}$ as a column vector.

$$2\underline{a} = 2\binom{5}{2} = \binom{2 \times 5}{2 \times 2} = \binom{10}{4}$$
multiply top and bottom numbers by 2
$$2\underline{a} + \underline{b} = \binom{10}{4} + \binom{-1}{7} = \binom{10-1}{4+7} = \binom{9}{11}$$
add top and bottom numbers separately
