General Certificate of Secondary Education

## Mark Scheme for November 2015

OCR (Oxford Cambridge and RSA) is a leading UK awarding body, providing a wide range of qualifications to meet the needs of candidates of all ages and abilities. OCR qualifications include AS/A Levels, Diplomas, GCSEs, Cambridge Nationals, Cambridge Technicals, Functional Skills, Key Skills, Entry Level qualifications, NVQs and vocational qualifications in areas such as IT, business, languages, teaching/training, administration and secretarial skills.

It is also responsible for developing new specifications to meet national requirements and the needs of students and teachers. OCR is a not-for-profit organisation; any surplus made is invested back into the establishment to help towards the development of qualifications and support, which keep pace with the changing needs of today's society.

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which marks were awarded by examiners. It does not indicate the details of the discussions which took place at an examiners' meeting before marking commenced.

All examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes should be read in conjunction with the published question papers and the report on the examination.

OCR will not enter into any discussion or correspondence in connection with this mark scheme.

Annotations used in the detailed Mark Scheme.

| Annotation | Meaning |
| :--- | :--- |
| $\checkmark$ | Correct |
| $x$ | Incorrect |
| BOD | Benefit of doubt |
| FT | Follow through |
| ISW | Ignore subsequent working (after correct answer obtained), provided method has been completed |
| M0 | Method mark awarded 0 |
| M1 | Method mark awarded 1 |
| M2 | Method mark awarded 2 |
| A1 | Accuracy mark awarded 1 |
| B1 | Independent mark awarded 1 |
| B2 | Independent mark awarded 2 |
| MR | Misread |
| SC | Special case |
| $\wedge$ | Omission sign |

These should be used whenever appropriate during your marking.
The $M, A, B$ etc annotations must be used on your standardisation scripts for responses that are not awarded either 0 or full marks.
It is vital that you annotate these scripts to show how the marks have been awarded.
It is not mandatory to use annotations for any other marking, though you may wish to use them in some circumstances.

## Subject-Specific Marking Instructions

1. $\mathbf{M}$ marks are for using a correct method and are not lost for purely numerical errors.

A marks are for an accurate answer and depend on preceding M (method) marks. Therefore M0 A1 cannot be awarded.
B marks are independent of $\mathbf{M}$ (method) marks and are for a correct final answer, a partially correct answer, or a correct intermediate stage.
SC marks are for special cases that are worthy of some credit.
2. Unless the answer and marks columns of the mark scheme specify $\mathbf{M}$ and $\mathbf{A}$ marks etc, or the mark scheme is 'banded', then if the correct answer is clearly given and is not from wrong working full marks should be awarded.

Do not award the marks if the answer was obtained from an incorrect method, ie incorrect working is seen and the correct answer clearly follows from it.
3. Where follow through (FT) is indicated in the mark scheme, marks can be awarded where the candidate's work follows correctly from a previous answer whether or not it was correct.

Figures or expressions that are being followed through are sometimes encompassed by single quotation marks after the word their for clarity, eg FT $180 \times\left(\right.$ their ' 37 ' +16 ), or FT $300-\sqrt{ }\left(\right.$ their $\left.{ }^{\prime} 5^{2}+7^{2 \prime}\right)$. Answers to part questions which are being followed through are indicated by eg FT $3 \times$ their (a).

For questions with FT available you must ensure that you refer back to the relevant previous answer. You may find it easier to mark these questions candidate by candidate rather than question by question.
4. Where dependent (dep) marks are indicated in the mark scheme, you must check that the candidate has met all the criteria specified for the mark to be awarded.
5. The following abbreviations are commonly found in GCSE Mathematics mark schemes.

- cao means correct answer only.
- figs 237, for example, means any answer with only these digits. You should ignore leading or trailing zeros and any decimal point eg $237000,2.37,2.370,0.00237$ would be acceptable but 23070 or 2374 would not.
- isw means ignore subsequent working (after correct answer obtained).
- nfww means not from wrong working.
- oe means or equivalent.
- rot means rounded or truncated.
- seen means that you should award the mark if that number/expression is seen anywhere in the answer space, including the answer line, even if it is not in the method leading to the final answer.
- soi means seen or implied.

6. Make no deductions for wrong work after an acceptable answer unless the mark scheme says otherwise, indicated for example by the instruction 'mark final answer'.
7. As a general principle, if two or more methods are offered, mark only the method that leads to the answer on the answer line. If two (or more) answers are offered, mark the poorer (poorest).
8. When the data of a question is consistently misread in such a way as not to alter the nature or difficulty of the question, please follow the candidate's work and allow follow through for $\mathbf{A}$ and $\mathbf{B}$ marks. Deduct 1 mark from any $\mathbf{A}$ or $\mathbf{B}$ marks earned and record this by using the MR annotation. M marks are not deducted for misreads.
9. Unless the question asks for an answer to a specific degree of accuracy, always mark at the greatest number of significant figures even if this is rounded or truncated on the answer line. For example, an answer in the mark scheme is 15.75 , which is seen in the working. The candidate then rounds or truncates this to $15.8,15$ or 16 on the answer line. Allow full marks for the 15.75 .
10. If the correct answer is seen in the body and the answer given in the answer space is a clear transcription error allow full marks unless the mark scheme says 'mark final answer' or 'cao'. Place the annotation $\checkmark$ next to the correct answer.

If the answer space is blank but the correct answer is seen in the body allow full marks. Place the annotation $\checkmark$ next to the correct answer.
If the correct answer is seen in the working but a completely different answer is seen in the answer space, then accuracy marks for the answer are lost. Method marks would still be awarded. Use the M0, M1, M2 annotations as appropriate and place the annotation $\times$ next to the wrong answer.
11. Ranges of answers given in the mark scheme are always inclusive.
12. For methods not provided for in the mark scheme give as far as possible equivalent marks for equivalent work. If in doubt, consult your Team Leader.
13. Anything in the mark scheme which is in square brackets [...] is not required for the mark to be earned, but if present it must be correct.

## MARK SCHEME

| Question |  | Answer | Marks | Part marks and guidance |  |  |
| :--- | :--- | :--- | :--- | :---: | :--- | :--- |
| $\mathbf{1}$ | (a) | (i) | Alternate [angles] | $\mathbf{1}$ |  | Condone Z [-angles] <br> Do not accept 'alternative' |
|  | (ii) | $65^{\circ}$ | $\mathbf{2}$ |  | 2 marks for 65 correctly positioned on <br> diagram unless contradicted by <br> answer line <br> M1 for $120-55$ <br> Or 180 $-60-55$ <br> Or $\angle \mathrm{EFB}=60$ or $\angle \mathrm{FBC}=60$ soi | Implied by $180-120=60$ |

| Question |  | Answer | Marks | Part marks and guidance |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 2 | (a) | 11.6 or 11.58[...] | 4 | B1 for midpoints soi $[2.5,7.5,12.5,17.5,22.5,27.5]$ <br> M1 for $2.5 \times 12+7.5 \times 15+12.5 \times 16+$ $17.5 \times 9+22.5 \times 5+27.5 \times 3$ soi Condone 1 error or omission <br> M1 dep for their $695 \div$ their 60 | Condone at least 4 correct midpoints <br> FT their 'midpoints' where each midpoint is any point/endpoint in the interval $30+112.5+200+157.5+112.5+$ <br> 82.5 or 695 seen implies B1M1 <br> Their 60 is from attempt to sum frequencies <br> Attempt to divide their sum by their 60 implied by correct answer to division after total seen, dependent on previous M1 <br> Allow 4 marks for 11.5 following correct division seen. <br> ISW after 11.58 seen if 'estimation' attempted. Answer eg $10<t \leq 15$ scores max 3 for working |
|  | (b) | Correct frequency polygon with scale | 3 | B1 for linear scale for frequency on vertical axis <br> B1 for at least 5 heights correct $[12,15,16,9,5,3]$ <br> FT their linear scale or implied linear scale if no scale indicated <br> B1 for plots at midpoints and joined with straight lines <br> Max 2 marks if not completely correct | Condone zero not marked, but scale must start from 0 <br> Bar chart scores max 2 for scale and heights <br> If frequency polygon and bar chart shown, mark best Ignore lines joining to origin, $(30,0)$ or first point to last, etc Clear intention of straight lines |

| Question |  |  | Answer | Marks | Part marks and guidance |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | (c) |  | $10<t \leq 15$ | 1 |  | Accept any clear indication of 10 to 15 group eg $10-15$, third group etc |
|  | (d) |  | No and 28[.3]\% OR <br> No, $25 \%$ of 60 is 15 , and 17 wait more than 15 minutes | 2 | M1 for 17 seen or $0.25 \times 60=15 \mathbf{s o i}$ | For 2 marks need comparison of 17 with 15 or correct percentage seen <br> M1 implied by eg $1-\frac{43}{60}$ |
| 3 |  |  | 41.16 or 41.2 final answer | 2 | M1 for $4.9 \times 8.4$ oe with no further calculation |  |
| 4 | (a) |  | 2.38 | 2 | M1 for 2.37 or $2.378[. .$.$] or 2.379$ seen Or their value seen correctly rounded to 3 sig figs OR <br> SC1 for answer 2.50 or 5.29 | Any of these values seen Both unrounded and rounded value must be seen |
|  | (b) | (i) | 5 | 2 | B1 for 32 or 256 or $2^{8}$ seen |  |
|  |  | (ii) | $\begin{aligned} & {[p=] 6} \\ & {[q=] 1} \end{aligned}$ | 2 | B1 for any pair of values that satisfy $p q=6$, other than $p=3, q=2$ or for $\frac{15}{5 p}=\frac{q}{2}$ oe | B1 for eg $p=2$ and $q=3$ $p=1.5 \text { and } q=4$ <br> Accept decimals and negatives for <br> B1 if pq = 6 satisfied |
| 5 | (a) | (i) | 0.32 oe | 2 | M1 for $0.24+0.12+0.2+0.04+0.08$ Or SC1 for answer 0.72 | M1 implied by 0.68 seen |
|  |  | (ii) | 0.36 oe | 1 |  | isw for attempted conversion or interpretation |

| Question |  | Answer | Marks | Part marks and guidance |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  | (b) | 40 | 2 | B1 for answer any multiple of 40 or for $\frac{1}{8}$ oe seen or $\frac{7}{8}$ oe seen or for $\frac{16}{40}, \frac{4}{40}$ and $\frac{15}{40}$ | Eg B1 for $\frac{35}{40}$ or $\frac{5}{40}$ |
| 6 | (a) | $3 x(2 y-3 x)$ final answer | 2 | M1 for partial factorisation eg $3\left(2 x y-3 x^{2}\right)$ or $x(6 y-9 x)$ or $6\left(x y-1.5 x^{2}\right)$ or $3 x(2 y-3 x)$ seen | Condone missing final bracket Condone $(3 x+0)(2 y-3 x)$ for 2 |
|  | (b) | 4.2 or $\frac{21}{5}$ isw | 3 | B1 for $3 x+21$ <br> AND <br> M1FT for collecting terms $8 x-3 x=21$ <br> AND <br> M1 for $x=\frac{b}{a}$ after $a x=b$ seen <br> Max 2 marks if answer incorrect | $a \neq 1$ or 0 and $a \neq b$ and $b \neq 0$ Decimals correct to at least 3sf |
|  | (c) | $x>6$ | 2 | M1 for $2 x>5+7$ or better <br> or for $x>\frac{b}{a}$ after $a x>b$ seen, $a \neq 1, b \neq 0$ <br> OR <br> SC1 for answer 6 or $x \ldots 6$ with any incorrect equality or inequality symbol or answer $2 \times 6-7>5$ or $2 \times 6-7=5$ | Condone use of = or incorrect inequality symbol for method mark Decimals correct to at least 3sf <br> condone e.g. '6 or more' as answer for SC1 |

| Question |  |  | Answer | Marks | Part marks and guidance |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 8 | (a) |  | 4, 1 | 1 | Both correct |  |
|  | (b) |  | $\begin{aligned} & \text { Ruled straight line from }(-3,4) \\ & \text { to }(6,1) \end{aligned}$ | 2 | B1 for correct ruled short line Or at least two points plotted correctly FT their table | Tolerance 2 mm radially by eye for plots |
|  | (c) |  | Ruled straight line from $(0,5)$ to $(5,0)$ to $(5,0)$ | 2 | B1 for at least two pairs of values fitting $x+y=5$ soi | Tolerance 2 mm radially by eye for plots <br> Ignore line outside this range |
|  | (d) |  | $x=3, y=2$ | 2FT | B1 for one value correct, FT intersection of their two graphs | Tolerance 2 mm by eye If more than one point of intersection award B1 for one correct pair of values |
| 9 | (a) | (i) | 31.68 | 2 | B1 for 4.32 <br> OR <br> M1 for $36 \times 0.88$ or $36-36 \times 0.12$ oe | For non-calc method need to see $10 \%=3.6$ and $2 \%=0.72$ etc correct and subtraction from 36 , condone arithmetic errors |
|  |  | (ii) | 27.5[0] | 3 | M2 for $24.20 \div 0.88$ oe Or <br> B1 for 0.88 or $88 \%$ seen | Implied by $\frac{88}{100}$ or $\frac{100}{88}$ seen |
|  | (b) |  | 73.71 | 3 | M2 for $65 \times 1.08 \times 1.05 \mathbf{o e}$ or 1.134 soi Or <br> M1 for 1.08 or 1.05 soi | Implied by 70.2 or $65+5.2$ or 68.25 or $65+3.25$ seen, may be as part of a longer calculation |

| Question |  |  | Answer | Marks | Part marks and guidance |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 10 | (a) |  | $(6,5)$ | 1 |  |  |
|  | (b) |  | 0.5 oe | 1 |  |  |
|  | (c) |  | 4:1 | 2 | B1 for 1:4 or $\mathbf{2}^{2}$ seen Or <br> M1 for ratio equivalent to 4 : 1 |  |
| 11 | (a) |  |  | 1 | Any line negative gradient through origin | Clear intention Ignore arrows on lines |
|  | (b) |  | Increasing cubic graph crossing $x$ axis only once when $x \leq 0$ eg | 2 | B1 for any cubic graph |  |
| 12 | (a) | (i) | $\begin{aligned} & £ 26.1[0] \\ & £ 26.35 \\ & £ 26[.00] \end{aligned}$ | $\begin{aligned} & \text { B1 } \\ & \text { B1 } \\ & \text { B1 } \end{aligned}$ |  |  |
|  |  | (ii) | High one week, then low the next repeatedly | B1 | Or equivalent comment | See list |
|  |  | (iii) | Decreasing | 1 | Or equivalent comment | See list |
|  | (b) | (i) | 50 to 70 | 1 |  |  |
|  |  | (ii) | Decreases | 1 | Or equivalent comment | See list <br> Mention of a specific group scores 0 |

| Question |  | Answer | Marks | Part marks and guidance |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 13 |  | 15.6[2...] | 3 | M2 for $25 \tan 32$ or $\frac{25}{\tan 58}$ Or M1 for $\tan 32=\frac{h}{25}$ or $\tan 58=\frac{25}{h}$ soi | $\begin{aligned} & \text { Or } \frac{25 \sin 32}{\sin 58} \\ & \text { Or } \frac{h}{\sin 32}=\frac{25}{\sin 58} \text { oe } \end{aligned}$ |
| 14 |  | $\angle \mathrm{BOC}=70^{\circ}$ <br> [Angle at] centre twice [angle at] circumference $\angle O B C=55^{\circ}$ <br> [Angles in] isosceles [triangle $=$ ] $180^{\circ}$ | $\begin{aligned} & \hline \text { B1 } \\ & \text { B1 } \\ & \\ & \text { B1 } \\ & \text { B1 } \end{aligned}$ | FT (180 - their 70)/2 | Angles may be marked on diagram <br> Their 70 must be acute 180 may be in calculation |
| 15 | (a) | 128 or 128.2 to 128.3 | 2 | M1 for $\frac{1}{3} \pi \times 3.5^{2} \times 10$ |  |
|  | (b) | Use of 185 and 52.5 leading to 792.5 | 3 | B1 for 185 or 52.5 seen And <br> M1 for $4 \times$ their $185+$ their 52.5 | Their 185 in range 170 to 190 Their 52.5 in the range 45 to 55 M1 implied by answer in range 725 to 815 after their 185 and their 52.5 seen |
| 16 | (a) | $84100 \times 1.02^{t} \mathbf{o e}$ | 2 | B1 for $1.02^{t}$ seen oe SC1 for $84100 \times 1.2^{t}$ | Eg 2 for $84100\left(1+\frac{2}{100}\right)^{t}$ <br> B1 for $\left(1+\frac{2}{100}\right)^{t}$ <br> Condone any letter in place of $t$ |
|  | (b) | 94710 or 94700 | 1 |  | Condone 94710.2[...] or 94710.3 |

| Question |  | Answer | Marks | Part marks and guidance |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| 17 | (a) | $\frac{1}{x-2}$ final answer | 3 | M2 for $(x+4)(x-2)$ seen Or <br> M1 for ( $x \pm 4$ ) $(x \pm 2)$ or pair of factors giving two correct terms when expanded, seen or implied in table | Accept eg $(x+8)(x-1)$ for M1 |
|  | (b) | $x^{2}+6 x+14=(x+3)^{2}+5$ | 3 | B2 for 6 or 5 correctly positioned <br> Or M2 for $x^{2}+6 x+9$ seen <br> Or M1 for $x^{2}+6 x+9$ with 2 terms correct | Condone $3 x+3 x$ for $6 x$ for M2 and M1 |
| 18 |  | 155[.4...] | 4 | B3 for 24.6[0...] seen <br> OR <br> M2 for $\sin L=\frac{17 \sin 59}{35}$ <br> Or <br> M1 for $\frac{\sin L}{17}=\frac{\sin 59}{35}$ oe AND <br> M1 for 180 - their $L$ | Their $L$ in range $0<L<90$ and resulting from trig |

## APPENDIX

Exemplar responses for Q.12(a)(ii)

| Response | Mark |
| :--- | :--- |
| Up and down each week | $\mathbf{1}$ |
| With a small decrease and occasional small increase | $\mathbf{1}$ |
| It varies and there is no pattern | $\mathbf{0}$ |
| Every other week Nathan spends more money on food than the previous one | $\mathbf{1}$ |
| The moving average becomes cheaper | $\mathbf{0}$ |
| It increases and decreases every other week | $\mathbf{1}$ |
| The amount Nathan spends increases on odd weeks | $\mathbf{1}$ |
| It increases and decreases each week, no definite pattern | $\mathbf{1}$ |
| It increases or decreases very slightly | $\mathbf{1}$ |

Exemplar responses for Q.12(a)(iii)

| Response | Mark |
| :--- | :--- |
| It decreases by $£ 1$ [spoilt by $£ 1]$ | $\mathbf{0}$ |
| The trend is that the moving average is decreasing slowly apart from week 5 to 6 where the price has increased | $\mathbf{1}$ |
| Every other week is more expensive so 1, 3, 5,7 | $\mathbf{0}$ |
| The trend is consistently the same | $\mathbf{0}$ |
| It goes down by about $£ 1$ each week | $\mathbf{0}$ |
| Negative | $\mathbf{0}$ |

Exemplar responses for Q.12(b)(ii)

| Response | Mark |
| :--- | :--- |
| People are spending less each year | $\mathbf{1}$ |
| It has decreased slowly | $\mathbf{1}$ |
| Money is being spent less | $\mathbf{1}$ |
