MATHEMATICS – Component 1
Non-Calculator Mathematics
HIGHER TIER

2 hours 15 minutes

ADDITIONAL MATERIALS

An additional formulae sheet.

The use of a calculator is not permitted in this examination.

A ruler, protractor and a pair of compasses may be required.

INSTRUCTIONS TO CANDIDATES

Use black ink or black ball-point pen.

Do not use gel pen or correction fluid.

You may use a pencil for graphs and diagrams only.

Write your name, centre number and candidate number in the spaces at the top of this page.

Answer **all** the questions in the spaces provided.

If you run out of space, use the additional page(s) at the back of the booklet, taking care to number the question(s) correctly.

INFORMATION FOR CANDIDATES

You should give details of your method of solution when appropriate.

Unless stated, diagrams are not drawn to scale.

Scale drawing solutions will not be acceptable where you are asked to calculate.

The number of marks is given in brackets at the end of each question or part-question.

You are reminded of the need for good English and orderly, clear presentation in your answers.

For Examiner's use only

Formula list

Area and volume formulae

Where r is the radius of the sphere or cone, l is the slant height of a cone and h is the perpendicular height of a cone:

$$\text{Curved surface area of a cone} = \pi r l$$

$$\text{Surface area of a sphere} = 4\pi r^2$$

$$\text{Volume of a sphere} = \frac{4}{3}\pi r^3$$

$$\text{Volume of a cone} = \frac{1}{3}\pi r^2 h$$

Kinematics formulae

Where a is constant acceleration, u is initial velocity, v is final velocity, s is displacement from the position when $t = 0$ and t is time taken:

$$v = u + at$$

$$s = ut + \frac{1}{2}at^2$$

$$v^2 = u^2 + 2as$$

(C300UA0-1)

1. Ivy mixes lemon juice, pineapple juice and orange juice in the ratio 1 : 2 : 7 to make a fruit drink.
Ivy has 330 ml of her fruit drink in a glass.

How much pineapple juice is in Ivy's glass? [2]

....

....

....

.... ml

2. The shape below consists of a square surrounded by four semi-circles.
The diameter of each semi-circle is 12 cm.

Diagram not drawn to scale

Work out the area of the shape.
Give your answer in the form $a + b\pi$. [4]

....

....

....

....

....

....

Area = ... cm^2

Turn over.

3. Izaan has a block of stainless steel with volume $700\,cm^3$.
The stainless steel has a density of $7\cdot5\,g/cm^3$.

Izaan says,

The block has a mass of less than 5 kg.

Is Izaan correct? [3]

☐ Yes ☐ No ☐ Cannot tell

Show how you decide.

4. Oliver and Kian bake cakes.

The mass of Oliver's cake is between 400 g and 500 g inclusive.
The mass of Kian's cake is between 200 g and 300 g inclusive.

Complete the inequality to show the least and greatest possible differences between the mass of their cakes. [2]

.... $\leqslant$ mass difference $\leqslant$ ....

....

....

5. Jen is mixing some paints to make brown paint.

She made orange paint by mixing red paint and yellow paint.
40% of the orange paint was red paint.

She then mixes the orange paint with some blue paint in the ratio 20 : 21 to make brown paint.

What fraction of the brown paint is red paint? [3]

10. Kate is visiting London.

The probability that she will go on a train is 0·4.
The probability of Kate going to the theatre is independent of her going on a train.

The probability that she goes on a train and goes to the theatre is 0·28.

(a) Complete the following tree diagram. [4]

....

....

....

```
                                           ...............        Goes to the
                                                               theatre
                          Goes
                          on a
                          train
        0·4                                ...............        Does not go
                                                               to the theatre

                                           ...............        Goes to the
                                                               theatre
        ...............   Does
                          not go
                          on a
                          train
                                           ...............        Does not go
                                                               to the theatre
```

(b) Calculate the probability that Kate does not go on a train and does not go to the theatre. [2]

18. Lena sold 200 drinks on Saturday.

This table shows some information about these drinks.

	Tea	Coffee	Milkshake	Totals
Small	5			61
Medium			6	
Large		42		
Totals			66	200

On that Saturday:
- 15% of the drinks sold were large teas.
- The ratio of the number of medium teas to the number of medium milkshakes sold was 3:1.
- The number of large milkshakes sold was double the number of small milkshakes sold.

Complete the table above using this information.

One of the drinks is selected at random.
Find the probability that this drink was either a medium tea or a medium coffee. [6]

Probability of selecting a medium tea or a medium coffee = ...

22. The following iterative formula can be used to find the number of cells of bacteria after n days.

$$B_0 = 1000$$

$$B_{n+1} = 1{\cdot}2B_n \text{ where } n \geqslant 0$$

(a) Show that the number of cells of bacteria after 1 day is 1200. [1]

....

....

....

(b) Use this formula to find the number of cells of bacteria after 3 days. [3]

....

....

....

....

....

....

Number of cells of bacteria after 3 days = ...

(C300UA0-1)

23. Adina has 5 wooden blocks. Each block is a different colour.

| Blue | Red | Green | Yellow | Purple |

Adina selects 3 of these wooden blocks at random.
Each time she does this, she places them on top of each other.
Two ways of arranging the blocks are shown below.

| Blue |
| Yellow |
| Red |

| Green |
| Red |
| Purple |

(a)   Calculate the number of different ways of arranging the blocks.   [2]

....

....

....

....

....

....

....

(b)   How many arrangements are there where the middle block is **either** blue **or** red?   [2]

....
