MATHEMATICS
UNIT 2: CALCULATOR-ALLOWED
INTERMEDIATE TIER

THURSDAY, 7 JUNE 2018 – MORNING

1 hour 45 minutes

ADDITIONAL MATERIALS

A calculator will be required for this examination.

A ruler, protractor and a pair of compasses may be required.

INSTRUCTIONS TO CANDIDATES

Use black ink or black ball-point pen. Do not use gel pen or correction fluid.

You may use a pencil for graphs and diagrams only.

Write your name, centre number and candidate number in the spaces at the top of this page.

Answer **all** the questions in the spaces provided.

If you run out of space, use the continuation page at the back of the booklet. Question numbers must be given for all work written on the continuation page.

Take π as 3·14 or use the π button on your calculator.

INFORMATION FOR CANDIDATES

You should give details of your method of solution when appropriate.

Unless stated, diagrams are not drawn to scale.

Scale drawing solutions will not be acceptable where you are asked to calculate.

The number of marks is given in brackets at the end of each question or part-question.

In question **8**, the assessment will take into account the quality of your linguistic and mathematical organisation, communication and accuracy in writing.

1. *(a)* Solve $\dfrac{x}{4} = 7$. [1]

....

....

(b) Simplify $3f + 7g + f - 4g$. [2]

....

....

(c) Use the formula $5p + 2q = t$ to find the value of q when $p = 4$ and $t = 24{\cdot}6$. [3]

....

....

....

....

Examiner
only

2. *(a)* The square drawn below has rotational symmetry of order 4.
Place **two** identical dots (●) on the square so that it will have rotational symmetry of order 2. [1]
(b) The regular hexagon drawn below has rotational symmetry of order 6.
Place **three** identical dots (●) on the regular hexagon so that it will have rotational symmetry of order 3. [1]
(c) Which of the following shapes has rotational symmetry of order 3, but has **no** line symmetry?
Circle the correct shape. [1]

3. A travel company offers the following holiday options.

Time	Accommodation	Transport
Summer or Winter	Cottage or Hotel	Train or Bus or Car

(a) List all the possible different combinations of holiday options that the company offers. One has been done for you. [3]

Time	Accommodation	Transport
Summer	Cottage	Train

(b) A holiday is chosen at random from all the different combinations on offer. **P** is the probability that the chosen holiday is a

Summer holiday, staying in a Cottage and travelling by Train.

Mark the point **P** on the probability scale shown below. [1]

0   1

(3300U40-1)
4. Which of the following fractions is nearest to $\frac{1}{4}$?

$$\frac{1}{5} \qquad \frac{7}{25} \qquad \frac{13}{50}$$

You must show all your working. [3]

....

....

....

....

....

....

....

....

Answer ....

5. Calculate **both** the area and the perimeter of a rectangle 6 cm long and 4·5 cm wide.

Use the answer spaces to clearly identify which is the area and which is the perimeter.
You must give the correct units for each of your answers. [4]

....

....

....

....

....

....

....

....

Area = ...   Perimeter = ...

6. Circle the correct equation for each of the following.
All the lines shown are straight lines.

(a) [1]
$a = b + c$ $b = c + a$ $b = a - c$ $c = a + b$ $c = a - b$

(b) [1]
$a + c + s + q = 360°$ $p + a = 180°$ $c = q$ $d = r$ $p + q + d + c = 180°$

(c) [1]
$$\frac{a + b + c + d + e}{5} = 360°$$ $$a + b + c + d + e = \frac{360°}{5}$$ $$a + b + c + d + e = 180°$$

$$a + b + c + d + e = 540°$$ $$a + b + c + d + e = 360°$$

7. Calculate the mean of these four time periods.
You must give your answer in hours and minutes. [4]

5 hours 20 minutes   2 hours 44 minutes   6 hours 18 minutes   4 hours 34 minutes

....

....

....

....

....

....

....

....

....

....

....

Mean time = ... hours .... minutes

8. *In this question, you will be assessed on the quality of your organisation, communication and accuracy in writing.*

Cube **A** and cuboid **B** are shown below.
Diagrams not drawn to scale

Express the volume of **B** as a percentage of the volume of **A**.
You must show all your working. [4 + 2 OCW]

....

....

....

....

....

....

....

....

....

....

....

....

9. The diagram below shows an equilateral triangle *ABC* with *AB* = $(4x - 7)$ cm.

A

$(4x - 7)$ cm

B

C
Diagram not drawn to scale

The perimeter of the triangle is 27 cm.
Calculate the value of x. [3]

10. A box contains many discs, identical in shape and size.
A picture of one of four Welsh castles is printed on each disc.

(a) A disc is chosen at random from the box.
Complete the table below to find the probability of choosing a disc showing Dinefwr Castle. [2]

Picture	Caernarfon Castle	Harlech Castle	Rhuddlan Castle	Dinefwr Castle
Probability	0·36	0·12	0·24	

....

....

....

....

(b) In the box, there were 522 discs showing a picture of Caernarfon Castle.
How many of the discs showed a picture of Harlech Castle? [2]

....

....

....

....

11. *(a)* Calculate $\dfrac{145\cdot3}{(12\cdot4-9\cdot8)^3}$, giving your answer correct to 3 significant figures. [2]

....

....

(b) Calculate the reciprocal of 47, giving your answer correct to 4 decimal places. [2]

....

....

12. Circle the correct answer in each of the following.

(a) Which of the following values **cannot** be an external angle of a regular polygon? [1]

| 10° | 18° | 30° | 48° | 72° |

....

....

(b) An arrow on a spinner is facing north.
It is turned clockwise through an angle of 1530°.
In which direction will the arrow now be facing? [1]

North   East   South   West   None of these

....

....

(c) Point *A* is on a bearing of 100° from point *B*.
What is the bearing of point *B* from point *A*? [1]

260°   100°   280°   180°   80°

13. A solution of the equation

$$x^3 - 7x - 51 = 0$$

lies between 4 and 5.

Use the method of trial and improvement to find this solution correct to 1 decimal place. You must show all your working. [4]

(3300U40-1)

14. *(a)* The highest common factor (HCF) of 30 and 75 is the square root of a number.
What is the number? [2]

....

....

....

....

....

....

....

(b) The cube root of 32·768 is $33\frac{1}{3}$ % of a number.

What is the number? [2]

....

....

....

....

....

....

16. Visitors to the top of Snowdon can either walk up the mountain or take the mountain railway from Llanberis.
On a particular day, a visitor to the top of Snowdon is chosen at random.
The probability that this person is female is 0·42.
The probability that this person took the train is 0·35.

The decision to walk or take the train is independent of gender.

(a) Complete the tree diagram shown below. [3]

Gender   Transport

.... Walk

Female

0·42

.... Train

....

.... Walk
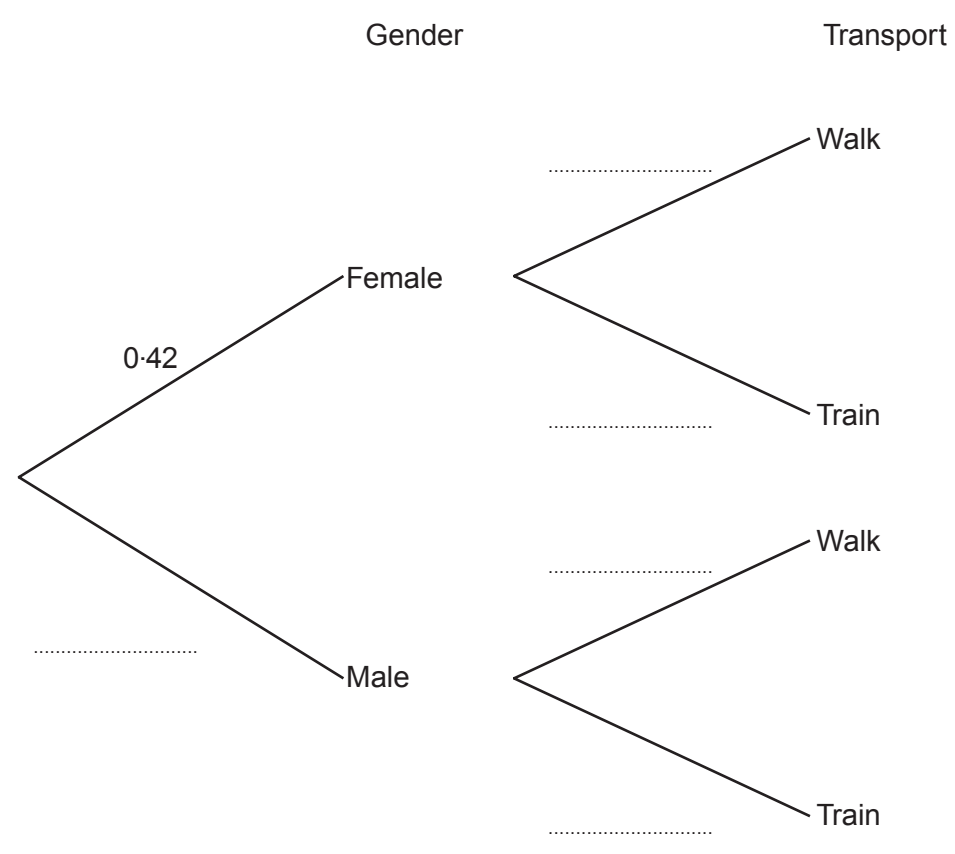

Male

.... Train

(b) The person chosen at random receives a gift voucher.
What is the probability that this person is female and travelled up the mountain by train?
[2]
