## Topic Test 1 Mark Scheme

## Pythagoras' Theorem - Foundation

| Q | Answer | Mark | Comments |
| :---: | :---: | :---: | :---: |
|  |  |  |  |
| 1 | $c=\sqrt{a+b}$ | B1 |  |
|  |  |  |  |
| 2 | $\sqrt{22^{2}-15^{2}}$ | M1 |  |
|  | [16, 16.1] | A1 |  |
|  |  |  |  |
| 3 | $\sqrt{11^{2}+18^{2}}$ | M1 |  |
|  | [21, 21.1] | A1 |  |
|  |  |  |  |
| 4 | $\sqrt{9^{2}+40^{2}}$ | M1 |  |
|  | 41 | A1 |  |
|  | 90 | B1ft | ft their hypotenuse if M awarded |
|  |  |  |  |
| 5 | $\sqrt{2.8^{2}+1.2^{2}}$ | M1 |  |
|  | [3, 3.05] | A1 |  |
|  | [0.95, 1.0] | A1 | ft 4 - their hypotenuse if M awarded |
|  |  |  |  |
| 6 | $330 \div 60 \times 2$ | M1 |  |
|  | 11 | A1 |  |
|  | $\sqrt{60^{2}+\text { their } 11^{2}}$ | M1 |  |
|  | 61 | A1ft | ft their 11 if both Ms awarded |

| Q | Answer | Mark | Comments |
| :--- | :---: | :---: | :---: |

| 7 | $\sqrt{\mathbf{1 0}^{2}-\mathbf{6}^{2}}$ | M1 |  |
| :---: | :--- | :---: | :--- |
|  | 8 | A1 |  |
|  | (side of square $=)(16+$ their 8$) \div 4$ <br> or 6 | M1 |  |
|  | Area square $=$ their $6^{2}$ or 36 <br> or area triangle $=0.5 \times$ their $8 \times 6$ <br> or 24 | M1 |  |
|  | A1 | oe |  |
