## Topic Test 1 Mark Scheme <br> Properties of polygons - Higher

| Q Answer | Mark | Comments |
| :---: | :--- | :---: | :---: |
| $\mathbf{1}$ $a+b=c$ B1  <br> 2(a) $360 \div 6$ M1  <br>  60 A1  <br> 2(b) 120 B1  |  |  | |  |
| :--- |

| $\mathbf{3}$ | One line of symmetry | B1 |  |
| :---: | :--- | :---: | :--- |

| 4(a) | Parallelogram and trapezium | B1 |  |
| :---: | :--- | :---: | :--- |
| 4(b) | All sides not equal or <br> Diagonals do not cross at right <br> angles | B1 |  |
|  | No right angles or <br> All angles not equal | B1 |  |
|  | Diagonals bisect each other | B1 |  |

| Q | Answer | Mark | Comments |
| :---: | :---: | :---: | :---: |
|  |  |  |  |
| 5 | Alternative method 1 |  |  |
|  | Exterior angle Octagon $=45$ | B1 |  |
|  | Exterior angle Pentagon $=72$ | B1 |  |
|  | 27 | B1 |  |
|  | Alternative method 2 |  |  |
|  | Interior angle Octagon $=135$ | B1 |  |
|  | Interior angle Pentagon $=108$ | B1 |  |
|  | 27 | B1 |  |
|  |  |  |  |
| 6 | $360 \times\left(\frac{1}{2}-\frac{n}{2}\right)$ | B1 |  |
|  |  |  |  |
| 7 | $(180-100) \div 2$ or 40 | M1 |  |
|  | $360 \div$ their 40 | M1dep |  |
|  | 9 | A1 |  |
|  |  |  |  |
| 8 | $\begin{aligned} & E D C=540 \div 5 \text { or } 108 \\ & \text { and } E D B=1440 \div 10 \text { or } 144 \end{aligned}$ | M1 |  |
|  | $B D C=360-$ (their $108+$ their 144 ) or 108 | M1dep |  |
|  | $D B C=D C B=(180-\text { their } 108) \div 2$ <br> or 36 | M1dep |  |
|  | Ext angle $A B$ produced $=36$, hence $A B C$ is a straight line | A1 | Clear explanation why $A B C$ is a straight line. |
