1. 

Diagram NOT accurately drawn
In the diagram, $A B=B C=C D=D A$.
Prove that triangle $A D B$ is congruent to triangle $C D B$.
2.

Diagram NOT accurately drawn
$A B C$ is an equilateral triangle.
$D$ lies on $B C$.
$A D$ is perpendicular to $B C$.
(a) Prove that triangle $A D C$ is congruent to triangle $A D B$.
(b) Hence, prove that $B D=\frac{1}{2} A B$.
3.

Diagram NOT accurately drawn
$A B C$ is an equilateral triangle.
$D$ lies on $B C$.
$A D$ is perpendicular to $B C$.
Prove that triangle $A D C$ is congruent to triangle $A D B$.
4.

The diagram shows a triangle $A B C$.
$L M N B$ is a parallelogram where
$L$ is the midpoint of $A B$,
$M$ is the midpoint of $A C$,
and $N$ is the midpoint of $B C$.
Prove that triangle $A L M$ and triangle $M N C$ are congruent.
You must give reasons for each stage of your proof.
