1. Solve $3 x^{2}+7 x-13=0$

Give your solutions correct to 2 decimal places.
$x=$ $\qquad$ or $x=$ $\qquad$
2. Solve the equation

$$
2 x^{2}+6 x-95=0
$$

Give your solutions correct to 3 significant figures.
$\qquad$ or $x=$ $\qquad$
3. Solve $x^{2}+3 x-5=0$

Give your solutions correct to 4 significant figures.
4. Solve this quadratic equation.

$$
x^{2}-5 x-8=0
$$

Give your answers correct to 3 significant figures.

$$
x=
$$

$$
\text { .or } x=\text {. }
$$

$\qquad$
5. (a) Solve $x^{2}-2 x-1=0$

Give your solutions correct to 2 decimal places.
(b) Write down the solutions, correct to 2 decimal places, of $3 x^{2}-6 x-3=0$
6. (a) Solve $x^{2}+x+11=14$ Give your solutions correct to 3 significant figures.

$$
y=x^{2}+x+11
$$

The value of $y$ is a prime number when $x=0,1,2$ and 3
The following statement is not true.
' $y=x^{2}+x+11$ is always a prime number when $x$ is an integer'
(b) Show that the statement is not true.
$\qquad$
$\qquad$
7. The diagram below shows a 6 -sided shape.

All the corners are right angles.
All the measurements are given in centimetres.

Diagram NOT accurately drawn
The area of the shape is $95 \mathrm{~cm}^{2}$.
(a) Show that $2 x^{2}+6 x-95=0$
(b) Solve the equation

$$
2 x^{2}+6 x-95=0
$$

Give your solutions correct to 3 significant figures.
$x=$ $\qquad$ or $x=$
8. The diagram below shows a 6 -sided shape.

All the corners are right angles.
All measurements are given in centimetres.

The area of the shape is $25 \mathrm{~cm}^{2}$.
(a) Show that $6 x^{2}+17 x-39=0$
(b) (i) Solve the equation

$$
6 x^{2}+17 x-39=0
$$

$$
x=
$$

$\qquad$ or $x=$ $\qquad$
(ii) Hence work out the length of the longest side of the shape.
9. The diagram shows a 6 -sided shape.

All the corners are right angles.
All the measurements are given in centimetres.

Diagram NOT
accurately drawn
The area of the shape is $85 \mathrm{~cm}^{2}$.
(a) Show that $9 x^{2}-17 x-85=0$
(b) (i) Solve $9 x^{2}-17 x-85=0$

Give your solutions correct to 3 significant figures.

$$
x=\text {................................... or } x=
$$

(ii) Hence, work out the length of the shortest side of the 6-sided shape.
cm
