|  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |

Q2. Harry buys some tiles so that he can tile his bathroom floor.
One of the tiles is drawn on the grid below.
On the grid below show how the tiles will tessellate.
You should draw at least 6 tiles.

M1.

| Answer | Mark | Additional Guidance |
| :---: | :---: | :--- |
| Correct tessellation | 2 | 32 for at least 6 correct shapes (including initial shape) <br> correctly tessellating <br> (B1 for at least 4 correct shapes <br> (including initial shape) correctly tessellating) |

M2.

| Working | Answer | Mark | Additional Guidance |
| :---: | :---: | :---: | :--- |
|  | Correct <br> tessellation | 2 | M1 for extra hexagons in vertical plane or at points <br> in horizontal plane or 1 hexagon meets another on <br> a diagonal plane <br> A1 for at least 6 hexagons tessellating correctly |

E1. Many candidates were able show how the trapezium tessellates. Most drew at least 6 trapeziums (including the one on the grid) as required, but some of those who drew more than this, sometimes spoiled their answers by including incorrect shapes or inappropriate spaces between them.
