(d)	2200	1	B1 cao
(e)	7000	1	B1 cao
			Total for Question: 5 marks

E1.	This question was very well answered with almost all candidates gaining the	ne full 3
	marks.	

E2. For the majority of candidates this question provided a successful start to the paper. Mistakes were made most often in part (a) where a common error was to round to the nearest hundred rather than to the nearest thousand. Some candidates rounded 3187 up to 4000. Part (b) was answered extremely well and in part (c) most candidates could write the number 5060 in words. Here, incorrect answers often began with 'five hundred' or 'fifty thousand'.

E3. All parts of this question were answered well with success rates of well over 90% for the first two parts and of over 80% for the last 3 parts. Tenths or ten were commonly seen incorrect answers to part (c). There was some incorrect rounding in parts (d) and (e). A small minority of candidates did not rounded to the accuracy required.
