- E1.** The first three parts of this question were answered very well with nearly all candidates gaining at least 3 of the first four marks available. Working out the simplified fraction in part (d) proved more of a challenge. However, about 60% of candidates were awarded at least one mark for giving the fraction in an unsimplified form even if they could not give its simplest form. Responses to part (e) were also good with nearly all candidates using acceptable notation. Where candidates did not give the answer 3:2 it was often through incorrect or incomplete simplification or because they gave 2:3 as their answer.
