

1 Solve the simultaneous equations

$$x + 3y = 12$$

$$5x - y = 4$$

$$x = \dots\dots\dots$$

$$y = \dots\dots\dots$$

(Total for Question is 3 marks)

2 Solve the simultaneous equations

$$5x + y = 21$$

$$x - 3y = 9$$

$$x = \dots\dots\dots$$

$$y = \dots\dots\dots$$

(Total for Question is 3 marks)
