Advanced GCE

## Mark Scheme for June 2019

OCR (Oxford Cambridge and RSA) is a leading UK awarding body, providing a wide range of qualifications to meet the needs of candidates of all ages and abilities. OCR qualifications include AS/A Levels, Diplomas, GCSEs, Cambridge Nationals, Cambridge Technicals, Functional Skills, Key Skills, Entry Level qualifications, NVQs and vocational qualifications in areas such as IT, business, languages, teaching/training, administration and secretarial skills.

It is also responsible for developing new specifications to meet national requirements and the needs of students and teachers. OCR is a not-for-profit organisation; any surplus made is invested back into the establishment to help towards the development of qualifications and support, which keep pace with the changing needs of today's society.

This mark scheme is published as an aid to teachers and students, to indicate the requirements of the examination. It shows the basis on which marks were awarded by examiners. It does not indicate the details of the discussions which took place at an examiners' meeting before marking commenced.

All examiners are instructed that alternative correct answers and unexpected approaches in candidates' scripts must be given marks that fairly reflect the relevant knowledge and skills demonstrated.

Mark schemes should be read in conjunction with the published question papers and the report on the examination.

© OCR 2019

Here are the subject specific instructions for this question paper.

#### **CATEGORISATION OF MARKS**

The marking schemes categorise marks on the MACB scheme.

- **B** marks These are awarded as <u>independent</u> marks, which do not depend on other marks. For a **B**-mark to be scored, the point to which it refers must be seen specifically in the candidate's answer.
- **M** marks These are <u>method</u> marks upon which **A**-marks (accuracy marks) later depend. For an **M**-mark to be scored, the point to which it refers must be seen in the candidate's answer. If a candidate fails to score a particular **M**-mark, then none of the dependent **A**-marks can be scored.
- **C** marks These are <u>compensatory</u> method marks which can be scored even if the points to which they refer are not written down by the candidate, providing subsequent working gives evidence that they must have known it. For example, if an equation carries a **C**-mark and the candidate does not write down the actual equation but does correct working which shows the candidate knew the equation, then the **C**-mark is given.
- A marks These are accuracy or <u>answer</u> marks, which either depend on an **M**-mark, or allow a **C**-mark to be scored.

#### SIGNIFICANT FIGURES

If the data given in a question is to 2 sf, then allow an answer to 2 or <u>more</u> significant figures. If an answer is given to fewer than 2 sf, then penalise once only in the <u>entire</u> paper. Any exception to this rule will be mentioned in the Guidance. H556/02

June 2019

Annotations available in RM Assessor

	Annotation	Meaning
	Correct response	Used to indicate the point at which a mark has been awarded (one tick per mark awarded).
×	Incorrect response	Used to indicate an incorrect answer or a point where a mark is lost.
AE	Arithmetic error	Do not allow the mark where the error occurs. Then follow through the working/calculation giving full subsequent ECF if there are no further errors.
BODBenefit of doubt givenUsed to indicate a mark awarded where the candidate pre examiner feels that sufficient work has been done.		Used to indicate a mark awarded where the candidate provides an answer that is not totally satisfactory, but the examiner feels that sufficient work has been done.
BP     Blank page     Use BP on additional page(s) to show that there is no additional page(s) to show the show		Use BP on additional page(s) to show that there is no additional work provided by the candidates.
CON	Contradiction	No mark can be awarded if the candidate contradicts himself or herself in the same response.
ECF	Error carried forward	Used in <u>numerical answers only</u> , unless specified otherwise in the mark scheme. Answers to later sections of numerical questions may be awarded up to full credit provided they are consistent with earlier incorrect answers. Within a question, ECF can be given for AE, TE and POT errors but not for XP.
L1 Level 1 L1 is used to show 2 marks awarded and L1 <sup>^</sup> is used to show 1 m		L1 is used to show 2 marks awarded and L1 <sup>^</sup> is used to show 1 mark awarded.
L2 Level 2 L2 is used to show 4 marks awarded and L2 <sup>^</sup> is used to sho		L2 is used to show 4 marks awarded and L2 <sup>^</sup> is used to show 3 marks awarded.
L3	Level 3	L3 is used to show 6 marks awarded and L3 <sup>^</sup> is used to show 5 marks awarded.
ΡΟΤ	Power of 10 error	This is usually linked to conversion of SI prefixes. Do not allow the mark where the error occurs. Then follow through the working/calculation giving ECF for subsequent marks if there are no further errors.
SEEN	Seen	To indicate working/text has been seen by the examiner.
SF	Error in number of significant figures	Where more SFs are given than is justified by the question, do not penalise. Fewer significant figures than necessary will be considered within the mark scheme. <b>Penalised only once in the paper.</b>
TE	Transcription error	This error is when there is incorrect transcription of the correct data from the question, graphical read-off, formulae booklet or a previous answer. Do not allow the relevant mark and then follow through the working giving ECF for subsequent marks.
ХР	XPWrong physics or equationUsed in <u>numerical answers only</u> , unless otherwise specified in the mark scheme. Use of an incor wrong physics even if it happens to lead to the correct answer.	
۸	Omission	Used to indicate where more is needed for a mark to be awarded (what is written is not wrong but not enough).

H556/02

June 2019

Abbreviations, annotations and conventions used in the detailed Mark Scheme (to include abbreviations and subject-specific conventions).

Annotation	Meaning
/	alternative and acceptable answers for the same marking point
Reject	Answers which are not worthy of credit
Not	Answers which are not worthy of credit
Ignore	Statements which are irrelevant
Allow	Answers that can be accepted
()	Words which are not essential to gain credit
	Underlined words must be present in answer to score a mark
ECF	Error carried forward
AW	Alternative wording
ORA	Or reverse argument

### **SECTION B**

General rule: For substitution into an equation, allow any subject - unless stated otherwise in the guidance

C	Quest	ion	Answer	Marks	Guidance
16	(a)		time	B1	Allow t but not T Ignore any correct unit given with the correct label Not a wrong unit with the correct label, e.g $t/m$ (CON) Not just a unit of time, e.g. second
	(b)		(v = distance/time) $v = \frac{\lambda}{T}$ $f = \frac{1}{T}$ and $v = f\lambda$ or	M1 A1	Allow '(distance travelled is) $\lambda$ in one period / T Not <i>t</i> for T
			There are <i>f</i> wavelengths per unit time	M1	Allow 'in 1 s' instead of 'per unit time' Allow $\lambda$ / 'waves'; not cycles / oscillations instead of wavelengths
			$v$ = distance travelled per unit time and $v = f \times \lambda$	A1	
	(c)	(i)			Allow other correct methods
			(speed in material =) $\frac{3.0 \times 10^8}{1.20}$ or $2.5 \times 10^8$ (m s <sup>-1</sup> )	C1	Note omitting or incorrect use of 1.2 is XP
			$(t_V =) \frac{1.5 \times 10^{-6}}{3.0 \times 10^8}$ or $5.0 \times 10^{-15}$ (s)	C1	Allow 1 SF answer $5 \times 10^{-15}$
			$(t_{\rm M} =) \frac{1.5 \times 10^{-6} \times 1.20}{3.0 \times 10^8}$ or $6.0 \times 10^{-15}$ (s)	C1	Allow 1 SF answer $6 \times 10^{-15}$ Note this also scores the first C1 mark
			$t = [6.0 - 5.0] \times 10^{-15} = 1.0 \times 10^{-15}$ (s)	A0	<b>Note</b> omitting or incorrect use of 1.2 is XP
		(ii)	$(f=)\frac{3.0\times10^8}{6.0\times10^{-7}}$ or $5.0\times10^{14}$ (Hz) or $(T=)\frac{6.0\times10^{-7}}{3.0\times10^8}$	C1	
			$T = 2.0 \times 10^{-15} (s)$	A1	<b>Allow</b> 1 SF of 2 × 10 <sup>-15</sup>
					<b>Allow</b> 1 mark for $2.4 \times 10^{-15}$ (s); $2.5 \times 10^{8}$ m s <sup>-1</sup> used

Question	Answer	Marks	Guidance	
Question (iii)	φ = 180 °	B1×6	GuidanceGuidancePossible ECF from (i) and (ii)Note answer must be $\phi = (c)(i) \times 360^{\circ}/(c)(ii)$ Not an answer in rad, e.g. $\pi$ radUse level of response annotations in RM AssessorIndicative scientific points may include:Description• Method for creating wave / pulse, e.g. lifting and releasing tray, dropping a ball into the water, ripple- tank arrangement, etc. (Details not expected)• speed = distance ÷ time or $v = x \div t$ or $v = f\lambda$	
	or Clear analysis or Some description <b>and</b> some analysis There is a line of reasoning presented with some structure. The information presented is in the most part relevant and supported by some evidence.		<ul> <li>Measure distance travelled using a ruler</li> <li>Use a stopwatch / timer/ video technique / strobe to measure time / frequency</li> <li>Measure the depth of water using a ruler etc</li> <li>Record / measure / determine v for different d</li> <li>Repeat to find average v</li> </ul>	
	Level 1 (1–2 marks) Limited description or Limited analysis There is an attempt at a logical structure with a line of reasoning. The information is in the most part relevant. O marks No response or no response worthy of credit.		<ul> <li>Analysis</li> <li>Plotting a graph, e.g. <i>v</i> against √<i>d</i> or <i>v</i><sup>2</sup> against <i>d</i> or lg<i>v</i> against lg<i>d</i> etc.</li> <li>Correct determination of <i>g</i> from straight-line graph or</li> <li>Table with <i>v</i> and √<i>d</i> or <i>v</i><sup>2</sup> and <i>d</i></li> <li>Correct calculation of average value of <i>g</i> from the table</li> </ul>	
	Total	15		

C	Quest	tion	Answer	Marks	Guidance
17	(a)	(i)	'Inverted' graph	B1	Ignore amplitude
		(ii)	Nodes shown correctly	B1	Expect at least 2 nodes labelled <b>N</b> No mark if the labels <b>N</b> are omitted <b>Note</b> the nodes must be on the original graph and not that sketched in <b>(a)(i)</b>
	(b)		Correct relationship between length of tube and $\lambda$ for at least <b>two</b> stationary waves	B1	Allow <i>L</i> for length of tube Example $L = \lambda/4$ at 60 Hz, $L = 3\lambda/4$ at 180 Hz $L = 5\lambda/4$ at 300 Hz Allow $\lambda/4$ linked to 60 (Hz) etc on diagram or in text
			speed / v is constant or $f \lambda$ = constant or $f \propto 1/\lambda$	B1	<b>Not</b> just <i>f</i> increases $\lambda$ decreases
			Calculation comparing at least <b>two</b> stationary waves to show $f \lambda$ = constant <b>or</b> $f \propto 1/\lambda$	B1	<b>Note</b> - calculation can also score the previous B1 mark E.g <i>f</i> increases by a factor of 5 (from 60 Hz to 300 Hz) and $\lambda$ decreases by the same factor (of 5)
			Total	5	

C	Quest	tion	Answer	Marks	Guidance
18	(a)		Sum of e.m.f(s) is equal to the sum of p.d.(s) (in a loop of a circuit)	B1	Allow total / $\Sigma$ instead of 'sum' Allow voltage instead of p.d. Notsum of <i>IR</i> , unless <i>I</i> and <i>R</i> are defined Expect 'sum' at least once in the statement Not $\Sigma E = \Sigma V$ , unless <i>V</i> and <i>E</i> are defined
			Energy is conserved	B1	
	(b)		$L \rightarrow [m]$ and $A \rightarrow [m^2]$ or $L/A \rightarrow [m^{-1}]$	C1	
			kg m <sup>3</sup> s <sup>-3</sup> A <sup>-2</sup>	A1	Allow $\frac{\text{kg m}^3}{\text{s}^3 \text{ A}^2}$ or kg m <sup>3</sup> /s <sup>3</sup> A <sup>2</sup>
	(c)	(i)	Line of best fit drawn	B1	Expect the extrapolated line to have a <i>y</i> -intercept in the range 0.60 to 0.85 <b>and</b> at least one data point on each side of the line
			gradient = 2.8	B1	Allow gradient of line in the range 2.60 to 3.00
		(ii)	$E = I(r + R)$ and $R = \rho L/A$	C1	Allow $E = V + IR$ and $R = \rho L/A$
			$\frac{1}{I} = \frac{r}{E} + \frac{\rho}{AE}L \text{ (and comparison with } y = mx + c \text{ leads to}$ gradient = $\frac{\rho}{AE}$ )	A1	
		(iii)	$(\rho = \text{gradient} \times AE)$		
			$\rho$ = 2.8 × $\pi$ × (0.19 × 10 <sup>-3</sup> ) <sup>2</sup> × 1.5	C1	Possible ECF from (i) Note not using $A = \pi r^2$ is wrong physics (XP)
			$ ρ = 4.8 \times 10^{-7} (Ω m) $	A1	<b>Allow</b> 1 mark for $1.9 \times 10^{-6}$ , diameter used instead of radius
		(iv)	The graph / points just shift horizontally (AW)	B1	Allow shifted to the right or left / 'systematic error' / zero error / change in length stays the same / 'no change in vertical values'
			The gradient is unchanged (and $ ho$ will be the same)	B1	
			Total	12	

C	Quest	ion	Answer	Marks	Guidance	
19	(a)		current = 0.01 (A)	M1		
			p.d. = 0.01 × 50 (= 0.50 V)	A1		
	(b)				Allow other correct methods Note there is no ECF from (a)	
			$(V_{75} =)$ 0.5 + 2.5 (V) or $(R_{LED}) =$ 250 ( $\Omega$ ) or $(R_p =)$ 60 ( $\Omega$ )	C1	Allow 1 SF for the p.d. of 3 (V)	
			( <i>I</i> <sub>100</sub> =) <b>0.05</b> (A)	C1	There is no ECF here from wrong physics (XP) from the parallel network	
			$(E = 3.0 + 0.05 \times 100)$			
			<i>E</i> = 8.0 (V)	A1	Allow 1 SF answer of 8	
	(c)	(i)	( <i>P</i> =) $0.01 \times 2.5$ or $0.01^2 \times 250$ or $2.5^2/250$ or $0.025$ (W)	C1		
			$(E_{\text{photon}} =) \frac{6.63 \times 10^{-34} \times 3.0 \times 10^8}{4.7 \times 10^{-7}} \text{ or } 4.23 \times 10^{-19} \text{ (J)}$	C1	<b>Allow</b> $4.0 \times 10^{-19}$ (J); which is 2.5 eV	
			(number per second = $\frac{0.025}{4.23 \times 10^{-19}}$ )			
			number per second = $5.9 \times 10^{16} (s^{-1})$	A1	Note using $4.0 \times 10^{-19}$ (J) gives $6.25 \times 10^{16}$ (s <sup>-1</sup> )	
		(ii)	$(E_{\text{photon}} =) 2.64 \text{ (eV)}$ or $(\phi =) 3.68 \times 10^{-19} \text{ (J)}$ or $(f_0 =) 5.55 \times 10^{14} \text{ (Hz)}$ or $(\lambda_0 =) 5.40 \times 10^{-7} \text{ (m)}$	M1	Possible ECF from (i) Allow 2.6 (eV) or $3.7 \times 10^{-19}$ (J) Allow 2.5 (eV) as the energy of the photon	
			Photoelectrons are emitted and 2.6(4) > 2.3 or $4.23 \times 10^{-19} > 3.68 \times 10^{-19}$ or $6.38 \times 10^{14}$ (Hz) > $5.55 \times 10^{14}$ (Hz) or $4.7 \times 10^{-7}$ (m) < $5.40 \times 10^{-7}$ (m)	A1	Note the conclusion must be consistent with (i) Allow $hf > \phi$ Note this can be implied by calculating the KE of the emitted electron	
			Total	10		

Q	uesti	on	Answer	Marks	Guidance
20	(a)		$F = BQv$ and $F = mv^2/r$ or $B = mv/Qr$ (Any subject)	C1	Allow e
			$(B =) \frac{1.4 \times 10^{-25} \times 4.8 \times 10^4}{1.6 \times 10^{-19} \times 0.18}$	C1	
			<i>B</i> = 0.23 (T)	A1	
	(b)	(i)	Electron <b>and</b> (electron) antineutrino	B1	Allow beta-minus (particle) / $\beta^-$ ; $\bar{\upsilon}_{(e)}$ Allow anti electron neutrino
		(ii)	$\lambda = \ln 2/49$ or $\lambda = 0.0141$ (billion y <sup>-1</sup> )	C1	Allow $\frac{\ln 2}{49 \times 10^9 \times 3.16 \times 10^7}$ or $4.48 \times 10^{-19}$ (s <sup>-1</sup> )
			$0.95 = e^{-0.0141t}$ or $0.95 = e^{-4.48 \times 10^{-19}t}$ (age = - ln(0.95)/0.0141)	C1	Allow both C1 marks for $ln(0.95) = ln(0.5) \times t/49$ Allow 0.05/0.0141 $\approx t$ (this gives 3.5 for the final mark)
			age = 3.6 (billion years)	A1	Note age in seconds is $1.15 \times 10^{17}$ (s); this will score 2 marks
			Total	7	

C	Quest	tion	Answer	Marks	Guidance
21	(a)	(i)	Too many <i>N</i> / neutrons	B1	Allow 'neutron-rich' or (for stability) neutron changes to proton or (for stability) charge increases / Z changes to 8 Allow too few protons / 'proton-poor'
		(ii)	Too few <i>N</i> / neutrons	B1	Allow 'neutron-poor' or (for stability) proton changes to neutron or (for stability) charge decreases / Z changes to 6 Allow too many protons / 'proton-rich'
	(b)	(i)	More neutron <b>s</b> produced (from each fission reaction)	B1	
			Go on to produce further (fission) reactions / splitting (of nuclei) / energy	B1	
		(ii)	Control rod(s) used	B1	Allow boron / cadmium / indium / silver Not moderator
			These absorb the neutrons (without fission)	B1	Not neutrons slowed down and/or stopped
		(iii)			<b>Note</b> the 3.0% can be done at any stage, allow other correct methods
			$(\Delta m =) 0.190 \times 1.66 \times 10^{-27}$ or $3.15 \times 10^{-28}$ (kg)	C1	Allow the use of $1.67 \times 10^{-27}$
			$(\Delta E =) 0.190 \times 1.66 \times 10^{-27} \times (3.0 \times 10^8)^2$ or $2.84 \times 10^{-11}$ (J)	C1	Allow ECF from $1.66 \times 10^{-27}$ omitted
			$\frac{1.00}{0.235} \times 6.02 \times 10^{23}  \text{or}  2.56 \times 10^{24}$ (energy = $0.03 \times 2.56 \times 10^{24} \times 2.84 \times 10^{-11}$ )	C1	Note $7.69 \times 10^{22}$ will score this C1 mark; 3.0% included
			energy = $2.2 \times 10^{12}$ (J)	A1	Allow 3 marks for $7.3 \times 10^{13}$ (J); 3.0% omitted Allow 3 marks for $1.3 \times 10^{39}$ (J); $1.66 \times 10^{-27}$ omitted
			Total	10	

Q	uestic	on	Answer	Marks	Guidance
22	(a)	(i)	<i>Qd</i> = constant	C1	<ul> <li>Allow straight-line graph of Q against 1/d passes through the origin</li> <li>Allow as d increases by a given factor (e.g. doubles) then Q decreases by the same factor (e.g. halves)</li> </ul>
			At least <b>two</b> pairs of values substituted to show that <i>Qd</i> = constant	A1	Allow numbers that show when <i>d</i> doubles then <i>Q</i> halves Ignore prefixes and POT errors
		(ii)	$Q = VC$ and $C = \frac{\varepsilon_0 A}{d}$	C1	Allow $\varepsilon$
			Hence $Q = \frac{V\varepsilon_0 A}{d}$ (and $Q \propto \frac{1}{d}$ )	A1	<b>Note</b> Q, or Q/V must be the subject here <b>Allow</b> $Q \propto C$ and $C \propto \frac{1}{d}$
	(b)	(i)	1.8 × 10 <sup>-14</sup> (N)	B1	Ignore sign
		(ii)	$(F_{\rm E} =) 3 \times 1.8 \times 10^{-14} ({\rm N})$ or $(F_{\rm E} =) 5.4 \times 10^{-14} ({\rm N})$ or $({\rm mass} =) \frac{1.8 \times 10^{-14}}{g}$	C1	<b>Note</b> this mark is for either electric force on the oil drop <b>or</b> the calculating the mass of the oil drop
			(resultant force = $3.6 \times 10^{-14}$ N)		Allow for ECF from (b)(i)
			$(a =) \frac{3.6 \times 10^{-14}}{(1.8 \times 10^{-14}/g)}$	C1	
			<i>a</i> = 20 (m s <sup>-2</sup> )	A1	Allow $g = 9.8$ , but not $g = 10$ Note answer to 3SF is 19.6 Allow 2 marks for $a = 2g$ Note a bald answer of 20 will score 3 marks, if however, we see evidence for $g = 10$ , then maximum score will be 2 mark

H556/02

Question	Answer	Marks	Guidance
(c)*	Level 3 (5–6 marks) Clear description and at least two from control of variables There is a well-developed line of reasoning which is clear and logically structured. The information presented is relevant and substantiated. Level 2 (3–4 marks) Some description and at least one from control of variables There is a line of reasoning presented with some structure. The information presented is in the most part relevant and supported by some evidence. Level 1 (1–2 marks) Any description but no control of variables or Limited mention of control of variable(s) There is an attempt at a logical structure with a line of	B1× 6	<ul> <li>Use level of response annotations in RM Assessor</li> <li>Indicative scientific points may include:</li> <li>Description <ul> <li>E = V/d</li> </ul> </li> <li>Voltmeter used to measure p.d.</li> <li>Ruler used to measure separation <i>d</i> plates</li> <li>Plastic rod held in a stand</li> <li>Safety: Do not touch the terminals of high-voltage supply / (positive) plate</li> <li>Vary <i>d</i> or <i>V</i> to change <i>E</i></li> <li><i>θ</i> determined for each value of <i>E</i></li> <li>Experiment repeated for several values of <i>E</i></li> <li>Sensible techniques used to determine <i>θ</i>, e.g. use a protractor</li> <li>Plot tan <i>θ</i> against <i>E</i> or tan <i>θ</i> against 1/<i>d</i> graph</li> <li>Straight line through origin (expected)</li> </ul>
	There is an attempt at a logical structure with a line of reasoning. The information is in the most part relevant. <b>0 marks</b> No response or no response worthy of credit. Total	14	<ul> <li>Control of variables</li> <li>Charge <i>q</i> kept constant (ignore method)</li> <li>Method for keeping <i>q</i> constant (e.g. same <i>V</i> for the (positive) plate, use separate constant voltage supply, etc)</li> <li>Use the same foil / keep <i>W</i> the same</li> <li>Keep <i>d</i> or <i>V</i> constant</li> <li>Foil in between plates (where the field is uniform)</li> <li>Draught-free room</li> <li>Do the experiment quickly to avoid leakage of charge</li> </ul>

Question		on	Answer	Marks	Guidance
23	(a)				Ignore polarity of high voltage supply throughout
			(Evacuated tube with) cathode / heater / filament <b>and</b> target / metal / anode	B1	<b>Note</b> the first two B1 marks can be scored on a labelled diagram
			High voltage (supply) connected between cathode and anode	B1	<b>Allow</b> a specific value in the range 10 kV to 1 MV <b>Note</b> expecting 'high' or qualified by values in range above
			(Accelerated) electrons hit the target / metal / anode and their KE is transformed into X-ray (photons)	B1	
	(b)		Any <b>two</b> from:		<b>Ignore</b> if interaction between photons and electrons is not one-to-one
			Photoelectric (effect) Photon (is absorbed and an) electron removed (from the atom)	M1 A1	Not X-ray wave etc; must refer to photon
			Compton (scattering / effect) Photon scattered / deflection with longer wavelength / low frequency / low energy and electron removed (from the atom)	M1 A1	<b>Not</b> reflected <b>Not</b> X-ray wave etc; must refer to photon
			Pair production Photon (absorbed) and produce electron-positron (pair)	M1 A1	Not X-ray wave etc; must refer to photon
			Total	7	

Q	Question		Answer	Marks	Guidance
24	(a)		Piezoelectric (effect) mentioned	B1	<b>Allow</b> 'applied p.d. changes the shape of a crystal / film'
			An alternating p.d. applied to the film / crystal produces vibrations / resonance (and this in turn produces ultrasound)	B1	Allow alternating current / a.c. Allow expand and contract for vibrations (AW) Allow a named film / crystal
	(b)		density (of tissue) <b>or</b> speed (of ultrasound in tissue) <b>or</b> acoustic impedance mentioned	B1	Not $\rho$ or $c$ or $Z$
			Same Z, no reflection / different Z gives reflection	B1	<b>Allow</b> same <i>Z</i> , total transmission / different Z gives some transmission
			$I_r/I_0 = [Z_1 - Z_2]^2/[Z_1 + Z_2]^2$ <b>and</b> intensity mentioned	B1	Allow fraction of intensity reflected = $(Z_1 - Z_2)^2/(Z_1 + Z_2)^2$
			Total	5
