## GCE A LEVEL MARKING SCHEME

AUTUMN 2020

A LEVEL PHYSICS - COMPONENT 1 A420U10-1

## INTRODUCTION

This marking scheme was used by WJEC for the 2020 examination. It was finalised after detailed discussion at examiners' conferences by all the examiners involved in the assessment. The conference was held shortly after the paper was taken so that reference could be made to the full range of candidates' responses, with photocopied scripts forming the basis of discussion. The aim of the conference was to ensure that the marking scheme was interpreted and applied in the same way by all examiners.

It is hoped that this information will be of assistance to centres but it is recognised at the same time that, without the benefit of participation in the examiners' conference, teachers may have different views on certain matters of detail or interpretation.

WJEC regrets that it cannot enter into any discussion or correspondence about this marking scheme.

## GCE A LEVEL PHYSICS COMPONENT 1

## NEWTONIAN PHYSICS

## AUTUMN 2020 MARK SCHEME

## GENERAL INSTRUCTIONS

Recording of marks
Examiners must mark in red ink.
One tick must equate to one mark (except for the extended response question).
Question totals should be written in the box at the end of the question.
Question totals should be entered onto the grid on the front cover and these should be added to give the script total for each candidate.

## Marking rules

All work should be seen to have been marked.
Marking schemes will indicate when explicit working is deemed to be a necessary part of a correct answer.
Crossed out responses not replaced should be marked.
Credit will be given for correct and relevant alternative responses which are not recorded in the mark scheme.
Extended response question
A level of response mark scheme is used. Before applying the mark scheme please read through the whole answer from start to finish. Firstly, decide which level descriptor matches best with the candidate's response: remember that you should be considering the overall quality of the response. Then decide which mark to award within the level. Award the higher mark in the level if there is a good match with both the content statements and the communication statement.

The following may be used in marking schemes or in the marking of scripts to indicate reasons for the marks awarded.
cao $=\quad$ correct answer only
ecf $=\quad$ error carried forward
bod $=\quad$ benefit of doubt

| Question |  |  | Marking details | Marks available |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | A01 | AO2 | AO3 | Total | Maths | Prac |
| 1 | (a) | (i) |  | $0.75[ \pm 0.05]$ s |  | 1 |  | 1 | 1 |  |
|  |  | (ii) | $68 \mathrm{~m}[ \pm 3 \mathrm{~m}]$ |  | 1 |  | 1 | 1 |  |
|  |  | (iii) | Figures correctly inserted into constant acc equation(s) at some chosen speed. For example, at $30 \mathrm{~ms}^{-1}, 0=30^{2}+2 a \times 68$ [1] [Tolerate interchange of $u$ and $v$ and (for this mark only) stopping distance used instead of braking distance.] $a=-6.6 \mathrm{~m} \mathrm{~s}^{-2}\left[ \pm 0.6 \mathrm{~m} \mathrm{~s}^{-2}\right.$; accept $6.6 \mathrm{~m} \mathrm{~s}^{-2}$; ecf on 68 m$][1]$ Deceleration correctly calculated at one more speed and sensible conclusion drawn ecf [1] <br> Alternative: <br> For at least two points, $\frac{v_{1}}{v_{2}}$ compared with $\left(\frac{x_{1}}{x_{2}}\right)^{2}$ or equiv. [1] <br> Comparison carried out with clear results [1] Sensible conclusion drawn, implying that square law relation is equivalent to same acceleration throughout [1] |  |  | 3 | 3 | 2 |  |

| Question |  | Marking details | Marks available |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | AO1 | AO2 | AO3 | Total | Maths | Prac |
| (b) |  |  | Quantitative use made of data in (a), e.g. from graph, stopping distance [on dry road at maximum legal speed] is $\approx 95 \mathrm{~m}$. [1] Some conclusion, e.g. 95 m is rather greater than two gaps between chevrons [or equiv] so idea good or inadequate. [1] <br> Critical/supporting remarks [1] could include: <br> - Not enough distance if roads wet or icy, or no help in fog <br> - Even longer distance needed if maximum legal speed exceeded or equiv <br> - Should be ignored in a traffic jam <br> - Meaning of notice not clear: 2 chevrons or 2 gaps apart? <br> - Arguably use of chevrons too infrequent to save many accidents <br> - Drivers could be distracted by looking at chevrons on road |  |  | 3 | 3 | 2 |  |
|  |  | Question 1 total | 0 | 2 | 6 | 8 | 6 | 0 |

| Question |  |  | Marking details | Marks available |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | AO1 | AO2 | AO3 | Total | Maths | Prac |
| 2 | (a) |  |  | $\frac{\text { final velocity - initial velocity }}{\text { time [taken to change] }}$ or equivalent [1] | 1 |  |  | 1 |  |  |
|  | (b) | (i) | $\begin{aligned} & \text { [Distance gone per second }]=2 \pi \times 0.25[\mathrm{~m}] \times 5.2 \times 10^{6}\left[\mathrm{~s}^{-1}\right][1] \\ & =8.2 \times 10^{6}\left[\mathrm{~m} \mathrm{~s}^{-1}\right][1] \end{aligned}$ | 1 | 1 |  | 2 | 2 |  |
|  |  | (ii) | $\begin{align*} & \text { acc }=\frac{\left(8.0 \times 10^{6}\right)^{2}}{0.25}\left[\mathrm{~m} \mathrm{~s}^{-2}\right] \text { or } \frac{\left(8.17 \times 10^{6}\right)^{2}}{0.25}\left[\mathrm{~m} \mathrm{~s}^{-2}\right]  \tag{1}\\ & =2.6(\text { or } 2.7) \times 10^{14} \mathrm{~m} \mathrm{~s}^{-2} \text { unit mark }[1] \end{align*}$ <br> South or towards circle centre. Accept downwards. | 1 <br> 1 | 1 |  | 3 | 1 |  |
|  |  | (iii) | Time for half revolution $=\frac{1}{2} \times \frac{1}{5.2 \times 10^{6}} \mathrm{~s} \quad\left[=9.62 \times 10^{-8} \mathrm{~s}\right][1]$ <br> Final velocity - initial velocity $=1.63 \times 10^{7}\left[\mathrm{~ms}^{-1}\right]$ [South] [1] <br> Mean acc $=1.7 \times 10^{14}\left[\mathrm{~m} \mathrm{~s}^{-2}\right]$ South [Accept South for $\left.\Delta v\right][1]$ |  | 3 |  | 3 | 2 |  |
|  | (c) |  | Adam is wrong because acc's (or force) direction keeps changing [1] <br> Brian is right because final vel - initial vel $=0$ or equiv [1] |  |  | 2 | 2 |  |  |
|  |  |  | Question 2 total | 4 | 5 | 2 | 11 | 5 | 0 |
